Grand County 4-H Model Rocketry Club

5-4-3-2-1. Ignition! Blast Off!

Rockets are flying in Moab! The Grand County 4-H Model Rocketry Club (GCMRC) has launched! You can be part of the fun!

The rocketry club was created to provide a safe environment for members to experience the fun of building and launching their own rockets. The club will fly rockets from kits and use engines manufactured and produced by major hobby companies. Safety is key to all club activities.

GCMRC will explore topics related to rocketry such as aerodynamic design, gravity, telemetry, and more! 4-H and the National Association of Rocketry have developed a partnership to promote STEM (Science, Technology, Engineering, Mathematics) education in club projects.

The Rocketry Club will meet twice a month at the USU building located at 1850 S. Aggie Blvd, Moab, UT 84532. The club is open to 6th grade through 12th grade individuals. Parents and family members are strongly encouraged to participate with their child in this rewarding, fun, and educational activity.
