Jul 11 Randall Irmis: Moab Before the Dinosaurs: Life on a Coastal Desert 300 Million Years Ago- Some 70 million years before the first dinosaurs evolved, Moab was situated just north of the equator - a desert on the coast of a shallow ocean. Despite these hot & dry conditions, the Moab area was teeming with life, 300 million years ago, including some of the earliest mammal ancestors. Randy will discuss ongoing collaborative fieldwork & research that is uncovering what kinds of animals and plants lived during this time, & what they tell us about the last time the Earth transitioned from an icehouse to greenhouse state. 6pm at the Moab Information Center, corner of Main & Center Streets. Sponsored by Canyonlands Natural History Association (CNHA) & Moab Museum.
