

# Science Happenings

## 7th Annual Festival of Science in Moab October 19-23, 2022

The Festival Committee has organized a variety of fantastic and free events showcasing the wonders and value of science, with a focus on science occurring on the Colorado Plateau. The goal of the event is to connect and inspire citizens and visitors of southeastern Utah with the joy of science, the societal importance of our regional research, and the thrill of scientific discovery. The Festival kicks off during the week with events and activities happening all through the weekend.

Too much stuff to carry home?

There's an easier way.
