Moab's 53rd Annual Safari

The Red Rock 4-Wheelers are excited to welcome you to the 53rd annual Jeep Safari. As a Moab rite of Spring, about April 13th the town will come alive with the roar of 4 wheel drive vehicles coming to town in what is recognized as one of the largest gatherings of 4 wheel drive lovers in the USA. For nine days, culminating on Easter Sunday, April 21st, hundreds of vehicles and passengers take to the multitude of trails in the area.

It has also become the location of a Jeep (Fiat Chrysler Corporation) display during Safari week. They display many of their new prototypes and survey the public for comments. Many of the Jeep models are a result of the input they receive in Moab.

As you review the magazine and decide on your trail choice, you will notice that some of our more popular trails will be available 2 times a day. We give every participant that comes to Safari a comment card for them to give us input about their experience. We review these cards thoroughly and when we see a trend of comments, we make adjustments. We received a number of comments about too many vehicles on each trail. To remedy this we are lowering the amount

of vehicles per trail, but offering the trail more often to accommodate participant demand.

At the same time our trail committee elected to lower the allowable vehicles on almost every other trail. The days of 75 plus vehicles per trail are a thing of the past.

A word of warning: Register early to ensure getting the trails you want.

Also bear in mind that on the split trail days, you must go on the trail at the time you chose. If you chose the 8:00 am and miss it, you can't go at 10:00 am.

As you peruse the trail offerings, you will note that some of the pages will indicate that a company will be shown as a supporter for a specified day. These Trail Supporters have chosen to make a donation to the Red Rock 4-Wheelers MUD Fund (Multiple Use Defense) and

participate on a scheduled day. As this program has evolved, the companies that choose to participate have found it useful to interact with the other trail participants and even give them a variety of swag, like hats, t-shirts, tools, etc. These major industry manufacturers have found this to be a way to touch the end users in a meaningful way on the trail.

One of the interesting challenges

Trail descriptions start on Page 74

Registration information

Page 22

that we face every year, is the matching of participants to the appropriate trail for their experience and equipment. We try to provide enough information in the pages of this magazine and on the website www.rr4w.com to help in your planning.

The trail descriptions start on page 74 and run through page 158. After looking over the **trail ratings descriptions on page 72**, you should be able to decide where you and your equipment fit into the mix. If in doubt it is usually good advice to plan on a trail rated 1 less than you might think of trying. You will probably be happier with the ultimate outcome. Trying a trail rated higher than you feel comfortable with, will not only lead to discomfort on your part, but may cause others on the trail to have an unpleasant day.

There will be Red Rock 4-Wheelers available at registration to give more complete information, to help in your trails selection. The overall goal of the process, is for everyone to have a great Safari.

The Red Rock 4-Wheelers and the Moab Chamber of Commerce welcome everyone to the 53rd annual Easter Jeep Safari.

WHEN IS THE ARENA OPEN FOR REGISTRATION?

Yes, we will admit Easter Jeep Safari can get confusing for those new to the event. Let's take a step back and walk through what you should do after you're registered and when you arrive in Moab.

First - make sure you have a place to stay! Moab books up very early for Safari, sometimes reservations are carried over from year to year, so plan ahead and make motel or campground reservations as soon as you register for the event.

Second - If at all possible check in with the Registration Desk before your first trail run to pick up your registration materials. But, don't be late for your trail - you can always check in the next day. The lines are long but move fast. Registration is located at the Old Spanish Trail Arena (OSTA). Remember to bring your confirmation form with you. You may need it as a reminder every day for the trails you are signed up for.

Trail leaders will have packets for pre-registered people for Big Saturday & Easter Sunday only - see Lineup information in this magazine (page 24, 25, 26 and 48-51).

During the event, the Registration Area, (when open), will be the only place you can find the most up-to-date information on any trail problems due to weather or rock slides.

Why check in if you have pre-registered and already have a confirmation? Because, you will get:

- A dash plaque commemorating the event.
- A raffle ticket for Friday night's Grand Giveaway also held at the Old Spanish Trail Arena on Friday night at 6:30 p.m.
- A trail flag - required if you are jeeping on a Big Saturday Trail (April 20th)

The Red Rock 4 Wheelers will also offer some event memorabilia for sale, of which, proceeds go toward the club's trail defense fund.

You just arrived in town and didn't register for the Safari, but it looks like fun and you would like to go. You can go to the Old Spanish Trail Arena during the open hours mentioned earlier and check AT THE REGISTRATION DESK IN PERSON for available spaces on trails.

SCHEDULE OLD SPANISH TRAIL ARENA Saturday through Wednesday

April 13th - 17th

Mornings only 7:00 to 10:00 a.m.

A separate line will be open to expedite participants with early-trail departures

Thursday, April 18th

OPEN ALL DAY

7:00 a.m. - 8:00 p.m.

Friday, April 19th

OPEN ALL DAY

7:00 a.m. to 6:00 p.m.

**THE ARENA IS NOT OPEN ON
Big Saturday & Sunday, April 20th & 21st**

Third - Get to where your trail lines up, preferably 1/2 hour early. Information included in this magazine includes a few pages devoted to maps of town showing meeting places, CB channels, and meeting times for all the trails. (All participants will be expected to sign a Release of Liability form before embarking on each trip).

Fourth - An item often missed by new attendees is that Big Saturday's lineup is totally different from any other day. With a few exceptions, Big Saturday trails all line up downtown (See the Big Saturday Lineup map on page 26). The Trail leader will be sitting where the tail end of the arrow is for each trail, on the side street. Departure is at 9 a.m. on Big Saturday. **It is a good idea to carefully read this magazine about Saturday lineup and then get in line about an hour early.** Don't worry, you won't be bored, there will be tons of 4X4s to look at and new friends to visit with! But, be in your vehicle, engine running at 10 minutes until 9:00am!

Once a trail is filled, it will be closed to further registrations. **Trail leaders cannot take registrations at the line-up, whether or not the trail limit is filled.**

Bring lunch.

FILL UP YOUR GAS TANK.

Bring plenty of water.

Every trail is a full-day adventure.

NEW ADDITIONS FOR 2019

We have added a new trail to the mix for 2019. It is called Buttes & Towers, rated a 3 on our trail rating system, it has been added to offer something new for some of our returning visitors. As with all of our trails this one has been chosen for its variety of scenery and level of obstacles to challenge your driving skills. We introduced the trail at the 2018 Labor Day Campout and the response was overwhelming in the enthusiasm for it. You can

see a complete description of the trail on page 76.

We continue to explore the area for new trail offerings and variations on existing trails.

A new addition to our schedule in 2018 was the 4wd Skills Day. This new concept trail offered attendees some hands on learning activities related to four wheeling.

The trail was led by Nena Barlow, owner of Barlow Jeep Rentals and Tours. Nina has many years of leading tours and trails including the Rubicon in California. She also teaches driving skills in her business and brought much of that talent to the trail for the day. Her associate helpers for the day are all club members with years of experience. A complete write up is available on page 114. Based on the feedback we have expanded this offering to 3 days for 2019.

The 4wd Skills Day takes place in the Tip Toe Behind the Rocks area. This trail will allow us to utilize the variety of terrain and obstacle types you encounter on other trails. The Officials hope to help drivers develop their solid 4wd techniques. You will become aware of vehicle dynamics, preparedness, basic recovery and safety. Drivers will learn how to analyze rocks, hills, ledges, and sand and make effective driving corrections, under the guidance of seasoned 4-wheelers and professional instructors. You should be aware that this is a learning day and not a trail in the usual way.

We also are proud of another activity we did in 2018. We took the \$5000.00 BF Goodrich Outstanding Trail Award we received for Elephant Hill and matched it with \$5000.00 from the MUD Fund. We then partnered with the National Park Service and over a period of a week, Red Rock 4 Wheelers and NPS employees fixed a nasty section on the trail. Because of this repair effort we were able to reduce the trail rating from a 5 to a 4. This fix will allow more people to access the beautiful back country of Canyonlands National Park Needles District.

President's Letter

Welcome Jeepers to our 53rd Annual Jeep Safari!

Hello. It is my pleasure to be president again this year and I want to welcome all of you to Easter Jeep Safari. This year we have made many changes and it will be very important that you read the magazine. Because of some upcoming changes being made to the highway going north from town to the river, we will not be able to stage along the highway. So make sure you read the magazine and know where your trail departs from.

You have showed great interest in the 4WD Skill's Days, so we have added two more training days.

We had a great 4 days of trail repair at Elephant Hill working side by side with the National Parks trails crew. Both parties learned something from each other. It was a great experience for all. We look forward to working with them again. We continue to work on our trails, a never ending job so please respect all our trails.

We appreciate all those who help us to put on this great event. Thank you to all our associate members.

I hope all of you have a wonderful and safe 2019 Easter Jeep Safari.

Safari Trail Supporters

The Red Rock 4 Wheelers (RR4W) offers an opportunity for manufacturers, dealers, retailers, and other interested parties to support, in an exciting and proactive way, the club's Multiple Use Defense (MUD) fund. This fund is used in protecting Moab trails from legal and environmental challenges.

Concept Idea: To allow organizations the opportunity to demonstrate support for organized four wheeling; to expose participants to their organization and products. A Trail Supporter is reserved two vehicle registration slots for the selected trail, and is strongly encouraged to make use of at least one.

Labor Day Safari

Bring your family and join us for the 2019 Labor Day Safari and Camp-out!

If you like to 4-wheel in Moab, a little cooler weather and smaller crowds, then this event offers the things you enjoy. The “Stay Together, Play Together” Labor Day Safari has a little bit of everything and some things the Easter Jeep Safari doesn’t offer because of its size. Trails are limited to 25 vehicles, making them smaller and **the entire event is limited to 150 vehicles.** The event is based at the Moab Rim Campark located at 1900 South Highway 191. This full service campground is at the top of the hill as you leave Moab to the South, and is just a short trip to downtown Moab. It has all of the amenities, including water, showers, picnic tables, trees, grass and no mosquitoes. The entire campground has been reserved for the event, but limited RV and tent spaces are available. But, if you aren’t a camping-type person you can enjoy the great selection of motels that Moab offers.

Your \$150 per vehicle fee includes:

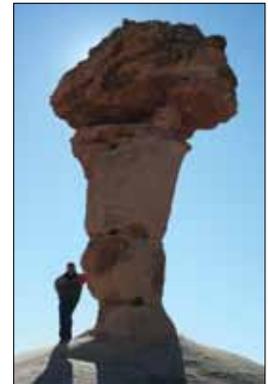

▶ Exclusively paid for participants
– If you get your reservation in early enough, 50% discount on a reserved tent or RV space, 12 cabins are available at varying prices (camping, deluxe and cottage), however, these are not included in the \$150 entrance fee. Reservations for all accommodations are on a “Blue Light Special”, first come, first serve basis. To reserve an RV or tent space, choose the type/size site you require on the checkout page before you click the pay now button when paying your entrance fee (call 1-435-ROCK (7625) if you have questions). To reserve a cabin, call 1-888-599-MOAB (6622). Sorry, once the campground is full you will need to make your camping reservations in one of the other fine camparks in the area at your own expense, see our rr4w.com INFO tab for websites.

Accommodations will be available to you starting Friday afternoon, August 30th to Monday, September 2nd at 11:00AM. Note: you will need to contact the campground at 1-888-599-MOAB (6622) for any days you plan to stay before Friday or after Sunday night.

▶ A hot breakfast served on Saturday & Sunday mornings cooked up by the Masons, starting at 7:00AM. A delicious dinner served Saturday evening at 5:00PM. (Bring your chairs and own beverages.)

▶ A drawing after dinner on Saturday night at the campark.

▶ An Ice Cream Social Sunday night sponsored by iDeal Off-Road and Hard Rock 4X4, time to be announced.

▶ You’ll enjoy sharing stories with other jeepers, the family friendly atmosphere, and more than likely make some great new friends.

▶ Daily trail runs led by fun and knowledgeable Red Rock 4-Wheelers.

Registration for the event will open online on June 5th, 2019. Be sure to let us know: a) how many kids and adults in your party and b) how many breakfasts (for 2 days) & dinner tickets you will need on the checkout page before you click the pay now button when registering on the website.

Once in Moab:

▶ Check in at the campground or your motel.

▶ Pick up your registration packet, meal tickets, drawing tickets, etc. at Registration at the Moab Rim Campark during these times:

- Friday, Aug 31, 3:00 – 7:30PM
- Saturday, Sept 1, 6:30AM – trail departure at 9:00AM & 3:00 – 5:30PM
- Sunday, Sept 2, 6:30AM – trail departure at 9:00AM.

August 31st - September 1, 2 2019

The following trails are scheduled to be run based on registrations and are subject to change. The schedule has been developed with family fun, scenery and short trail days in mind. Each day has a moderate, medium and challenging trail, but not necessarily vehicle damaging trail schedules.

Saturday, August 31

3D (4) (CB23)
7 Mile Rim (4) (CB25)
Backwards Bill (5) (CB16)
Deadman Springs (3) (CB19)
Poison Spider-Where Eagles Dare (7) (CB11)
Steel Bender (6) (CB6)

Sunday, September 1

Buttes & Towers (3) (CB32)
Fins & Things (4) (CB1)
Gold Bar Rim (5) (CB5)
Hell's Revenge (6) (CB12)
Jax Trax (5) (CB36)

Monday, September 2

Copper Ridge (4) (CB13)
Fins & Things (4) (CB1)
Kane Creek (7) (CB7)
Secret Spire (3) (CB27)

The "First Timers", two day package offers the same Officials on both Saturday & Sunday and you'll be running with the same participants both days. This is a very popular package for 4-wheelers new to Moab. (Please note, you can still register for another trail on Monday, if you register for the "First Timers" package).

First Timers Package

Saturday, August 31

Buttes & Towers (3) (CB3)

Sunday, September 1

Cameo Cliffs (3) (CB32)

SPONSOR: If you are interested in Sponsoring the dinner for this event, please contact the Club as soon as possible, no later than two weeks prior to the start date. Call 435-260-1064.

2019 Campout Supporters

Attention Red Rock 4-Wheelers

If you are interested in volunteering for Labor Day Safari and Camp-out, we have many volunteer opportunities in addition to Trail leader and Gunner positions. Please look at the scheduled trails for the event this year and phone at 435-259-ROCK and let us know what trails you are interested in. (You will be contacted after June 16th with your assignments and/or any questions we have). You must have a working CB radio!

Be a Part of Moab Tradition!

The Red Rock 4-Wheelers invite you to become part of an exciting Moab tradition! Worldwide, the Moab, Utah based club is as famous for hosting the annual Easter Jeep Safari as the red rocks are themselves. Since the inception of the event, local volunteers have worked through the year to pull off the largest and most well-known "happening" for recreational four wheeling. They couldn't have done it without the extended family of associate members.

You can be a part of the Moab tradition by joining the Red Rock 4-Wheelers as an **Associate Member!**

Just \$50 for one year, makes you a supporter. You will receive a quarterly newsletter, the annual Easter Jeep Safari magazine, and a RR4W logo decal to proudly display on your 4x4 vehicle. Your membership also allows you to register for Jeep Safari ahead of the general public. A major portion of your membership support is put towards the efforts of the club to maintain the Moab area trails that the world enjoys.

Application for Membership in Red Rock 4-Wheelers.

(PLEASE PRINT - correct information is very important for our mailing list!)

Name _____

Address _____

City _____ State _____ Zip _____

Phone _____ Work Phone _____

e-mail _____

Level of membership:

Associate Member - \$50.00

- Receive special edition quarterly newsletter, the annual Jeep Safari Magazine, and RR4W logo decal.

Gold Member - \$500.00

- Black Red Rock Jacket with name embroidered on front.
-OR- Gold Member Appreciation Plaque with name engraved.
- Size of Jacket _____
- Name on Jacket _____
- OR- Name on Plaque _____
- Receive special edition quarterly newsletter, the annual Jeep Safari Magazine, and RR4W logo decal.

Cut out application form and mail with your check payable to:

Red Rock 4-Wheelers
P.O. Box 832 Moab, Utah 84532
or Register on-line at
www.rr4w.com

This money goes to the MUD Fund (Multiple Use Defense). See page 38 for more complete information.

If you are really dedicated and enthusiastic about helping the club continue its efforts, then the **Gold Member** option may be just the right match. For a \$500 donation, you will receive an exclusive Black Red Rock Jacket with the club emblem on the back and with your name embroidered on the front, OR select the Gold Member appreciation plaque, custom engraved with your name, the name of your club, organization or supporting business. You will also receive the special edition quarterly newsletter and RR4W decal.

For more information on all of the activities the club is involved with year round, visit www.RR4W.com. You can also find unique club items for sale. Stop by registration and say hello, purchase something fun to remember your Easter Jeep Safari experience, or sign up to support the club and truly become a part of the Moab tradition!

Trail NOT being used by Jeep Safari on days indicated.

Jeep Safari Registration 2019

What is involved and How do I register?

Go to the club website www.rr4w.com. Registration is totally on line. Each trail day is \$50.

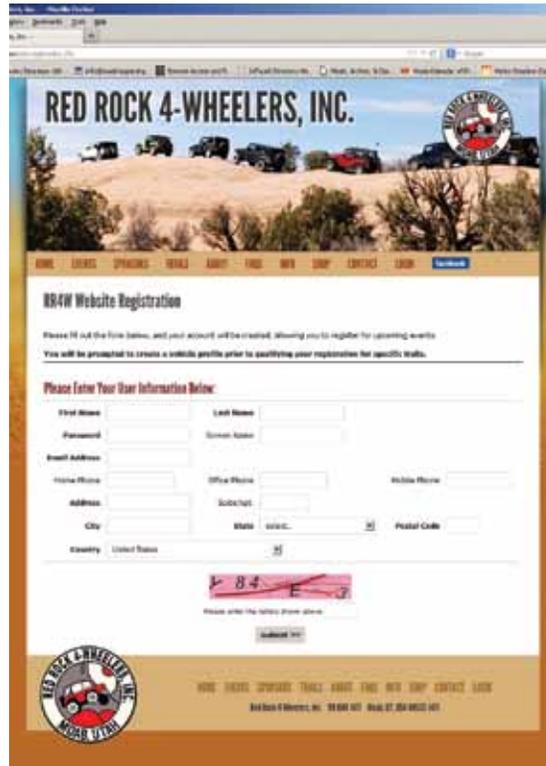

From the Home page navigate to the "About" tab, scroll down to the "Registration" tab. This will take you to the sign-up page. The first page will require the basic set-up information, just like every other website. You will also be required to enter your vehicle specifications. This will qualify you for various trails based on the trail restrictions. This activity can be done at any time but must be done before registering for an event.

You can go to the tab under events labeled 2019 Trail Grid. Click and you will be taken to the planning grid of trails for the 2019 Safari. Click on the PDF version and use this form to plan your Moab adventure.

When registration opens for business on January 22nd, 2019 at 10:00 AM MST, you will be able to access the actual ordering grid. It will look like the PDF planning grid you used for your window shopping. It will also look like the **Trails at a Glance grid** on page 21. You can proceed to enter your trail selection on the grid. Just click on the little dot in each box of the grid for the trail that you want to select. Each grid box will also have a number next to it. This number is the amount of spaces still available for sale. (If you are planning on a group registration, it will be important for all parties to be aware and ordering at the same time.)

Once the inventory number reaches 0, the system will not allow any more sales. The inventory available is reduced when you hit the purchase button. When you have completed your selection(s) you can follow the instructions to proceed to checkout. Checkout will be straight forward and you will be able to make corrections at this level if the screen shot doesn't look right.

Once registered on-line, you will receive immediate confirmation of your registration by return e-mail. **Please print this confirmation and bring to the Old Spanish Trail Arena** to complete your registration. You may also transfer it to your smartphone.

Day of event registration and packet pickup is available at the Spanish Trail Arena in the upper level rooms from 7am to 10am each morning of the event (except Big Saturday and Easter Sunday), and open all day until 8pm on Thursday and 6pm on Friday when the Expo Show & raffle are held at the arena as well.

Old Spanish Trail Arena is located 7 miles south of Moab on the East side of South Highway 191.

Cancellations?

Understanding that things happen, we try to be flexible, but we have to use a system that we can manage and one that discourages careless changes that threaten the plans of others. A cancellation (any or all trails), if received in writing (mailed or e-mailed) prior to April 10th merits a refund of all but a \$15 cancellation fee. Refunds may not be made until after Safari and our treasurer has handled the more pressing Jeep Safari business - please allow up to 4 weeks for processing. ALL fees are forfeited after Safari begins on April 13th.

All participants must check in with the organizers at the Old Spanish Trail Arena during the event to receive the event package which will include, a raffle ticket, a dash plaque, and any required additional information. This check in activity is only required once for the Safari.

Registration at the event may be possible. During EJS, if trail limits have not been met, then these spaces can be available for on-site registration (at the Spanish Trail Arena) on a first-come first-serve basis at the discretion of the organizers. (Some registration will still be available on-line if the trail day has not been closed by Registration officials).

Every day when registration closes for the day, the next days trail's will be closed to new on-line registrations - this allows us to prepare paperwork for Trail Officials for the next day's trail ride. You may still come into the Registration at the Old Spanish Trail Arena area the next morning and register for the trails that day.

What Do Registration Fees Pay For?

A good part of the registration fees go to pay land use fees to the Bureau of Land Management (BLM) for use of public lands and the State of Utah for use of School Trust Lands. Our "Special Use Permit" with the BLM requires a \$5.00 fee for each person/day of use. After the event is over we provide the BLM with the total number of vehicles that registered, the average number of people per vehicle, and the total number of vehicles that ran a trail each day during the event. For 2018, the club paid \$67,431 to the BLM, Utah State Trust Lands, National Park Service, & other government agencies.

Another part of your fees go to postage and related mailing expenses. The cost of printing and mailing registration confirmations and answering inquiries is part of it. We also have a "hot list" of people who have attended one of our events in recent years and those who have expressed interest for future events.

We mail about 9,000 of these magazines every year. Not everyone attends every year, but many like to read and plan for another year. The magazine is designed and published by Canyonlands Advertising Inc. as a for-profit business operation.

The Club provides editorial material and photos and Canyonlands Advertising

Inc. does the hard part – soliciting advertising, planning the layouts and arranging printing & mailing.

The Red Rock 4-Wheelers is intended to be a not-for-profit corporation (but we are not technically

"non-profit" – we pay taxes). Basically, no profits are distributed. Any one event may show a surplus or a deficit. Surpluses may be used for regular club expenses and charitable donations. In 2018, \$26,150 was donated to the following organizations: Moab City Police Department, Grand County

Sheriff's Department, Grand County Search & Rescue, San Juan County Sheriff's Department and Moab Chamber of Commerce. The Club annually supports city and county law enforcement agencies, search and rescue and the hospital in recognition of their extra burdens during our events and the multitude of events in Moab. Additional donations are made based on recommendations of Club members and voted on by the membership.

Registration fees also help fund our MUD (Multiple Use Defense fund). To list just a few things this fund is for - legal fees to defend public use of public lands, archeological survey fees, marking and repair of trails (i.e. moving a 4 ton rock) sharetrails.org and Tread Lightly also receive donations and matching funds.

What are Trail Monitors

Perhaps you have run across some of these folks at the trailheads or trail ends very early or very late in the day. You may have been out on your own or signed up on a Safari trail and passed them on your way into the trail. Even though some of them have rabbit ears they are not to be confused with the Easter Bunny, they are Trail Monitors. They are just trying to help limit damage to trails and perhaps make the day a little more fun and easier on everyone. Have you ever heard the saying “If you’re not with us, you’re against us.” – We don’t believe that, we are all out here to enjoy this beautiful country and the myriad of trails and adventures it offers. But, everyone has a duty to themselves and to others to share the responsibility of not widening existing trails, not making new trails, not running off of existing ones and lessening damage to the countryside whenever possible.

We hope your children and grandchildren will be able to enjoy the land as it was when you first saw it. Have you ever thought what an easy job it is to get

people to go on trails they want to go on? It’s quite a different story when you are trying to keep people off the trails they want to go on – it’s really a challenge. Almost every jeeper who our Trail Monitors have encountered have been very understanding. It really has made our job easier. Thanks to all of you!

We’ll be there again this year and more than likely from now on. The Club has tried to leave days open for you to enjoy during Safari and the Monitors will have a list of alternates you can use for the day. Please note the Exclusive Use and One Way trails section on page 70. Exclusive Use trails include

spin-off trails, such as Where Eagles Dare, off the beginning of Gold Bar or the end of Golden Spike. These trails will be closed on the days that we have scheduled the use of the trail until that trail has exited.

Canyon Country Land Use Guidelines

Each year, millions of visitors enjoy Canyon Country. The impact of so much use is threatening the area's biological and cultural resources. You can help protect this fragile and beautiful land by, following these five minimum-impact practices.

1. Tread lightly when traveling and leave no trace of your camping.

Drive and ride only on roads and trails where such travel is allowed, hike only on established trails, on rock, or in washes. Camp at designated sites or, where allowed, at previously-used sites. Avoid placing tents on top of vegetation and use a camp stove instead of making a campfire. Unless signs indicate otherwise, leave gates open or closed as you find them.

Why it matters Much of this area is a desert where plants are sparse and grow very slowly. Shallow soils erode quickly when vegetation is removed or protective cryptobiotic soil crusts are destroyed. These crusts are a complex of slowly-growing, cyanobacteria, algae, mosses and

lichens that bind the soil together, retain scarce water, and provide a usable source of nitrogen for desert plants. Your tracks do matter: once plants or soil crust are damaged, they may not recover in your lifetime. Wood is a scarce resource that provides wildlife habitat and contributes to nutrient cycling. Gates help protect fragile resources.

How to help Strive to leave no trace of your outing. When driving, riding, and hiking avoid taking short cuts and traveling through cryptobiotic soils. Don't be a trail or campsite "pioneer" who leaves a new path or campsite for others to use. Select an area of bare soil for your tent. Use a camp stove rather than burning firewood. If you must have a fire use a fire pan and bring your own wood. Never cut live or standing trees.

2. Help keep Canyon Country clean.

Pack out your trash and recycle it, clean up after less thoughtful visitors and dispose of human waste properly.

Why it matters Trash, human waste and toilet paper are significant problems that can quickly become health hazards and eyesores. Food scraps and garbage can turn wildlife into problem animals. No one wants to walk or camp where someone has left trash and human waste.

How to help Make it a point to clean up campsites and day use areas during your visit. Take out all trash, including toilet paper and food scraps, and dispose of it properly through recycling centers and landfills. In some areas, campers must use developed campgrounds or utilize portable toilets at designated undeveloped sites. Where special rules don't apply, bury solid human waste in the upper few inches of soil.

3. Protect and conserve scarce desert water sources.

Camp at least 300 feet from isolated water sources to allow for wildlife access. Where possible, carry your own drinking water. Leave potholes undisturbed and wash well away from pools and springs.

You've got a hot Jeep, we've got a cool drink

Nothing Cools You Down On A Hot Day Like A Slurpee®

Canyon Country Land Use Guidelines continued

Why it matters Many desert animals, especially birds, depend on the plants around isolated water sources for food and habitat. Camping near water sources damages plants and prevents wildlife from approaching. Small quantities of pollutants can make springs and ponds unusable for wildlife. Body lotions and vehicle lubricants can remain in the water and harm aquatic life, which in egg or larval form may be invisible to the naked eye.

How to help Camp at least 300 feet from water sources to allow wildlife access. Where feasible, carry all the water you will need for drinking, and personal hygiene. Bathe and wash dishes away from desert water sources. Cool off in the shade, not in springs and potholes. Avoid driving, or riding, through desert water sources.

4. Allow space for wildlife.

When encountering wildlife, maintain your distance and remain quiet. Teach children not to chase or pick up animals. Keep pets under control.

Why it matters Canyon Country has great wildlife viewing opportunities,

including desert bighorn sheep, deer, elk, peregrine falcon, bald eagle, river otter and a variety of small creatures. Harassing or approaching wild animals will cause them to flee, possibly causing injury and definitely using up the vital energy reserves they need for mating, raising young, winter survival, and other activities.

How to help Watch animals from a distance. Where pets are allowed, keep them leashed and under control. Keep quiet in the backcountry; you will see more animals and not frighten them.

5. Leave historic sites, Native American rock art, ruins and artifacts untouched for the future.

Admire rock art from a distance and never touch it. Stay out of ruins, leave artifacts in place, and report violations.

Why it matters Canyon Country has an abundance of archaeological and historic sites, including rock art, historic inscriptions, old mines, cowboy camps, and Indian cliff dwellings. The people who created this legacy are gone. Now,

the physical remains of their occupation are disappearing at an alarming rate. Small actions can add up to major damage. Rock art can be damaged just by touching it. The oil from fingertips speeds erosion by chemically altering ancient painted pigments and the rock itself. Sitting or climbing on rock walls turns ruins into rubble. Walking across middens, the ancient trash heaps below ruins can damage sites. Moving or taking artifacts destroys their scientific value.

How to help Leave all sites and artifacts undisturbed. Remember not to touch rock art or make marks on canyon walls. Leave artifacts in place and stay out of ruins to avoid damaging them. When approaching a cultural site, avoid walking on soft soils to reduce the possibility of erosion. Report vandalism to the nearest local authorities.

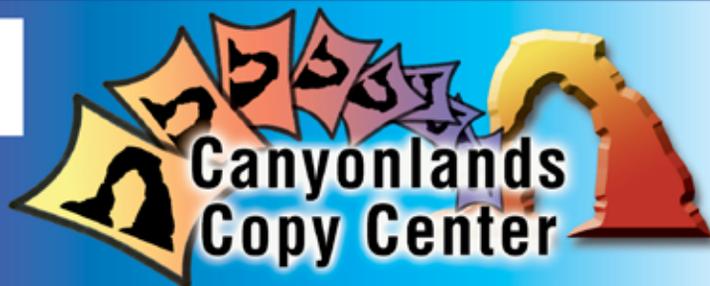

Special Rules In some areas, visitors must follow special rules designed to protect natural and cultural resource values. Ask at agency offices and visitor centers if any special rules apply to the area you plan to visit.

Meet Your Trail Leaders

The Jeep Safari trails will be guided by volunteer members of the Red Rock 4-Wheelers, Inc., a four-wheel drive club based in Moab. Leading the trails was once a Moab responsibility, but we now have trail leaders and “gunners” coming from **25 states** in the U.S., plus Canada and 2 European Countries. In 2019, the following **92 members** will be leading the lines on at least one trail and many will be gunning other trails, as well:

Jeremy & Jessica Abrams- Price, UT
David Adams- St George, UT
Linda Adams- Salt Lake City, UT
Herb Amick- Naples, FL
Richard Anderton & Barbara Joyce -
Larkspur, CO
Justin Andrew -Spanish Fork, UT
Jay & Dana Archibald- Layton, UT
Nena Barlow-CampVerde, AZ
Joe Bovaconti -Avon, CO
James Broadbent, DDS- Las Vegas, NV
Guy & Lynda Brown- Salt Lake City, UT
Maurice Brown- Antioch, CA
Ken & Betty Bunge- Grand Junction, CO
Norm & Pat Burrow- Farmington, NM
Don Campbell- Grand Junction, CO
Ray & Shyanne Carter- Payson, UT
David & Connie Christensen, Warrenville, IL
Travis & Teri Clark- Moab, UT
Jonathan & Stephney Cobia- Mapleton, UT
Torry & Julie Cortez- Farmington, NM
Don & Karen Cravens- Farmington, NM
Larry & Tricia Crist- Moab, UT
Roy & Laura Davidson- Hemet, CA
Brett & Lori Davis- Draper, UT
Matt Davis- Draper, UT
Gene Day & Phyllis Adams- Moab, UT
William & Christine Dean- Olathe, CO
George Demetropolis- Bluffdale, UT
Derek & Michelle Dunsmore- Roosevelt, UT
Tom & Ella Rae Edwards- Moab, UT
John & Peggy Encheff -Irvine, CA
Melissa Fischer- Moab, UT
Peter Fogel- Glade Park, CO
Mark A & Denise Gonske- Castle Rock, CO

Aaron & Silvina Graves- Pleasant Grove, UT
James & Kimbirlee Graves- Farmington, UT
John Hall- Layton, UT
Kevin Hawkins- Murray, UT
Larry Higginson- Murray, UT
Bill Hughes- Grand Junction, CO
Robert Humphreys- Moab, UT
Bart & Janeal Jacobs - Orem, UT
Jake & Joyce Jacobson- Erda, UT
Richard & Jennifer Jenkins- Farmington, NM
K. Casey & Andi Kay- Grand Junction, CO
Michael & Joanne Kelso- Moab, UT
Bob & Shirley Keniston- Edgewood, NM
Curtis & Debra King- Moab, UT
Curtis & Gennie Leonard- Scottsdale, AZ
Daniel W & Susan Lindblad- Omaha, NE
Larry & Sharon Long- Moab, UT
Doug Loyd- Farmington, NM
Scott & Chris Lyon- Moab, UT
John & Terry Marsh- Moab, UT
John Marshall- Moab, UT
John & Carol Martin- Moab, UT
Justin May- Lake Point, UT
Ferris & Jeani McCollum- Montrose, CO
Doug & Carma McElhaney- Moab, UT
Jeramey & Mary McElhaney- Moab, UT
Gil & Willa Meacham- St. George, UT
Dan & Debbie Mick- Moab, UT
Mark Nichols- Moab, UT
Brian & Debi Nish- Orem, UT
Larry & Linda Olsen- Ogden, UT
Dan Park- South Weber, UT
Devon Parson- Moab, UT
Marlene Parson- Moab, UT
Roger & Dawn Peck- Magna, UT

Thomas & Susie Powell- Springtown, TX
Doug Ramsey- Cortez, CO
Perry & Leila Reed- Montrose, CO
PJ & Kristin Roubinet- Clearfield, UT
Jeremy & Heidi Rowan- Moab, UT
Dave Shannon- Durango, CO
Marlin & Julia Sharp- Lindon, UT
Jeff Stevens- Moab, UT
Susan Stevens- Moab, UT
Paul & Michelle Sutor- Salt Lake City, UT
Dave & Debbie Swafford- La sal, UT
Neal Teeples- Rock Springs, WY
Dieter Thoeny- Schaan, Liechtenstein
Don & Christine Voss- Papillion, NE
Ed & Penny Weber- Moses Lake, WA
Rich & Marilyn Weigand- Goodland, KS
Perry & Linda Willard- Ogden, UT
Justin & Becky Williams- Lehi, UT
Rick & Eileen Wolcott- Castle Valley, UT
K.L & Erin Young- Moab, UT

Trail Helpers

Debra Abrams - Elmo, UT

Luke Darling - Los Gatos, CA
George Dewess - Farmington, NM
Harleyanne Demetropolis - Kearns, UT

More Trail Helpers

The leaders wear the big smiles, but much of the work is done by the other helpers, sometimes called “tailgunners” and “waistgunners” They are in some ways the most important Red Rock 4-Wheelers on the trails -- the ones we depend on for taking care of breakdowns or getting help in case of emergency. The following **178** are likely to be seen with OFFICIAL flags sometime during the event.

Michael & Debbie Dosen - Federick, CO
Cathy Dumolt - Eagle, CO
Bob & Tana Dunsmore - Roosevelt, UT
Troy Dunsmore - Vernal, UT
Michael & Melina Ehlers - Whitewater, CO
Larry Ellertson - Lindon, UT

“The MUD Fund”

The Red Rock 4-Wheelers try to reserve a little strength to keep our recreational trails open. To that end, Red Rock 4-Wheelers have been setting aside some funds for emergency use. We call it the **Multiple-Use Defense (MUD) Fund**. Often, people who have had to cancel registrations have told us to apply it to efforts to keep the trails open. Those amounts have gone to the **MUD Fund**. Sometimes people have been unsure of dues or fees and directed us to use the excess for this purpose.

When trail access or other multiple uses of the public lands are threatened, it is safe to say that the most important defense need is someone’s time and effort. It takes dedicated personal effort just to plan how to spend available money — but the money is almost always needed. The most serious threats are likely to call for professional services, probably legal counsel and actions.

To this end Red Rock 4-Wheelers pursued a lengthy legal action against the

State of Utah Institutional Trust Lands Division and some private individuals that purchased a parcel of State Trust lands. This issue was caused by the failure of the State Lands Agency to recognize a traditional right of way and pass title to the buyers with a clear title.

What started out as selling **MUD** pins at registration, has now become a major fund-raising effort. The Red Rock 4 Wheelers have received a number of contributions by other four wheel drive clubs and many of our vendors at the Safari Trade Show give us sizeable donations. One of BF Goodrich’s Outstanding Trails Awards, which came with a significant donation, was put into the **MUD Fund**.

This major effort resulted in influencing the local BLM to leave all of the Safari trails open for the foreseeable future. A few very minor segments of trails that the Red Rock 4-Wheelers acknowledged were just two ways to reach the same point were closed, but

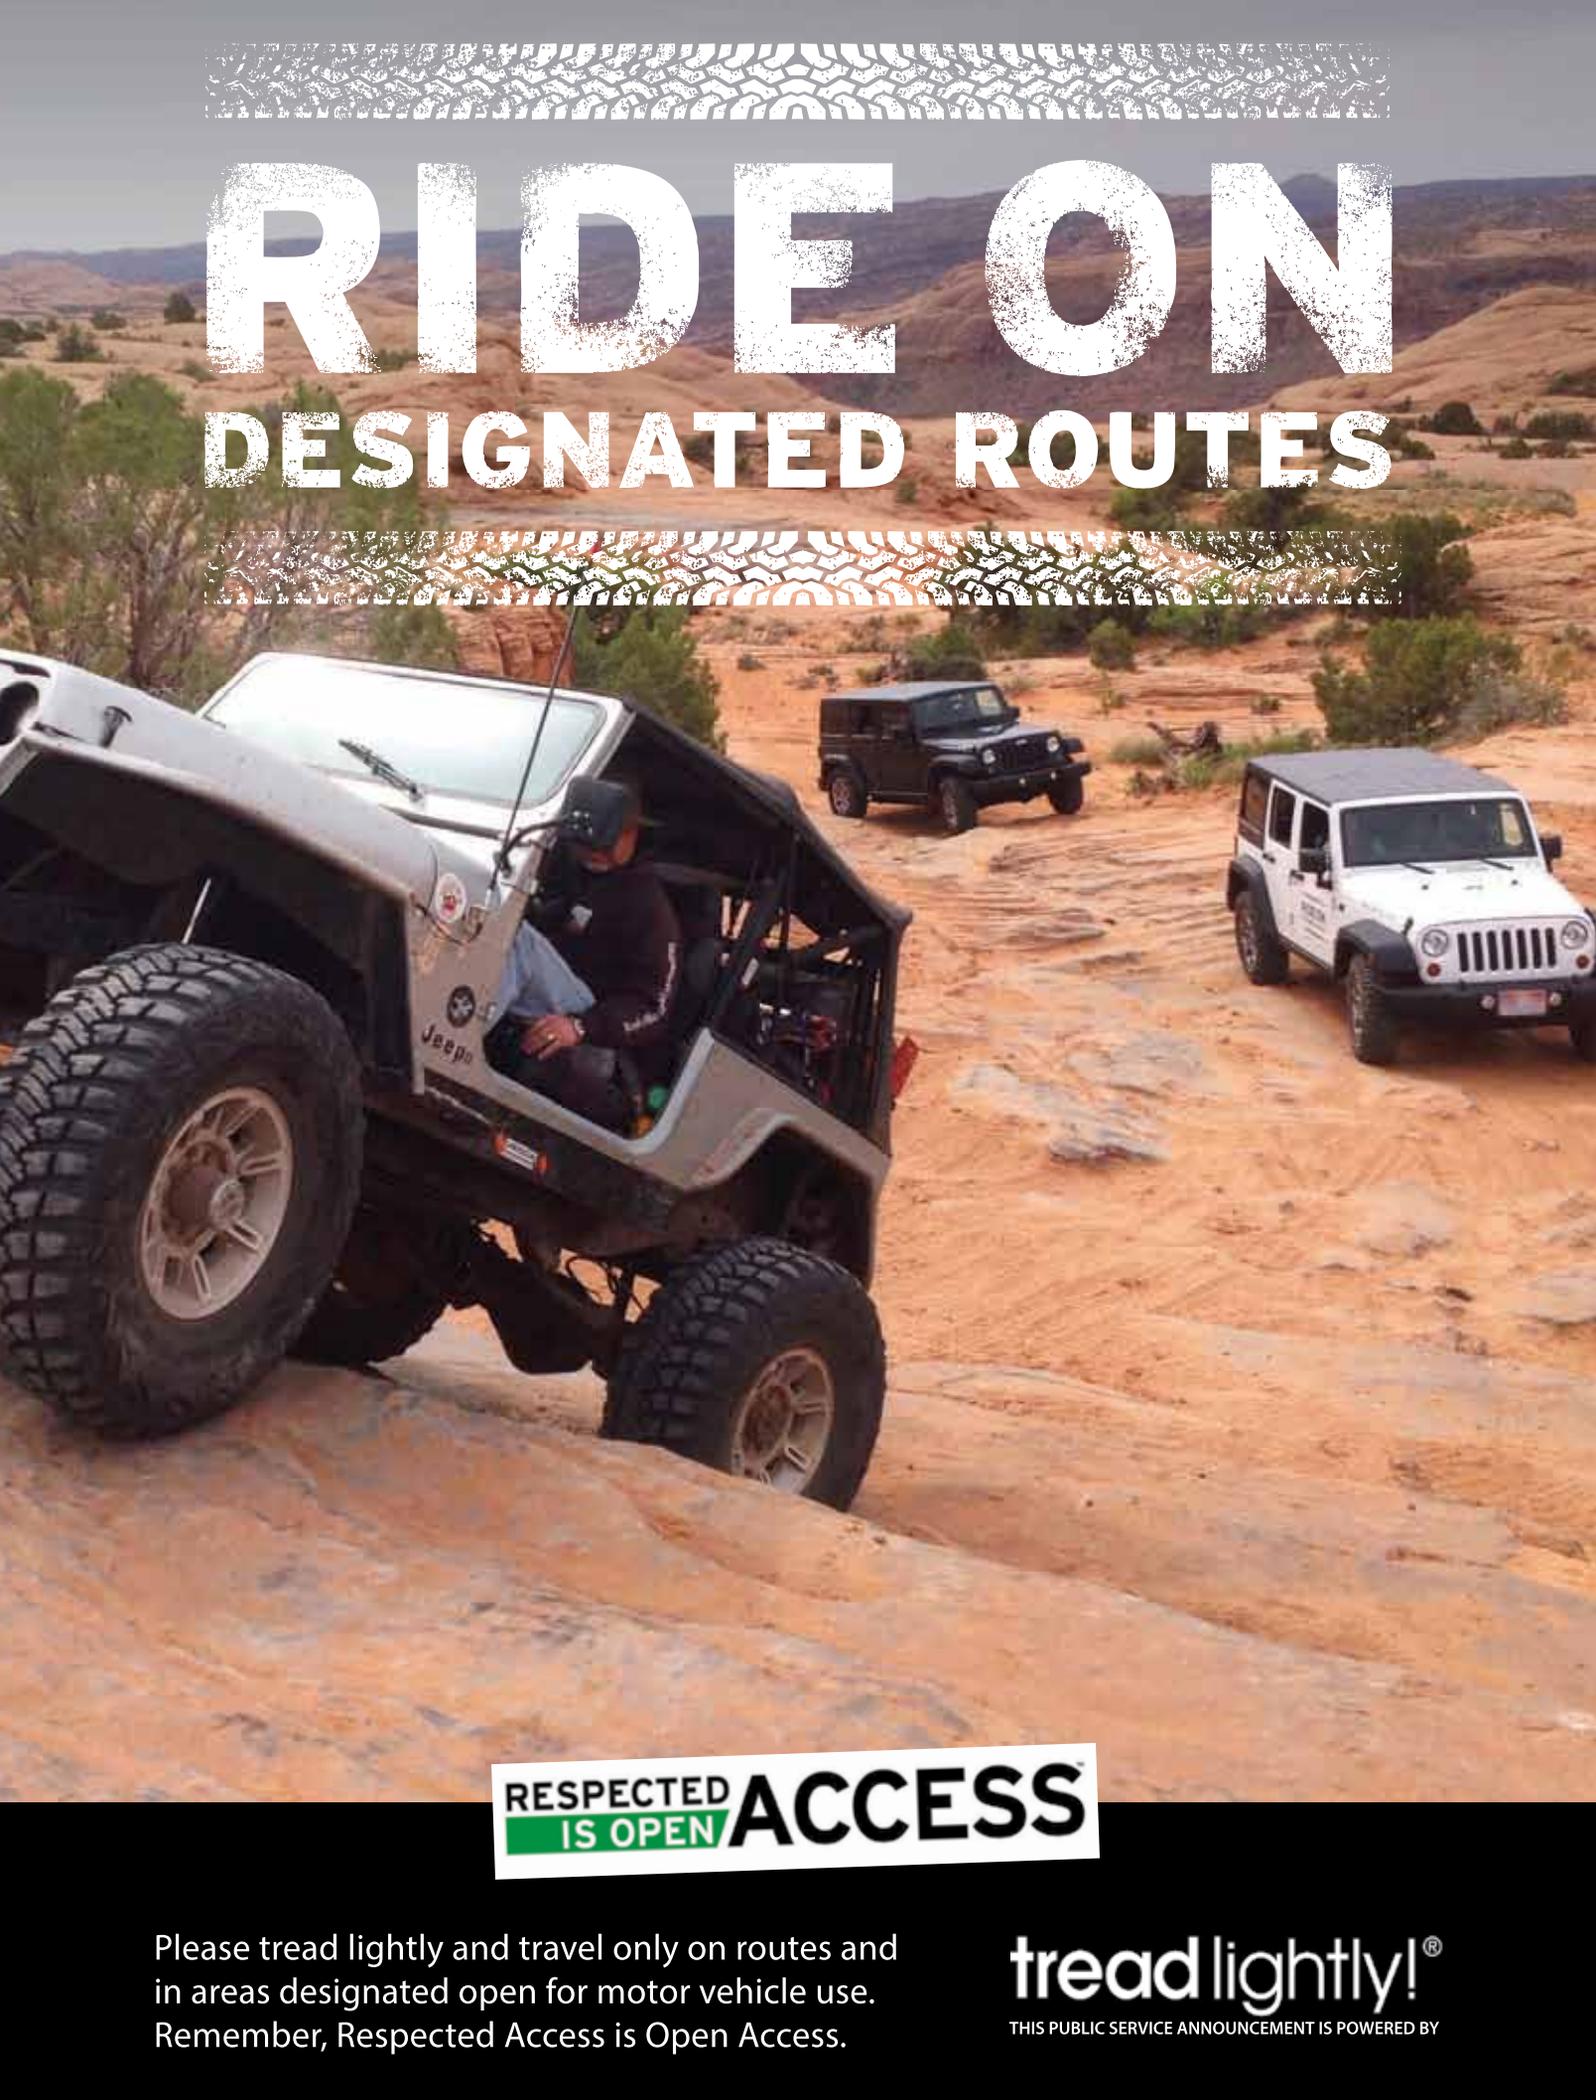

it was felt that these minor losses were more than offset by the gains that we made.

The Red Rock 4-Wheelers are committed to defend the Jeep Safari trails for all of our loyal supporters to enjoy, but we need your help.

This help can be both financial and/or by writing your respective state and national legislators when there are land use issues.

A promotional graphic for "Moab Happenings" is set against a background of a desert canyon with red rock walls. The text "Moab Happenings" is written in a large, white, stylized font at the top. Below it, "on line at" is written in blue, and "www.moabhappenings.com" is written in a larger blue font. A yellow ampersand "&" is centered below the website address. At the bottom, "in racks all over town!" is written in a yellow, bold font. On the right side, there is a stack of three "Moab Happenings" magazines. The top magazine is for "APRIL 2009" and features a "FREE COPY" sticker. The cover of the magazine shows a line of off-road vehicles, including a red Jeep, driving on a dirt trail. The website "www.moabhappenings.com" is printed at the bottom of the magazine cover.

The hope was that people would ask questions, look at the slide show we had, and maybe end up with a better experience at our event. We have expanded on that small start.

We have received glowing reports about the trail package program

and are continuing the program in 2019. The "First Timers" package will be continued with a slight adjustment in the trails offered because of a rating change on one of the trails. The second package, "The Sophomore" will be continued with slight changes. In 2016, we added a "Junior Package," to continue our educational slant to the program. We don't envision a senior package, as we feel that after three years, you should be able to choose your own trails.

The same trail officials will be used all three days, so you will become familiar with them. We want to emphasize that this is not intended to be a lesson in how to drive your 4x4. We expect participants to have knowledge of their vehicle and the basics of how to operate it on 4x4 trails. Our officials may offer tips at times on surmounting obstacles unique to the Moab area (which we encourage all our officials to do) but they are not there to conduct a "Jeeping 101" class. Remember, scenery will be the emphasis of this package; call it a four wheel drive tourist experience.

Each package is designed to provide variety of scenery. Each package is scheduled to become progressively more challenging each day to increase your four wheeling comfort zone. To complete the Red Rock 4 Wheelers packages, you will have spent 3 years at Safari and seen an amazing variety of scenery and moved from easy to moderate trails, under the guidance of our dedicated volunteer leaders and helpers.

The Red Rock 4-Wheelers have received a fair amount of comments concerning Easter Jeep Safari attendees ending up with trail choices that were more than they expected as to four wheeling, and less than they expected in the time allowed to enjoy the scenery in our area. We further noted that close to 30% of participants are here for the first time. Recently we began efforts to offer walk-in registration a little removed from the busy registration desk.

First Timer's Package

Roger & Dawn Peck, Leaders

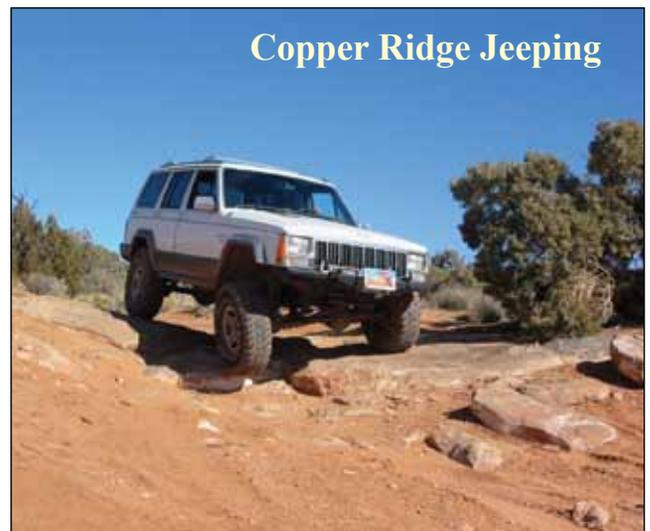

The Safari First Timer's Package is going to feature three scenic trails, each going to a different area near Moab. All are regular Jeep Safari trails. The package will start day 1 (Sunday, April 14th) with

The Secret Spire

the easiest trail, and each day after will feature a trail a bit more difficult than the prior day's offering. We will start the package with the **Chicken Corners Trail**, rated 2. *(For complete description of trail see page 74)* Day two April 15th will feature the **Secret Spire Trail**, a 3 rated trail that is slightly more challenging than Chicken Corners. Located on a totally different plateau northwest of Moab *(For complete description see page 88)* The third day will feature the **Copper Ridge Trail**, rated 4. Copper Ridge will take you to the northeast, close to the boundaries of Arches National Park. *(For complete description see page 92)* The package is priced the same as any three day selection

Copper Ridge Jeeping

of safari trails; the difference will be four wheeling with the same fellow jeeps and officials each day.

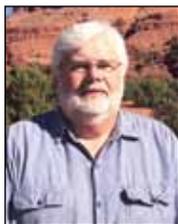

NOTE: Please make sure you have a CB radio in good working order to get the maximum benefit from this package.

Packages

7 Mile Rim Jeeping

Sophomore Package

Rick Wolcott, Leader

We've designed this package of three trails to be a step up from the First Timer's Package we began offering. The idea is the same - three

trips over three days, difficulty level increasing a bit each day, different areas for different scenery every day, and the same companions and trail officials throughout. If you did the First Timer's last year, and want to step up, here you are! If you are new to this concept, yet want an intermediate experience at Easter Jeep Safari without the hassle of planning your different trail days, well, here you go!

This package will start with our **Deadman's Point Trail** (Rated 3) for its first day (Tuesday, April 16th). *(For complete description of the trail see*

page 82). Day two features the **Sevenmile Rim Trail** (Rated 4) (Wednesday, April 17th). *(For complete description of the trail see page*

108). The first half of this trail will allow you to get a bird's eye view of the Copper Ridge Trail's beginning section, all the while offering more and different 4wd challenges.

The second half moves away from the rim of Sevenmile and into Courthouse Pasture for additional 4 wheeling fun and abundant scenery as well. Day three features the **Fins & Things** trip (Rated 4) (Thursday, April 18th), a slick rock jeeper's

delight! *(For complete description of this trail see page 102).* This trip is close to town and introduces jeepers to the fantastic traction slickrock fins and domes offer. Boy, and talk about scenery! The La Sal Mountains form a nearby backdrop for many of your slickrock adventure pictures. Just be careful to keep your eyes on the trail because your passengers are going to be marveling over the views.

Junior Package

Jake & Joyce Jacobson, Leaders

Here is the final edition of our Red Rock 4 Wheelers college of 4 wheeling. You have progressed from a complete novice, to a confirmed wheeler. You are now ready to take your final exams before you move on to pick your own trails. During your first year you did trails rated at 2, 3 & 4. For your sophomore year, you were advanced to trails rated at 3, 4 & 4.

You are now about to move up to trails rated at 4, 5 & 5.

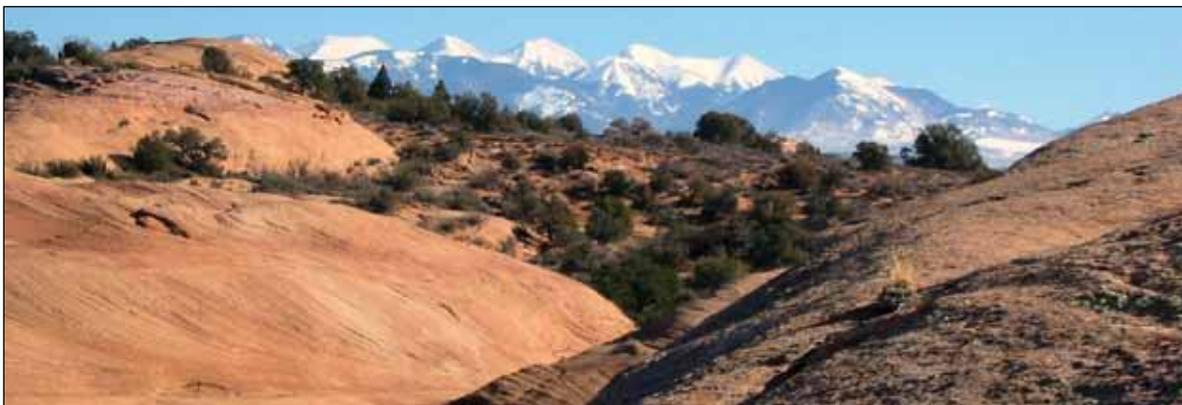

You will start your adventure on the **3D trail**. This trail was part of the original first timers package, but wear and tear on the trail has moved its rating up to a 4. This trail is scheduled for Tuesday, April 16th. *(For complete description, see page 90).*

Your next chapter of your adventure takes place on Wednesday, April 17th and will travel south of Moab to the Behind The Rocks trail. This trail has been part of the Safari almost from the beginning. The

regular Behind the Rocks Trail is rated as a 7, but you will be treated to what we call **Tip Toe Behind the Rocks**, which is rated as a 5. *(For complete description, see page 112).*

For your final exam you are being treated to one of our newest trails, **Jax Trax**. This 5 rated trail was introduced to Safari in 2014 and has become very popular. *(For complete description, see page 120).*

An additional opportunity may happen on your trails. Many of our trails are sponsored by major aftermarket manufacturers, and they may be riding along with you during the day. They participate in the sponsor program to interact with the public, and they often giveaway some interesting goodies.

Sevemile Rim (4) - (Neal Teeple) meet at large parking lot 1/4 mile past Hwy 313. **CB-25**

Vehicle Safety Equipment

Everybody hates rules. We hate to make them and we hate to enforce them, but safety is essential to keeping the fun in the Jeep Safari.

the county. There is some common-sense equipment that should be in every off-highway vehicle — probably in every other vehicle, as well.

Recommendation: We recommend that each vehicle carry a fire extinguisher (yes, we've had them catch fire on the trails), a first aid kit, a tow strap, a spare tire, and a jack.

Finally, please see that all passengers in your vehicle are using seat belts. Anyone who says he "wants to be able to jump if it rolls" is whistling in the dark; you are much better off inside the vehicle than under it.

The system we are using is to set a couple of basic rules and to ask you to certify that you are following them by your signature on the waiver form. Beyond the rules, we have some common-sense recommendations that we hope you will heed.

RULE 1: A vehicle must have an integral metal top or roll bar to participate in Jeep Safari. Vehicle manufacturers' stock equipment will satisfy this requirement.

RULE 2: Vehicles must have safety equipment adequate for legal operation on Utah highways. We mean seat belts, and we urge everyone to use them. Having proper brakes, lights, etc. is implied in this rule and should go without saying.

When you sign the waiver form, please note that the "fine print" says that you are certifying that your vehicle meets these rules.

Remember that these trails are not very convenient to the emergency services of

Tire Pressure:

It's important to have the proper inflation pressure in your tires, as under inflation can lead to tire failure. The "right amount" of inflation for your tires is specified by the vehicle manufacturer and is shown on either the vehicle door edge, door post, glove box door or fuel door. It is also listed in the vehicle owner's manual.

- Check inflation pressure at least once a month and before long trips.
- Check tires when cool. After driving, tires need at least 3 hours to cool.
- Remember to check the spare.
- Visually inspect the tires to make sure there are no nails or other objects embedded that could poke a hole in the tire and cause an air leak. Check the sidewalls to make sure there are no gouges, cuts, bulges or other irregularities.
- Tire inflation pressure increases (in warm weather) or decreases (in cold weather) 1-2 pounds for every 10 degrees of temperature change.

Want To Be A Trail Official?

The Red Rock 4-Wheelers obviously need a lot of help to put on the Easter Jeep Safari (and Labor Day Campout). How does an interested person advance to become a trail official? We really want people who are familiar with our events, so having been a registered participant at two events (Safari or Campout) within the most recent 3 years becomes the first requirement. One must also be a club member; local voting members are the obvious first choice since they are usually available to learn the intricacies of the trails. However, Associate members are also eligible. If you are interested in becoming an associate member, see more details on page 18.

• **Show up for the trails you will be an official on.** Usually 45 minutes early is about right. Registration lists must be verified against the vehicles in attendance, liability releases distributed and collected, and participant's

questions answered. (Notify the registration desk ASAP if you break or are unable to fulfill your responsibilities. The sooner the Club is notified the better chance there is to find a replacement for you.)

• **Officials are expected to know how to get from one end of the trail to the other.** A good official advises and guides his or her charges; helping drivers pick the proper line for an obstacle allows you, as an official, to share your experience with newcomers. Use the CB. Passing on local items of interest, scenic

views, or notes on trail conditions helps keep the CB channel clear for use as well as making the trail more interesting for participants.

• **Enforce Club, BLM and safety rules for proper trail etiquette.**

Being a trail official has many responsibilities with few privileges. Note that having an "official" flag on your vehicle does not entitle you to join a trail you have not registered for. Officials have already been given priority for trails on their free days; they will not be allowed to abuse these privileges.

If you have made it this far, you are probably asking yourself - What is the upside of this "official" business? The answer is not much unless you love four wheeling, lots of great scenery and a large group of new friends with common interests. As a working official, you will receive an invitation to the Safari workers party, held during Easter Safari. This family-oriented party is an opportunity for all of the workers to get together and socialize.

As a working official you receive a t-shirt for you from the club. These t-shirts are produced by the T-Shirt Shop in Moab to your specifications. You will also receive a modest stipend for fuel, which many of our regular officials donate back to the club's MUD Fund. If you survive three years of being an official, you will receive a club jacket with all of the club trimmings: patches, name, etc in your 4th year.

Newcomers are usually scheduled as "gunners" (assistants) on trails so experienced club members can gauge their performance against the criteria listed below.

What Is Expected of Trail Officials?

• **Attendance at the trail official Safety Meeting at the Spanish Trail Arena.**

This meeting allows Club officers and local officials to pass on important information that concerns the running of Jeep Safari. Contact phone numbers, club updates on trails and procedures, law enforcement plans, and how Safari officials can get help on the trails; all these are covered at this meeting.

Help Share the Tread Lightly! Ethic At EJS 2019

Since 2013, Tread Lightly! has hosted a total of 10 stewardship projects in Moab during Easter Jeep Safari and other offroading event. These project have brought in over 200 offroad enthusiast volunteers to improve, enhance and clean up over 60 miles of trails in Moab.

It goes without saying that the participants and organizers of Easter Jeep Safari embrace the Tread Lightly! ethic. As you prepare for your next trail ride, let us remind you of the T.R.E.A.D. principles:

- Travel Responsibly on land by staying on designated roads, trails and area. Go over, not around, obstacles to avoid widening the trails. Cross streams only at designated fords. when possible, avoid wet, muddy trails.
- Respect the Rights of Others including private property owners, all recreational trail users, campers and others so they can enjoy their recreational activities undisturbed. Leave gates as you found them. Yield right of way to those passing you or going uphill.
- Educate Yourself prior to your trip by obtaining travel maps and regulations from public agencies. Plan for your trip, take recreation skills classes and know how to operate your equipment safely.
- Avoid Sensitive Areas on land such as meadows, lake shores, wetlands and streams. Stay on designated routes. This protects wildlife habitats and sensitive soils from damage. Don't disturb historical, archeological or paleontological sites.
- Do Your Part by modeling appropriate behavior, leaving the area better than you found it, properly disposing of waste, minimizing the use of fire, avoiding the spread of invasive species and repairing degraded areas.

Want to learn more? Throughout the event Tread Lightly! staff will also be highlighting the message RIDE ON Designated Routes in Utah to help the public understand appropriate and legal use of motorized vehicles. Come by the Tread Lightly! booth at the Spanish Trails Arena for more information.

Through education, outreach and stewardship, Tread Lightly!, volunteers, and partners in the four-wheeling community are working to protect offroad trail access and to ensure that we can continue to enjoy these activities in the future.

To learn more about Tread Lightly!'s work and upcoming projects, go to www.treadlightly.org.

About Tread Lightly!

Tread Lightly! is a national nonprofit organization with a mission to promote responsible recreation through ethics education and stewardship programs. Tread Lightly!'s educational message, along with its unique training and restoration initiatives are strategically designed to instill an ethic of responsibility in outdoor enthusiasts and the industries that serve them. The program is long-term in scope with a goal to balance the needs of the people who enjoy outdoor recreation with our need to maintain a healthy environment. Tread Lightly!'s award-winning materials, programs and services are solutions to some of the nation's most pressing recreation issues. Individuals and businesses can commit to Tread Lightly! and protect outdoor access by becoming a member at www.treadlightly.org.

Give-Away!!**

Product Displays

The Easter Jeep Safari gathering of four-wheelers becomes a magnet for people who would like to sell something. Where the Red Rock 4-Wheelers use a large arena for registration, there is considerable room for displays by manufacturers and sales organizations, both large and small. The demand for this display space has grown to the point that there is a waiting list to get in.

The product displays have been limited to items of interest to "the 4-wheel crowd," but some spaces have been donated to worthy causes that are directly related to Easter Jeep Safari activities.

As in recent years, there will be indoor and outdoor displays of 4-wheel-drive products on **Thursday, April 18, and Friday, April 19**. These vendors have rented their space, and many have contributed products to a giveaway drawing on Friday evening, April 19. Every registered vehicle in the Jeep Safari receives a ticket to this giveaway (Your ticket will be in your registration packet).

In order to make the prize drawing move along quickly, we require that the giveaway prizes be substantial in value,

but the vendors have been so generous that the drawings usually go on well into the evening. The drawing requires the ticket holder to be in attendance and the drawings have been popular enough to create real traffic jams near the Arena, so please be patient with parking and traffic control officials.

If you are interested in being a vendor at this unique show contact Carma at 435-259-1916 or rr4wvending@yahoo.com

Boy Scout BBQ

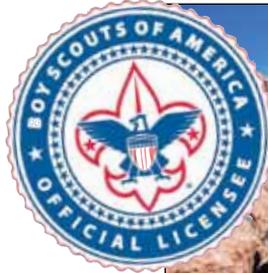

The local Boy Scouts of America troops from Moab WILL put on a BBQ dinner on **Thursday evening** of the Easter Jeep Safari. This dinner is held in the Spanish Trail Arena on Thursday, April 18th, evening during the Expo. This annual Expo features over 200 vendors from all over the US displaying the latest in 4x4 parts and accessories. Plan your Thursday evening to attend the Expo and eat with the Boy Scouts. This is the sole money raiser for the local Boy Scout Troops. When unable to attend the BBQ Dinner, it is nice to make a donation to the Scouting movement.

All proceeds go to the local Scout Troops, and pay for all the Scouts summer camp at Blue Mountain Scout Camp. The boys are also awarded prizes for the number of tickets that they sell.

The meal includes a BBQ Sandwich, baked potato with sour cream and butter, salad, and a cold soda. The Scouts set up two cafeteria style lines to serve quickly and efficiently. The meat is prepared in the kitchen of a local rafting company,

and delivered to the Spanish Trail Arena prior to the dinner. Scout parents will wrap in tinfoil and bake approximately 2,000 potatoes for the dinner. Scout leadership divides the duties between the local troops. Some troops will clean the pots and pans, finishing close to midnight. Others will man the food lines and serve close to 2,000 participants.

All of the Expo participants at the show will be served by the Scouts in their booths. The Scouts will always be in uniform while selling tickets and serving on the food line. The local Moab Scouts invite all to attend and appreciate the support given by the Red Rock 4-Wheelers and those who participate in the annual Easter Jeep Safari.

**BBQ dinner
on Thursday Night**

This is a large advertisement for suspension services. It features a central image of a dark-colored Jeep Wrangler with a heavy-duty front bumper and a roof rack, driving on a rocky, off-road trail. The Jeep has "BDS SUSPENSION" written on the hood. Surrounding the Jeep are several logos for suspension brands: "JACK-IT" with a red and black logo and the website "WWW.JACKIT.COM"; "SKYJACKER"; "FOX" with a blue and white logo; "BDS SUSPENSION" with a skull logo; "FABTECH"; "TERRAFLEX"; "PRO COMP"; and "ROUGH COUNTRY". The text "Call the Suspension Experts!" is written in a large, stylized font across the middle. At the top left, the phone number "1-888-452-2548" is displayed. The background shows a scenic view of a valley with mountains in the distance.

BIG BORE XD

SOLVE YOUR WRANGLER JK STEERING PROBLEMS

The all NEW **BIG BORE XD Cylinder Assist Kit** for the 2007-2018 Jeep® JK. PSC has developed the ultimate steering package for 40-in. and up tires, combining all of the top of the line components we offer for the Jeep Wrangler JK.

- BIG BORE XDR Cylinder Assist Steering Gear...85MM Piston, 45MM Sector Shaft
- Remote Reservoir Anti-Splash Valve with 6 psi Relief...Keeps fluid where it needs to be
- High-Pressure Hose Conversion Kit...Less restriction for higher volume pump
- Svepcu Power Steering Fluid...Lubium Additive for less aeration
- 3.6 Pentastar XD Pump Kit 1800 PSI...50-Percent more volume
- Pre-Made Cylinder Hose Kit...Easy installation
- 1/2-in. Return Line Cooler Conversion

NEW

Eco 4Wheeling

“Eco” has become a “buzz” prefix. It is related to ecology, the science of relating living things to their surroundings. If it has to do with the environment, it must be good! So, why not “eco4wheeling.” Most of us four-wheel for the sake of reaching places that are delightful to visit. Some difficulty along the way adds exhilaration to the experience. Most people don’t need lectures to understand the importance of preserving the places we go to see. Indiscriminate vehicle tracks are the worst violations; they represent theft of beauty for selfish or malicious reasons, and they take a long time to heal. Trash is bad, but we can deal with that, and we do.

On the other hand, some of us are in the sport mostly for the challenge. We need to remember that access to the challenging roads will be available only if we don’t wreck the place. If there is no problem, there is no need to make rules to solve the problem. We are seeing many examples of problems, however, and rules are springing up to correct them. The simplest way for managers to alleviate over-use and abuse

of the lands is to limit or close access. We can argue that such a method keeps out the good guys, too, but this easy way has the vigorous support of others who think the only “good guys” are themselves.

Land-use planning (and criticism of land-use planning) is very active these days. The older RMP for the Moab District was developed in the early ‘80’s and officially signed in 1985. The plan did not anticipate the increase in the number of users, especially in the form of mountain bicycles and ATV’s. The unexpected users are not only traveling on the land, but many of them are new campers, which is worse in terms of new tracks, damaged vegetation, and deposition of human waste

and trash. Special measures have already been taken locally to correct the most immediate problems — the Colorado Riverway and Sand Flats. Recently, other emergency actions have been employed to regulate camping in heavily used areas and in restricting motorized travel to existing roads and trails in many areas. The newest RMP implementation of November 1, 2008 is very specific about land management. Roads that are designated as open and those that are closed.

The most important way we can help keep the restrictions to a minimum is to keep our tracks on the roads. A special problem is lunch stops; it is possible to visit with one’s buddies without parking side-by-side. During Jeep Safari, your trail leaders will be reminding you to stay on the trail & limit tracks. Be especially careful with your camping etiquette. The BLM has a small brochure that suggests proper procedures available at the Moab Information Center (MIC).

A large advertisement for JBA Offroad. At the top center is a stylized illustration of a red and black Jeep with a "JBA" logo on the front and "JBAoffroad.com" on the hood. The Jeep is framed by a gold and red border. Surrounding the Jeep are labels for various vehicle brands: "Jeep" at the top left, "Toyota" at the top right, "Chevy" on the left side, "Ford" on the right side, "Ram" at the bottom left, and "GMC" at the bottom right. Below the Jeep illustration is a black banner with the text "YOUR INDEPENDENT SUSPENSION SPECIALIST" in gold. At the bottom of the advertisement is a large, stylized "JBA" logo in gold and red. On the far left and right sides, there are vertical labels: "Upper Control Arms" on the left and "Lift Kits" on the right.

BUILT FOR LIFE OFF ROAD

WARN ELITE FRONT BUMPER FOR THE JEEP WRANGLER

Whether you're on the trail, on an overland expedition, or just looking for a sturdy place for your WARN winch, the WARN® Elite™ Front Bumper is what you'll want on the front of your Wrangler JK or JL. These bumpers have advanced bumper geometry for increased approach angles, a grille guard tube for extra vehicle and winch protection, an optional lower skid cover for shielding your vehicle's critical components, and integrated off-road jack points for easy field repairs.

Designed, engineered, and made in the USA, the WARN Elite Front Bumper offers the features Wrangler owners need with a great new style that's perfect for the life off road.

Working together works!

Common Thread: From Chaos to Family Friendly Tranquility.

by Sara Melnicoff

Moab Solutions is a very small, unique non-profit organization that has been doing ecological restoration work, recycling advocacy—and helping indigent people—in the Moab area since 2004. While Potato Salad Hill is not a Jeep Safari route, it is well used by many enthusiasts.

The first time I became aware of the yearly gathering at Potato Salad Hill (PSH) it was the glint of littered glass that caught my eye from across the creek. My friend and I crossed the water to investigate and were shocked to find hundreds of littered cans and glass bottles, along with plenty of trash! We grabbed some bags and started removing the recycling and trash right away.

Common Thread/Operation Cooperation was born.

The early morning light at Potato Salad Hill is simply gorgeous – it bathes the rocks with a warm glow. It gently

John and Ryan looking for litter on Potato Salad Hill

illuminates the land as volunteers arrive to check for littered trash and recycling, rake out any off-trail tracks, and make sure that the rocks outlining the road are in place. We have been doing this since 2004.

What a contrast from the early days – when there was no fencing to keep

vehicles off the land - where camps sprang up everywhere and the trash bloomed like flowers. Trees, native plants, and soils were destroyed, and the activity on the hill was often fueled as much by drugs and alcohol as gasoline.

In 2005 the Times-Independent did a story about the cleanups Moab Solutions was doing and the recycling station they installed. Jeff Knoll, an avid rock climber and hiker, saw a photo in the paper showing some of the trash we collected, and was saddened to see so much litter. He contacted me, to suggest that we team up – off roaders and environmentalists, working together to keep the land protected. An amazing collaboration was born - one that continues to this day. The benefits of that partnership surpassed our wildest hopes and dreams.

Jeff encouraged the off-road community to get involved, and they did, in a big way. From raising money for infrastructure, to encouraging volunteers to join us for early morning cleanups, things really started to change. Over the years, land managers fenced much of the land on the road to the “hill”, large boulders were placed strategically to protect land and the Sheriff ordered that the area must be cleared every evening until the next morning, during the Easter weekend happenings. No more camping. Things are a lot calmer nowadays.

This year, as in the recent past, visitors to PSH, which is busiest during Easter weekend, will find a recycle station, a dumpster, and porta-potties, as well as staff from Moab Solutions, walking through the crowds offering to collect people’s trash and recycling, hosting a display of the beautiful native plants found in the area, and offering a product giveaway. Past giveaways have included reusable and durable tote bags and pocket ashtrays.

Rim Tours has been offering a discounted shuttle service to Moab Solutions for the past three years. The shuttle is free to users, carrying them from a close-by parking area up to PSH. Two shuttles run

continuously during the busiest times.

The Grand County Sheriff’s Office works closely with Moab Solutions, as they seek to protect the land in this fragile desert environment. The results have been inspiring, as native plants are recovering and self-seeding. The fencing, raking, and cleanups have been very helpful in this recovery, but perhaps one of the least visible and most wonderfully positive results of Common Thread has been the great partnership between the off-road community and environmental groups. The common thread exists!

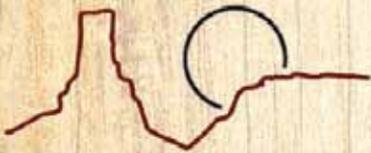

If you want to volunteer for a cleanup or learn more about Common Thread, please contact Moab Solutions at moab_solutions@hotmail.com or visit their website at www.moab-solutions.org.

WHAT'S LEGAL IN UTAH?

No, we aren't talking number of wives or lack of wine in grocery stores! In your registration process you will sign a release acknowledging that you realize your vehicle is in compliance with Utah laws for street legal vehicles. Are you curious about those requirements? You should be!! The entire safety inspection handbook can be viewed online at:

highwaypatrol.utah.gov/safetyinspection/safety-inspection-quick-downloads/. Then select passenger car and light truck manual under "downloads". We are including a summary of the section of the manual pertaining to suspension alterations here, since that is where most people have trouble with the law. Forewarned is forearmed. Some local "buggy" type conversions go to elaborate lengths to remain legal yet trail ready.

Lifted or Lowered Vehicles

A. Lifted Vehicles:

1. Check that fenders cover full width of tire.
2. Check for mud flaps. (Must cover full width and top 50% of tire).
3. Check frame height. (Based on Gross Vehicle Weight Rating, GVWR).
4. Check for body lift.
5. Check for stacked blocks.
6. Check for modification of brake hoses.
7. Check headlight aim and vertical height. (Headlight height must be between 22" and 54" to center of the low beam bulb).

Jeep Rentals • Guided Trips • 4wd Instruction

Full-day & Multi-day rentals

435-259-3195

284 N Main St
Moab UT 84532

www.barlows.us

B. Lowered Vehicles

1. Check that fenders cover full width of tire.
2. Check for mud flaps, when required. (Must cover full width of tire).
3. Check for minimum ground clearance.
4. Check for removal of original suspension components.
5. Check headlight aim and vertical height. (Headlight height must be between 22" and 54" to center of the low beam bulb).

These notes are for your information to help you determine if your vehicle qualifies under Utah State Law. The Red Rock 4-Wheelers work with the local law enforcement agencies to try to accommodate as many out of state vehicles as possible, but in the final analysis, the law is the law. Many of the encounters with the law turn out to be issues of how the vehicle was being operated, not whether it was legal or not.

Breaker, Breaker. Come-on Good Buddy...

Citizen's band radios (C.B. Radios for short) were quite the rage in the late 1970s and early to mid 1980s. These days it seems like truckers are some of the few people that still use them. Most others have abandoned them for cell phones or the small hand held walkie talkies the mass retailers sell everywhere. That's too bad, because C.B. radios fit perfectly with four wheel drive trips. In fact they are almost a "must have" for the Moab Jeep Safari. We consider them so important we list a C.B. channel for every trail in the schedule of trails section of this publication.

C.B.s allow our leaders to communicate with everyone on the trail that has their radio set to the correct channel. Some leaders may be bashful and only use the C.B. to communicate information on lunch and potty stops (10-100s in C.B. lingo) and to answer questions from participants. Other leaders are fountains of knowledge and use the radio to pass along all kinds of local tidbits about flora and fauna, geology and history of the area, safari information, etc. Most leaders also use their radios to allow everyone on their trail to introduce

themselves to their fellow travelers. If you aren't equipped with a radio, you are reduced to following the line and getting updates later from your buddies who have their "ears on".

A quick reminder about C.B. etiquette, if you have a radio or when you get one, we ask that you keep communications with people on the trail short and concise when on one of our Safari trails. This helps the leader and gunners move the trail along efficiently by talking to each other, and lets the leader pass information to all the trail participants in a timely manner.

It seems like the two biggest impediments to those who don't have C.B. radios are: 1) where to buy one, and 2) where to mount one in my vehicle. Recently a safari participant from the Denver area found that the Radio Shack stores in his area didn't have them in stock, he ended up going to a truck stop to purchase his! We have to admit to being spoiled, our local Radio Shack still has them on the shelf. Mounting one in the newer vehicles is a challenge, we'll admit. Sometimes a professional can offer advice or installation, or just a look at

how fellow Safari participants get the job accomplished in your brand of rig may be enough to provide ideas. These days C.B.s come in pretty compact sizes or with a remote radio that fits under a seat with all the controls in the microphone hand piece. Both types are helpful with today's tight dashboard space. We've also seen a lot of people use portable, hand held styles, but with mixed results. First, one has the problem of the portable unit sliding around the console or floor, and without a good external antenna these portables don't want to transmit very well in a vehicle. Did we mention antenna? This is another thing a professional can be of assistance with.

Again there are lots of choices, but the magnetic mounts seem to be a favorite of those that don't want to mess with a permanent mount. The antenna can then be stored in the vehicle or at home when not in use, and attached to the roof or hood with the cable tucked in a door opening when in use on the trail.

The Red Rock 4-Wheelers hope you enjoy the Jeep Safari, and look forward to communicating with you on the trail.

List of Stipulations for

STIPULATIONS

In order to continue the Easter Jeep Safari, we the RR4W and you the public users are expected to use the public lands in a responsible manner. BLM's February 2012 Environmental Assessment requires a list of 51 stipulations that we must conform to.

General Stipulations

1. This permit does not grant privileges on private, state, or Indian Reservation lands. The permittee shall comply with all Federal, State, and local laws, ordinances, regulations, orders, postings, or written requirements applicable to the area or operations covered by the Special Recreation Permit. The permittee shall ensure that all persons operating under the authorization have obtained all required Federal, State, and local licenses or registrations. The permittee shall make every reasonable effort to ensure compliance with these requirements by all agents of the permittee and by all clients, customers, participants, or spectators under the permittee's supervision.
2. The authorized officer reserves the right to limit activity and group size should it become apparent that, during the term of this permit, the use is adversely impacting on the environment. The authorized officer reserves the right to close or reroute routes that have been determined to negatively impact populations of bighorn sheep or peregrine falcon nesting sites or other endangered species.
3. This permit may be terminated upon breach of any of the conditions here in or at the discretion of the authorized officer.
4. The permittee will take precautions to protect natural values, cultural or historic objects, aesthetic values, and any improvement on public land involved. Any government owned structures, property, land or resources harmed or damaged by the permittee or his clients shall be reconstructed, repaired, rehabilitated, and restored as may be required by the BLM to at least equal condition immediately prior to such damage or destruction. Permittee further shall abate any

condition existing which may cause harm or damage to any person, structure, property, stream, or wildlife.

5. The permittee will take all reasonable measures to prevent and discourage vandalism or disorderly conduct, and when necessary, will call in the appropriate law enforcement agency.
6. All vehicle use will be in accordance with State law and BLM off-road vehicle designations. Vehicles must stay only on routes authorized by the Special Recreation Permit. Vehicle use is not authorized in Wilderness Study Areas. No off-route travel would be permitted. To avoid damaging cultural sites that may be near Jeep Safari routes, the roadbed should not be widened by inappropriate passing or parking.
7. Permittee will be responsible for any wildfires caused by the permittee's party and will report all wildfires to the nearest BLM Field Office.
8. Natural disasters and uncontrollable acts present risk which the permittee assumes. The permittee has the responsibility of inspecting the camp site and immediate adjoining area for dangerous trees, hanging limbs, and other evidence of hazardous conditions and locating his camp site to avoid such hazard.
9. The permittee agrees to assume responsibility for public safety and health during any phase of his operation, including first aid, retrieval and evacuation activities including costs.
10. All refuse will be packed out and deposited in an authorized dump site.
11. All guides will be informed of permit stipulations. There will be a required review of stipulations of all drivers authorized under the permit.
12. Organized events will have a minimum guide to participant ratio of 1:25, unless otherwise stipulated.

13. Each trail guide will have portable toilets for use during day trips. All human solid waste will be packed out and deposited in an authorized manner.
14. Permittee shall not have exclusive use of recreation areas or interfere with other valid use of the public lands unless specifically authorized under the terms of the Special Recreation Permit.
15. All animals will be kept under control. When outside of vehicles, all domestic animals must be kept on a leash. Domestic animals must remain in the vehicle in the presence of wildlife. Harassing of wildlife and/or livestock is not allowed.
16. Any paleontological and/or cultural resources (historic or prehistoric site or object) are protected and shall not be damaged or removed. All personnel associated with the permitted activity will be informed by the permittee that they are subject to prosecution for vandalizing and/or collecting any historic or prehistoric artifacts or paleontological remains. All guides will be specifically instructed in proper cultural site visitation behavior.
17. At a minimum, the permittee shall have in force public liability insurance covering: (1) damage to property in the amount of twenty-five thousand dollars (\$25,000), and (2) damage to persons (bodily injury or death) in the amount of three hundred thousand dollars (\$300,000) per occurrence. The policy shall also have a minimum annual aggregate limit of six hundred thousand dollars (\$600,000). The policy must name the United States Government as additionally insured.
18. A signed and dated post-use report must be submitted by November 15 of each year or within 30 days of the last use for that year. The report must include the following information for each trip: start and end date, location, number of guests, user days, number of guides/crew, number of vehicles, total receipts, and percentage of time spent on public land.

Permitted Motorized Use

19. Gates will be left as found.
20. Any additional routes or campsites will require additional approval from BLM.
21. The Canyon Country Partnership minimum impact guidelines will be promulgated by the permittee in written or oral form. Event information will include these guidelines.
22. The date and locations of motorized events will be made available to non-motorized users prior to the event, enabling them to consider other areas to recreate.
23. Parking and staging will be only on non-vegetated areas; parking will occur in single file along the side of the route.
24. Top of the World route participants will not park off the Onion Creek Road to protect the federally listed threatened plant *Cycladenia humilus* var. *jonesii*. All travel on the Onion Creek Road will be on the county-maintained road. There is no travel in the stream or in the "Narrows."
25. The 3.6 mile portion of 3-D in Tusher/Bartlett Wash (just west of Highway 191) is not available for motorized use.
26. The maximum number of vehicles allowed per route per trip is as follows. No more than 25 vehicles are allowed on Arch Canyon, Dolores Triangle, Hole in the Rock, Hotel Rock, and Lockhart Basin. No more than 35 vehicles are allowed on Crystal Geyser and Pritchett Canyon. No more than 40 vehicles are allowed on Kane Creek Canyon, Rose Garden Hill and Steel Bender. No more than 45 vehicles are allowed on Golden Spike, Porcupine Rim, and Secret Spire. No more than 50 vehicles are allowed on Chicken Corners, Dome Plateau, Gold Bar Rim, Hell Roaring Rim, Hey Joe, Metal Masher, Moab Rim, Sevenmile Rim, Top of the World and Wipeout Hill. No more than 55 vehicles are allowed on Cliffhanger, Copper Ridge, and Strike Ravine. No more than 60 vehicles are allowed on 3-D, Behind the Rocks, Fins and Things, Flat Iron Mesa, Hell's Revenge, and Poison Spider.

27. Vehicles on the Arch Canyon trail must turn around at the designated site 4.5 miles up the canyon.

Stipulations for Camping

28. Soaps, detergents, or other non-degradable foreign substance shall not be used in streams, springs, or rivers.
29. Firewood must be brought in from elsewhere. The number of fires and size of fire rings will be kept to a minimum. Fire rings will be removed after use.
30. Each camp site will be restored to its original condition. All extraneous material will be removed.
31. The entrance to campsites will be via one route located as much as possible on slickrock and more resilient soils.
32. Portable toilets will be set up at all overnight sites. All human solid waste will be packed out and deposited in an authorized manner.

Wildlife Stipulations

33. The permittee will be responsible for ensuring that all guides and/or group leaders will be educated about the threatened and endangered species that could be present in the activity area. This education will include the potential penalties for taking a species listed under the Endangered Species Act.
34. Observe desert bighorn sheep, American pronghorn, deer, and elk from a distance. No vehicle or foot pursuit allowed. No excessive noise.
35. In desert bighorn lambing areas on portions of Crystal Geyser, Gold Bar Rim, Hellroaring Rim, Hey Joe, Metal Masher, Secret Spire and Sevenmile Rim, vehicles may not stop from April 1 to June 15. No foot travel, staging or camping will occur in these areas. Noise will be kept to a minimum.

36. Observe low speed to avoid direct fatality of prairie dogs.

37. Groups must avoid disturbing raptors year-round, especially during nesting seasons (March 1-August 31). There will be no stopping within ¼ mile of active raptor nests (indicated by fresh excrement and/or defensive bird behavior). An active nest site should be reported to the appropriate BLM office.

38. There will be no vehicle or foot pursuit of bald or golden eagles, ferruginous hawks, or burrowing owls. No excessive noise is allowed in the presence of these birds.

39. If Mexican spotted owl occupancy is determined within 0.5 miles, travel and dispersed camping shall be suspended from March 1 to August 31 while nesting birds are in the area. There will be neither pursuit nor excessive noise in their presence.

40. If Southwestern willow flycatcher breeding/nesting territories are identified along or within 0.25 mile of authorized routes, travel and camping shall be suspended within 0.25 miles of these locations from May 1 to August 15.

41. No camping or staging in occupied Gunnison Sage-grouse habitat.

42. To avoid degradation to habitat of special status and endangered fish, all trips on Arch Canyon, Kane Creek Canyon, Hey Joe, Crystal Geyser, Dolores Triangle, Dome Plateau, Moab Rim, Pritchett Canyon, Top of the World, and Long Canyon will have proper clean up supplies to safely clean up and prevent further contamination of the rivers from vehicle fluids. Spills in dry drainages must also be contained and removed.

COMPLETE FRONT AND REAR DIFFERENTIAL INSTALL KITS FOR JEEP TJ - JK

PROVEN! PERFORMANCE!

List of Stipulations for Permitted Motorized Use

continued from page 69

43. Should future inventory or monitoring for sage grouse identify occupied areas, there will be no dispersed camping within these areas.

44. No camping will be allowed within 1/2 mile of wildlife water sources.

Riparian/Water Quality Conservation Stipulations

45. Vehicles must avoid damage to riparian vegetation and streambanks. No route widening is permitted.

46. When the designated route crosses a stream, vehicles must cross in a narrow single file. The single file of vehicles must all cross in the same location to avoid widening the route.

47. On designated routes located within streams and floodplains, e.g., Tusher Canyon (Sevenmile Rim), Kane Creek Canyon, Pritchett Canyon, vehicles must drive in the center of the stream channel, avoiding bank and vegetation disturbance.

48. No vehicles wider than 76 inches are permitted in the 2.4 mile section of Tusher Canyon on the Sevenmile Rim route.

49. If an oncoming vehicle is encountered in a narrow section of a route,

vehicles will not pass each other at this point. One vehicle will reverse to a suitable, passable location.

One Way & Exclusive Use Stipulations:

50. The following routes will be one way for the entire 9 days of the Jeep Safari Event: Kane Creek Canyon, Hell's Revenge and Steel Bender. It is the responsibility of the Red Rock 4-Wheelers to clearly sign and implement these routes as one way for the length of the Safari.

51. BLM permittees will have exclusive motorized use of the following routes on a day on which a Jeep Safari "run" is scheduled: Behind the Rocks, Cliffhanger, Gold Bar Rim, Golden Spike, Moab Rim, Poison Spider and Pritchett Canyon. For example, if a Jeep Safari run is scheduled on Behind the Rocks on April 14, only Jeep Safari and other permitted motorized vehicles can travel on this route on that date. It is the responsibility of the Red Rock 4-Wheelers to clearly sign and implement these routes on those days for exclusive permitted use.

Why we recommend seat belts...

photos by Action Shots

...a picture is worth a thousand words!

You and I, as individual citizens, have the precious freedom to travel huge areas of the local country with few restrictions. Most of the landscape is federally owned — National Parks, National Forests, or public lands administered by the Bureau of Land Management under the Department of the Interior. There is a scattering of land parcels that are School Trust Lands that were awarded to the western states when they were admitted to the union. These lands were to be used “for the common education.” People often treat School Trust Lands as “public lands,” but they are owned and managed quite differently.

We must not forget about those areas that are privately owned. Although there are some road easements and historic rights-of-way across private lands, we are obliged to respect the rights of the owners and not enter lands that are appropriately “posted.”

BLM PERMITS

We taxpaying owners of our public lands have a right to expect commercial users to pay for the privilege of making a profit — at least to the extent of covering some of the administrative costs. Most obvious are the livestock uses. Ranchers have been grazing cattle and sheep on public lands for generations, and the present BLM grew out of needs for regulation of grazing. Mining is also a commercial use that is in the public eye, although the mining laws were set up to encourage mining. Locally, we are familiar with commercial river and land tour companies. They, too, are regulated in terms of how they use the public lands, and they are required to pay fees. Where individual users are concentrated in small areas, particularly in and along rivers, individual permits and fees are required, as well.

The Easter Jeep Safari fell into the BLM’s definition of a “commercial” event even before we began charging registration fees. It became necessary for us, therefore, to fulfill the responsibilities of substantial land users.

Our first permits were easy-going affairs and our land-use fees were like other commercial users, a small percentage of the gross registration fees. The percent-of-gross fee system works for tour companies with considerable gross income, but the fees we paid were admittedly a pittance. When we got our first five-year permit, the BLM revised

our fee system to be like that of individual river users, a dollar amount for each user-day. We weren’t thrilled with paying a several-fold increase, but it was more like a fair amount, and, heck, we handled it the same way everyone else does—by passing on the increase into your fees. The user-day dollar amount was increased in 2000, so we passed that along, too.

Our 1991 permit was a more complicated process than earlier ones. The size of our event was growing rapidly and the BLM was paying more attention to environmental issues. For example, earlier permits put no limit on the number of vehicles on a trail, which left the event wide open to abuses. We had already learned, however, that more people wanted to attend some trails than would have fun doing so. We had set maximum limits on more and more of the trails and had already decided to limit all the trails. Our limits were acceptable to the BLM.

The five-year permit that began in 1996 required even more careful attention to detail. For example, trail locations had previously been shown on hand-marked maps made at various times by various people. This time we located our trails on topographic maps in a consistent manner using GPS data. That permit was issued without any major problems, although there were a few new stipulations that we are able to manage

SCHOOL TRUST LANDS

comfortably. In 2000, we applied for and received another 5-year permit that began in 2001. 2005 was the last year of that permit. We are presently under a permit that expires in 2022. Based on our recent experiences with some of the green community, we expect that we may have some serious challenges to

the permit. If this turns out to be the case, we will be looking for substantial support from the four wheeling community.

Almost all of our trails cross one or more parcels of lands administered by Utah’s School Institutional and Trust Lands Administration (SITLA), which has the charter of seeking the maximum possible stable income for the school trust. They, like the BLM, permit grazing, mining, and other activities that may provide revenue. SITLA also leases land for on-going revenue and often sells land with the proceeds going into a trust fund. We must obtain annual permits from the state for our events. We are required to notify holders of grazing permits of our planned use, and we pay fees to the State of Utah.

For the 2018 Easter Jeep Safari, we paid the BLM and the State of Utah land-use fees that totaled over \$64,000. The good news is that nowadays most of the BLM fees come back to the local agencies for use in land management.

Trail Difficulty Ratings

The following ratings are for Moab area roads in dry conditions. The effects of snow or rain varies greatly depending upon the altitude of the roads and the type of soil the bed consists of. **Driver Beware!** CB Radios are a plus.

1: County dirt road maintained for high clearance 2WD and 4WD use in adverse conditions.

2: County dirt road with infrequent or light maintenance after rain or snow, high clearance **light duty 4WD required.**

3: Trail consisting of loose rocks, dirt, and sand with some slickrock surfaces, mud holes possible, no steps higher than 12". **4WD is required**, aggressive tires a plus.

4: Trail consisting of loose rock, dirt, and sand with some slickrock surfaces. Some erosion; washes, gulches and rock steps no higher than 18". Tall tires(33" plus) and limited slip would be a plus. **4WD is required.** Enhanced suspension travel and good ground clearance are helpful. Good driving skills a plus.

5: Trail surfaces are rutted, rocky and sandy with steps not exceeding 24", with considerable slickrock surfaces. Water not exceeding 12" with some mud possible. 4WD, tall tires (33" plus) and traction adding devices (**locker, limited slip**) **are required.** Above average driving skills are desirable. A winch would be a plus. Enhanced suspension travel and good ground clearance are also required..

6: Trails are difficult with considerable erosion damage, loose rocks, dirt, and slickrock. Water in excess of 12" is possible with mud conditions. Steps not exceeding 36". 4WD, tall tires (33" plus) with **two traction adding devices (lockers, limited slips) are required.** A winch would be a plus. Enhanced suspension travel and good ground clearance are required. Excellent driving skills are recommended.

7: Trail consists of rock, sand and considerable slickrock with many steps exceeding 48". Steep inclines and declines are prevalent. **Enhanced off road equipment is required including locking devices (front & rear), 35" tires, maximum vehicle ground clearance, and tow hooks.** A winch is desirable. Excellent driving skills are required. Vehicle mechanical or body damage is likely. Roll over possibilities exist.

8: Extreme trail similar to #7 except a bit more extreme. **Same equipment required as #7.** A winch is desirable. Excellent driving skills are required. Vehicle mechanical or body damage is likely. Roll over possibilities exist.

9: Extreme and beyond. The average well equipped trail rig may have great difficulty in completing this trail. Steps exceeding 60". Steep inclines and declines with off camber sections are prevalent. **Enhanced off road equipment is required including locking devices (front & rear), tall tires (37" plus), maximum ground clearance, tow hooks, and a winch. Minimum wheelbase 100".** Excellent driving skills are required. Vehicle mechanical or body damage is likely. Roll over is very common. Spare parts and tools are recommended.

10: Let the carnage begin! Buggy territory. Street driven 4X4's should not attempt this trail. Modified factory vehicles will not be able to complete this trail.

NOTE: The Red Rock 4 Wheelers Club attempts to keep the trail ratings current. However weather and usage constantly alters the routes. Heavy but localized rains can change Kane Creek from a moderate trail to impassable in an afternoon. It is always wise to obtain the most up-to-date information prior to departing for a trip, and be prepared. Remember, turning back is usually an option as well.

Chicken Corners Trail

Guy Brown, Leader

This trail name dates from olden days when it was a pack trail and only the least “chicken” passed

Chicken Corners. Today travel is easier, the actual Chicken Corners is a hiking trail, but it remains as scenic as ever. The trail follows the Colorado River downstream, squirms through lower Kane Springs Canyon, climbs and then descends the “Cane Creek Anticline” (spelling of the name is in dispute) via Hurrah Pass, and rejoins the Colorado River, a few hundred feet above it this time. The end of the vehicle trail is directly across the river from Dead Horse Point. Approximate mileages: 51 miles total, 42 miles off pavement.

Scenery: Following the Colorado River Canyon is a special treat in this area where it cuts deeply through a variety of

rock layers. Lower Kane Springs Canyon is even deeper and much narrower. The climb to Hurrah Pass reveals another part of the Colorado River canyon-much wider than before and more than 2,000 feet below the mesa tops. The Hurrah Pass portion winds along over dark red sandstone layers and occasionally overlooks startling precipices. There is an unusual limestone arch at one point along the roadside. The final mile is on a bench about 400 feet directly above the river.

Road Surface: The road begins as gravel but becomes mostly red dirt and sand with the occasional appearance of sandstone bedrock.

Highlights:

There are petroglyphs (ancient rock art) at the roadside. The ford of Kane Creek ranges from dry to window deep (impassible after a storm). The stop at a mound of red rock visits some unusual caves caused by erosional undermining of hard sandstone layers. Chicken Corners is a point where the benchland pinches down to a narrow passage that tips toward the river 400 feet below.

Buttes & Towers Trail

Mike Kelso, Leader
Sunday 4/21

Justin May, Leader
Sunday 4/14

John Marsh, Leader
Tuesday 4/16

To be used:
Sunday 4/14
Tuesday 4/16
Sunday 4/21

This beautiful trail visits the scenic Courthouse Pasture area Northwest of Moab to provide participants with a relaxing, moderate 4 wheeling experience along with picturesque views and vistas of the beautiful reddish Entrada rock formations that are plentiful in this area. The La Sal Mountain peaks serve as a backdrop. There are many old trails in this area and this trip combines segments of them to create a pleasant and varied experience. Approximate mileage: 50 total, 25 off highway.

Scenery: Courthouse Rock dominates the beginning of the trip. As the

day progresses Pasture Butte, Monitor and Merrimac Buttes, Determination Towers, Alien Rock, and Big Mesa are all viewed.

Road Surface: The road surface is consistent with the trail rating. It varies from bumpy rock sections to smooth sandy washes. There are two track dirt sections, a lot of fun slickrock driving that includes some sidehill areas, then sandy creek bottoms and a lot of sandy pasture area. Sprinkled among all this variety are broken rubbly rock sections and a few short shelves.

Highlights: The enjoyment of viewing all the varied huge red Entrada

formations blends in nicely with the moderate four wheeling. The trail offers enough jeeping to keep the driver engaged while tempting driver and passengers to turn heads and look in awe at the buttes and towers all around. Most of the named rock buttes and towers are visited close up so participants can get a true feeling of their size. Occasional "scenic stops" along the way will allow time to contemplate and photograph the scenery.

Associate Leaders: John Brownwood, Carole Hahn, Mike Lattin, George Thornock, Russ Walker.

Vehicle Requirements

Easter Jeep Safari 2019

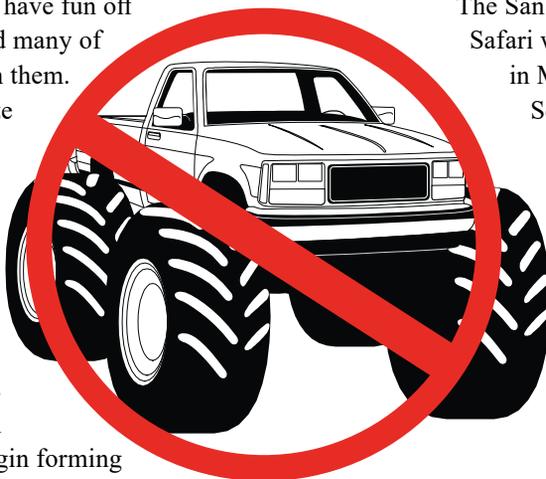

The Red Rock 4 Wheelers wish to clarify the eligibility of differing vehicles for the 2019 events, both Easter Jeep Safari and the Labor Day Event.

These events are offered for full-size street legal production type four-wheel drive passenger vehicles that feature a transfer case which has a low range gear in it. Our events are designed around this type vehicle and always have been. Years ago we found out the hard way that allowing vehicles that differed from this formula created problems and detracted from the fun for participants. **Our trails also usually end at a different spot than where they began, so street legality is an issue too.**

This should not in any way be viewed as a condemnation of sand rails, dune buggies, rock crawlers, motorcycles, ATVs, or UTVs. All represent a legitimate way to have fun off the pavement, and many of our members own them.

But we realize that they travel the trails at a much different pace than the full-sized four wheel vehicles. It is the travel pace that surfaces as the most visual problem; gaps begin forming in the line as the terrain changes and people speed up or slow down to adjust to it. Once the gaps begin to grow, invariably someone misses a turn and part of the group gets lost. This results in a lot of down time while the lost group is searched for and then reunited with the trail group.

www.rr4w.com

Another problem with the disparity of vehicles is the availability of adequate help in the case of a rollover or a serious “stuck”. Winches are marketed for the size vehicle they are expected to be used on, and rated accordingly. A small winch on an ATV just doesn’t have the pulling power and vehicle mass required to assist with the larger stuff.

What can owners of these other vehicles do if they want to attend an event? Joining or forming a club of similar vehicles is a good choice. That’s how we got started!

Another choice is attending an organized event for that type of vehicle. Moab features a UTV Rally scheduled for May 14-18 2019. You can find them at RallyOnTheRocks.com.

There are many other ATV and UTV events in Utah, visit www.atvutah.com or www.utvjam.com.

The San Juan ATV Safari will be held in Monticello, September 12-14, 2019; information is available at www.sanjuansafari.com. (A great calendar of events can be found at pirate4x4.com. Another problem

we frequently encounter is questions about purpose-built rockcrawling rigs. All but a couple of the Jeep Safari trails are no challenge for these purpose-built rigs, so don’t register for them. Since we do encounter them on a couple of trails, we must visit the issue.

First, our initial statement stands,

the trips are for street legal production type four wheel vehicles. As already mentioned, **most of our trails exit at a different point than where they enter, so it becomes difficult to get past the street legal aspect.** The Utah Highway Patrol enforces the Utah street legality situation pretty strictly, and Jeep Safari time is no exception. **Please note that even if you have your vehicle licensed in another state, UTAH LAWS APPLY IN UTAH.**

The safety inspection book is lengthy but pretty straightforward. Windshields, lift height, and fender coverage of the tires are a few of the items of concern, but by no means all.

The passenger car and light

truck manual can be viewed or downloaded from <https://site.utah.gov/dps-highway/wp-content/uploads/sites/21/2016/11/2016-Passenger-Car-Light-Truck-Manual-10-26-2016.pdf>.

Red Rock 4-Wheelers didn’t make the laws, and we don’t want to be in the business of enforcing them. We ask that you read the requirements of our events, and comply with them.

If you, as a participant, are stopped on the way to a meeting place or on the way to the trailhead, we are not responsible if you miss the trip, and will not issue a refund for the missed trail.

Crystal Geyser Trail

Travis & Teri Clark, Leaders

This trail begins near Moab and finishes close to Green River which can be convenient for those departing in that direction from Safari. The trail locale is south of Green River Township and east of the Green River. The country is colorful and beautiful in a desolate way. The route passes near Dubinky Well and the "Rainbow Rocks" country on the way to Salt Wash, Little Grand Wash, and seldom used mining trails through stark slopes of the Morrison Formation. Most of the trail is quite easy, but a few gullies could trap vehicles with poor clearance. Approximate mileages: 112 (52 miles of

this is Green River back to Moab), 40 off pavement.

Scenery: The always beautiful Entrada Sandstone layers are especially colorful in the Rainbow Rocks area. The Morrison slopes are fully as colorful but the softer material supports few sheer cliffs. Those of us who have never been on the moon suppose it might look like this-but with less color.

Road Surface: The sandy road near Rainbow Rocks yield to dry-weather-only clay and shale residues later in the trail. There are some rocky wash bottoms and numerous cross-cutting gullies.

Highlights: Short, steep climbs near Rainbow Rocks and Duma Point will test some stock vehicles. The old mining roads nearer Green River have accumulated some sizeable rocks that will cause everyone to watch wheel placement and fear for low hanging parts.

Crystal Geyser is one of the region's several man made bore holes that tap cold water and carbon dioxide to yield the occasional, but spectacular, geyser action (about twice a day).

Associate Leaders:
Ken Allen, Russ Walker.

Moab's Weather

People often want to know what Moab's normal weather is. In spring, expect spring weather, when it is normal to have far from average weather. An "average" day in late March, will have a high about 65° and a low near 40° in the valley and near the river. Out of the valley, the temperatures may be a few degrees higher until you get to higher elevations where the temperatures are lower (our trails range from 4,000 to 7,000 feet). In any case, the variations of spring could push the temperatures 20° either way. Precipitation for the spring months averages about an inch, but any one month could range from near zero to more than 2 inches.

We cannot expect to get through nine days with perfect four-wheeling weather. Modest rain, and even some snow flurries, have dampened spirits but haven't stopped the Safari. A real rain — say, a half inch or more — can mess us up, as welcome as it might be to reduce the persistent drought. Mud is an exciting challenge for some people (especially in bogs, where slipping can lead to a fall). Around here, mud just threatens us with an unplanned night on the trail — to avoid falling off the trail. We usually deal with it by

staying home for a day while it dries. During the Jeep Safari, mud and flood have (rarely) required a change of plans for some trails, but we have usually been able to offer substitute trails from our officially permitted repertoire.

We consider forecasts when making plans, but we have learned never to cancel plans because of a forecast. Published national maps that show temperature and precipitation contours are particularly frustrating because they cannot be detailed enough to account for elevation and local conditions. (The topography around Moab seems to put us in a warmer pocket than surrounding areas.)

When you do hear of weather conditions elsewhere in the state, it may or may not be related to ours. Usually, we have less precipitation and warmer temperatures than the Salt Lake area, but we may be cooler than St. George by a similar amount. If you have access to local TV, our cable system now has the Weather Channel (14) with local forecasts. A Red Rock 4-Wheeler would be glad to look out the window for you; you can call (435)259-ROCK (435-

259-7625) for a very guarded observation. The family answering that phone these days will try to be available between the hours of 8:30 a.m. to 10:00 p.m. Mountain Time, but be aware that they may be out sampling the rocks, especially during Safari week.

This photo shows what can happen to you on a bright, sunny day while driving a frequently used wash bottom. It is on sand that just looked a bit damp, but the nature of quicksand is evident if you notice that the wheel tracks completely disappear within a few minutes.

Cameo Cliffs Trail

John & Carol Martin, Leaders

The Cameo South area is some 25 miles south of Moab in an area that has only recently been visited by Jeep Safari. Jack Bickers, a club member in the early years, explored this area extensively in the 1990s, and this trail is comprised of a combination of several of the many old mineral exploration routes Jack discovered. The emphasis for this trail was to provide some mild four wheeling challenges while maximizing the stunning views this area offers. Those looking for milder jeeping should enjoy the abundant

scenery of this trip. Approximate mileages: 83 overall, 28 off pavement.

Scenery: Bordered on the north by Utah 46, the south by Sandstone Draw, on the west by US 191, there is scenery aplenty along this trip. Some notable places are Cameo Mesa, the Dragon Rock, Yak Rock, the Four Fins overlook, and the Wilson Arch overlook. The La Sal Mountains and the Abajo Mountains provide distant backdrops to the desert scenery.

Road Surface: There are two track dirt sections, some sand, sections of slickrock, a few small ledges, and some bumpy rocky sections.

Highlights: A couple of shelves may require a second attempt by some, the twisty section through Juniper and Pinion trees requires precise maneuvering to avoid the branches, and a short section along a canyon edge may bother those that dislike heights.

On the Lighter Side!

photos: National Park Service

Balanced Rock, Arches National Park

Overlooking Canyonlands National Park

So you're here in Moab at Easter for a week plus of Jeep Safari. May I make a suggestion? Lighten up a bit. Maybe you are one of the rare ones, but most people find sustaining a constant 5 or above trail every day for the duration of the Safari is pretty taxing. It takes its toll on the vehicle as well as the occupants. Frazzled nerves go hand-in-hand with

fractured u-joints. Why, even the driver's sharp edge can be ground down to the point where stupid mistakes are made. Just look at the leader and gunner lists and see how many of them are on the trail every day. OK, so how do you handle this situation and still make use of that hard-earned vacation time? Simple, select a day or so to do the "tourist" routine. Try visiting Arches National Park or the Island in the Sky section of Canyonlands National Park. These parks offer smooth pavement to soothe tired kidneys and overextended neck muscles while you get to view outstanding scenery at every turn in the twisting roads. The family will love you for the calmer, shorter day that results from these tourist days.

You can't stand a day without the front axle engaged? No problem, each park offers a 4WD trip, although not close to the equipment strainers many Safari trails can be. While not heavily advertised,

Arches National Park has a 4WD trail that is accessed from the Salt Valley Road and goes up to the Marching Men formation and Tower Arch then comes back to the main park road near Balanced Rock. The brochure you get at the fee station shows the route. Just don't skip the Windows Section before you start the 4WD trip or you will have wasted a chance to see some spectacular arches and scenery.

How about the Island in the Sky part of Canyonlands National Park? Well, use the pavement to get to the Park and check out the various scenic overlooks (Grandview Point should not be missed), and then select the Shafer Trail to descend to the White Rim Trail, make a left onto the White Rim Trail to head toward the potash plant, Utah Hwy 279, and a pleasant drive along the Colorado River back to Moab. See, you can "have it all" even on a light duty day in the Moab area.

Deadman Point Trail

The Deadman Point Trail visits the interesting scenery near the bowknot bend section of the Green River. Hellroaring Canyon is to the south and Spring Canyon to the north. There are occasional challenges for stock vehicles, but this trip was planned to be scenic,

Rick Wolcott
Tuesday 4/16

Marlene & Devon Parson

Associate Leaders: Debra Abrams, Blake Belongia, Becca Erickson, Christine Mathe, Doug Rydalah, Jim Sparesus, R Lance Wade.

relaxing family four-wheeling for those more interested in the scenery than 4x4 challenges. Approximate mileages: 90 total, 32 off highway.

Scenery: Two or three overlooks of the Green River will be visited. Glimpses of lower Hellroaring Canyon are a treat, and in the distance the large rock formation named Cleopatra's Chair in the Maze District of Canyonlands National Park can be viewed. If conditions are right one can enjoy the sight of birds floating on the thermals at some of the overlooks.

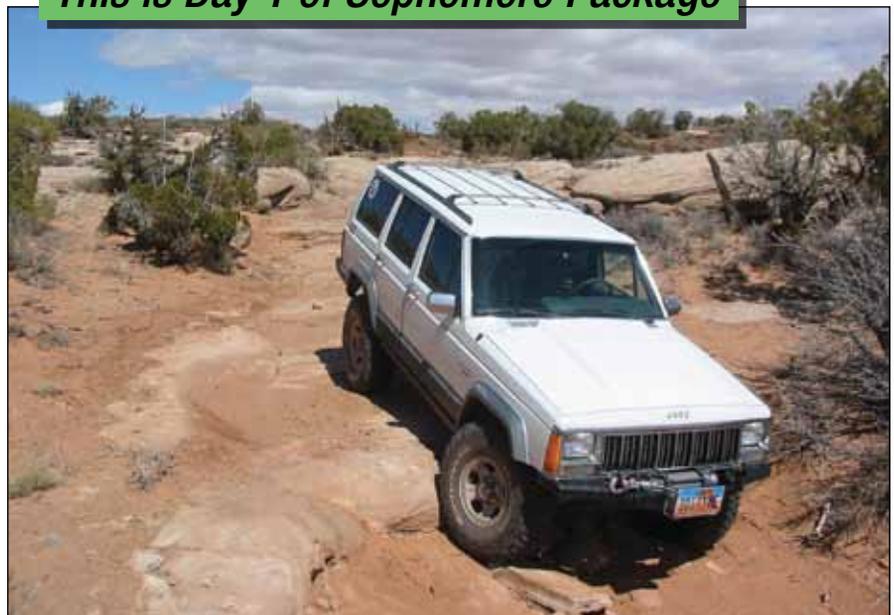

Road Surface: There are some easy rock and dirt sections, occasional small ledges, a twisting descent that demands a driver's attention, some slickrock near the viewpoints, and a couple sections of sandy two-track.

Highlights: One or two ledges may require a carefully chosen line to avoid scraping a skid plate or rear bumper on vehicles with a long overhang, but this trail is mainly about the views. The distant vistas are spectacular, and peering down to the Green River at the overlooks is a treat as well.

Visitor Info

A worthwhile stopping place in Moab is the multi-agency Moab Information Center (MIC). It is a joint effort of the U.S. Forest Service, National Park Service, Bureau of Land Management, Moab Area Travel Council, and Canyonlands Natural History Association. It provides “one-

stop shopping” for visitor information with a location as central as you can get, Center and Main Streets. They have maps, books, and brochures that cover both public and commercial recreational opportunities. The Travel Council maintains the web site www.discovermoab.com. For information relating to businesses, try the Chamber of Commerce of Moab, 11 N. Main Street, Ste. 12, Moab, Utah 84532, (435)259-7814.

Another great source of visitor information in the Moab area is the *Moab Happenings* newspaper. *Moab Happenings* has up-to-date information on lodging, restaurants, events, shopping and more (including your monthly horoscope!). *Moab Happenings* is online at www.moabhappenings.com. When in Moab, pick up a current copy of *Moab Happenings* at over 100 locations around town.

Deadman Springs

John Encheff Leader
Wednesday 4/17

Dan Lindblad, Leader
Friday 4/19

The Deadman is off Spring Canyon road. In years past, this trail was the first part of Secret Spire Trail. The trail will go to the actual spring with a no-longer-functioning stock reservoir, where in the 1890's two cowboys found a dead cowboy at the springs. This is a nice scenic four wheeling trail. Lunch will be on a large slickrock area where you can look over Spring Canyon back to the Secret Spire.

Scenery: You will see the beginning of Spring Canyon, the spring, along with The Twins, Queens Rock, and DMS waterfall.

Road Surface: There are some easy rock and dirt sections, occasional ledges, descents that demands a driver's attention, some slickrock and sandy sections.

Trail Restrictions

-Why?

You may wonder why we have special restrictions on some trail rides we offer. The Red Rock 4-Wheelers think long and hard about these before we put these restrictions on any trip. Trail officials contribute their ideas, backed up by actual experience with participants on the trails. Changing trail conditions (usually due to weather-related events) warrant new restrictions on familiar trails. Even the National Park Service and the Bureau of Land Management provide Red Rock 4-Wheelers with some trail restrictions because of their requirements.

Red Rock 4-Wheeler trail officials are well aware of the Club's restrictions on their trips. They are expected to enforce them. Don't abuse the messenger when he/she asks to check on your equipment. If you are bounced from a trail for inadequate equipment, whose fault is it really? Yours.

Your first reaction to a restriction may understandably be "why can't I go?" but we hope the next reaction will be "OK, I understand" after a careful review of the whole picture. The Club has to consider the safety and enjoyment of all participants on the trips.

If a trip is constantly delayed at the obstacles by a vehicle that has to try 3, 4, or 5 times (or be towed or winched) at these obstacles, a normal six-hour trip can easily become eight or nine hours. Factor in the increased chance for breakage or accident in these situations and the trip can become a nightmare for all involved. Then what are the officials most likely to hear from the ill-equipped vehicle? "Why didn't you tell me?"

So we are telling you now, before you break something, get hurt, or before you

make 20 new enemies on a trip. Look at the restrictions as trail obstacles to be surmounted. Each new item installed on your vehicle is another obstacle to be overcome so that in the end you and others will have an enjoyable trail experience.

Hellroaring Rim Trail

Rich & Marilyn Weigand, Leaders

This trail tours Mineral Point, part of the mesa country between the long deep gashes of Mineral and Hellroaring Canyons. These two canyons drain into the Labyrinth Canyon section of the Green River. The headwaters of these two canyons (as well as many others in the area) are shallow, normally dry drainages that suddenly plunge over rimrock into deep canyons. This is a pleasant, scenic family trail but we can't assure that a stock vehicle will get through without a "thunk" of metal on rock. Approximate mileages: 80 total, 37 off highway.

Chip Brox Memorial Trail

Scenery: There are glimpses of Hellroaring Canyon along the way, but the final overlook near its confluence with Labyrinth Canyon is exceptional, a ridge top provides a view 50 miles or more in all directions.

Road Surface: Most of this trail, like many other local trails, was scratched into the rock formation known as Kayenta Sandstone. This formation provides a variety of shale and sandstone that erodes into rocky ledges, broken rock, and sandy dirt.

Highlights: A couple of ledgy, sandy, and switch backed hills into a small canyon provide challenging descents. The climb out is interesting as well. There are some rocky ledges that could grab any low hanging parts.

Forged in Innovation. A Legendary Relationship. For more than 75 years, the Jeep® name has been synonymous with rugged performance—and for more than 75 years, Jeep has trusted Dana axles as their original equipment. Now, Dana is proud to introduce a new line of quality Dana AdvanTEK® axles for the Jeep® Wrangler® JL. Visit SpicerParts.com/Jeep for more JL part information, how-to videos, vehicle builds, event coverage, and more valuable content to help you make the most out of this next exciting chapter in the Jeep story.

A HISTORY OF PERFORMANCE. 75+ YEARS STRONG.

1941
Willys MB

Front: Dana 25™
Rear: Dana 27™

The “Jeep” vehicle concept was born in answer to the U.S. Army’s call for designs of an easily transportable 4x4 general-purpose vehicle during World War II.

Willys-Overland was one of the original manufacturers selected to produce the chosen design, with Dana (then the Spicer Manufacturing Company) providing the driveline components for every vehicle. After the war, Willys-Overland began selling civilian versions of the iconic military vehicle, and Dana’s relationship with the Jeep brand has been going strong ever since. It’s a relationship for the ages—forged in continuous improvement and innovation—that is believed to be the longest continuous supply relationship on the same vehicle in automotive history. And we’re just getting started.

Bill Hughes, Leader
Thursday, 4/18
and Big Saturday 4/20

This trail rides the rolling mesa top between two of the Green River's large tributary canyons, Hellroaring and Spring Canyons. It goes close to the deep portions of Spring Canyon, and crosses the shallower upper Spring Canyon to visit a strange tower dubbed the Secret Spire. It is a good trail for some mild four-wheeling through an interesting and scenic expanse of country. Approximate mileages: 73 total, 32 off pavement.

Scenery: The large vistas are to the west and north and encompass the San Rafael Reef, the Book Cliffs, and a glimpse of the Green River. The close up views are into deep, rugged canyons and a range of local rock formations, including arches and towers. Bluffs of Entrada Sandstone called Needle Rock and Rainbow Rocks stand high above the trail.

This Trail is part of First Timer's Package Day 2

Road Surface: After twenty miles of pavement, the roads are largely sandy dirt. The trail itself features sand, slickrock, and some sandy wash bottom.

Highlights: Near upper Spring Canyon wash bottom one gully often washes out and may have to be repaired a bit. Your leader may take a spur to Dellenbaugh Tunnel, which is a strange, usually dry watercourse piercing the Navajo Sandstone.

The tunnel is about 100 feet long and high enough that one hardly needs to stoop to walk through it. The floor is a limestone layer rich in chert, and this layer extends another couple of hundred feet to an abrupt drop into lower Spring Canyon. The Secret Spire is a strange tower of Navajo Sandstone standing alone on a dome-like base. Nearby are two small arches, one of which is just beside the main road but easily missed.

Dieter Thoeny, Leader

The 3-D Trail tours the vicinity of colorful Hidden Canyon and Bink Spring, northwest of Moab. It visits the canyon bottom and canyon rim, and finally, a high overlook of the area (hence the name 3-D). A few of the hills have been known to challenge stock vehicles, but most of the tour is pleasant, scenic, family 4-wheeling. Approximate mileages: 59 total, 28 off highway.

Scenery: This canyon country is unlike the Moab valley with its sheer Windgate Sandstone rimmed cliffs; instead 3-D visits canyons that are a few hundred feet deep in the smooth, red and white layers of the Entrada Sandstone. The slickrock areas are made up of the white layer that caps the Entrada. Vistas are to the north toward the Book Cliffs.

Road Surface: There are some two track dirt sections, a little slickrock, a sandy and maybe wet wash bottom, and some rock/dirt mixtures with a few ledges.

Highlights: Not far from the beginning is "Airport View Hill" where a few stock vehicles with highway tire pressure may have to try more than once. Hidden Canyon bottom is very sandy but is usually not difficult. The climb out of the upper canyon first encounters "The Wall", which looks like a rock wall to the uninitiated, but is usually climbed easily by stock vehicles. Just past this is "Mean Hill", which climbs about 200 feet in two steep sections. The first section begins with a shelf followed by a loose red dirt hill. The final climb looks worse than it is because it is on a "hogback" with a drop off on both sides.

Copper Ridge Trail

Curtis & Deb King, Leaders

This trail is a combination of several roads north of Moab and near the western boundary of Arches National Park. It lies east of the Moab Fault, so it is in younger rock formations than many of our trails. Its slickrock is the top of the Entrada Formation, and its views are often of erosions into that formation. Prominent scenic exposures are in an area called Klondike Bluffs. Some of the roads are on the softer Morrison Formation, which can become impassably slippery when wet. There are eroded portions that can challenge some nearly stock vehicles. Approximate mileages: 64 total, 35 off highway.

Scenery: The trail visits an unexpected and beautiful pour off into lower Sevenmile Canyon. The Klondike Bluffs exposure of white capped red rock towers and canyon walls are at a moderate distance. There is a good view of Tower Arch, and some other arches are visible in the distance from various sections of the trail.

TRAIL SPONSOR

Tuesday April 16

Road Surface: Most of the trail is dirt and rocky dirt, but there are a couple of long stretches of slickrock as well as some broad sandy wash bottom.

Highlights:

The trail goes near colorful hills that have yielded dinosaur bones. Following the main section of slickrock are two steep climbs on eroded dirt and rock.

SHERIFF WHITE SAYS:

RESPECT the DESERT

STAY ON THE TRAIL

The Moab landscape is both beautiful and fragile, and home to many plants and animals (and humans). Even the soil is alive! As more and more people come here, we all need to be more careful about reducing our impacts.

Please, when you go out into the desert, show respect for the land, the wildlife, and for the other people who live and play here. Stay on roads and trails that have signs marking them "open." The desert and all its inhabitants will thank you.

design by Laurel Hagen www.fishwifegraphics.com

sponsored by the Moab Area Travel Council, www.discovermoab.com

concept by Moab Solutions, www.moab-solutions.org

Bob & Shirley Keniston, Leaders

Beautiful Day Canyon Point is accessed from the Island in the Sky area near Deadhorse Point, and descends a bumpy five miles to an overlook of the Colorado River at a section called Lake Bottom. The trail retraces the route down on its return, so all the short drops become obstacles that must be ascended to return to the well traveled Deadhorse Point Road. This trip is designed to be pleasant, family style scenic trip for those that pay attention to the ratings and bring an appropriate vehicle and driving skills to match. Those looking for Yahoo Jeeping will be disappointed, and novices are advised to choose a different trip also. Approximate mileages: 70 overall, 10 off highway.

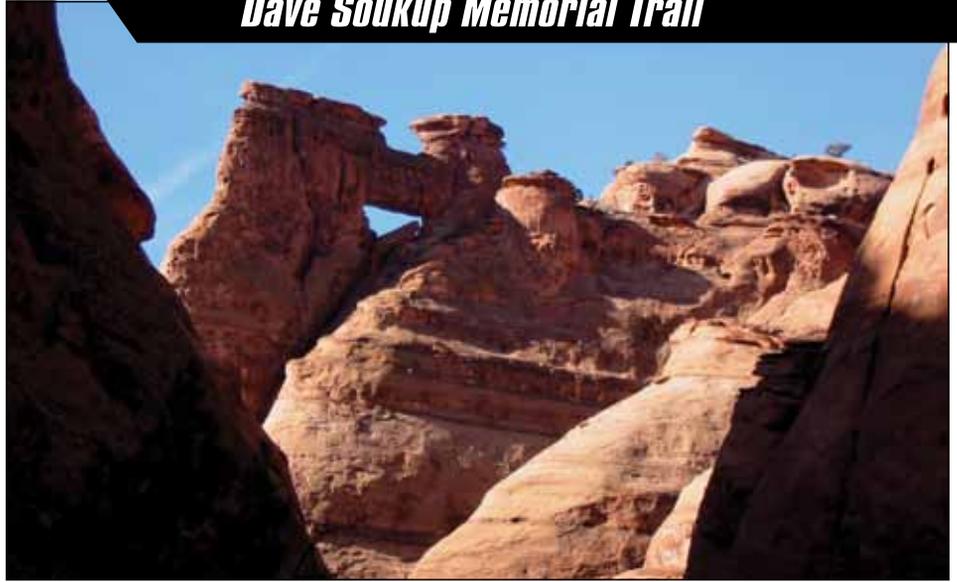

Scenery: Bordered on the north by Day Canyon, the south by Long Canyon and on the east by the Colorado River there is scenery everywhere you look on this trip. The La Sal Peaks are constantly in view on the descent, distant views of most of the Golden Spike Trail, parts of the Poison Spider Mesa Trail, the Monitor and Merrimac Buttes, Gooney Bird Rock, Jeep Arch, the Moab Rim Trail, and the far end of the Cliffhanger Trail can all be seen.

Road Surface: There are two track dirt sections, a lot of descents and climbs on slickrock ledges, and even the occasional section of smooth slickrock.

Highlights: The obstacles are small ledges that are encountered as different rock layers are crossed. Only one has earned a name—"Broken Bill Hill"—where a broken axle resulted in a wheel/tire/brake drum assembly abruptly departing from a Cherokee. Some notable rock formations have been named the Puppet Show and the Lodges.

There are even several arches that can be viewed with short hikes, but usually there is not enough time to accommodate them.

Wednesday April 17

Overtipping

by Ber Knight

Jeep Safari's 1,500 or so registered vehicles average a little more than two trails each, more than 3,000 vehicle-days of use. We have another average: two or three tipovers each year. Usually, it is just a tip on the side, but some have been real rollovers, a full turn or more. None of these has resulted in notable injury, thanks to seat belts and incredible luck for the few who were not buckled up. (An example of "incredible" is a Jeep rolling over its former occupant without quite hitting him!)

Most tipovers happen on the steep uphill climbs. We have several hills that have angles of 40° more or less. Vehicles can climb them straight up, but not sideways. Even when the hill is less steep, there are rocks, ledges, and holes that can cause a vehicle to have one wheel extra high and one extra low. These local tips can happen suddenly without warning. Always have the belts fastened.

When climbing a hill, try first as slow as possible; if a little more speed is needed, try again. If a lot of speed is needed, don't try; one bad bounce can turn you sideways.

We've seen vehicles raise both front wheels in "wheelie" style when an anxious driver punched the accelerator.

No one plans a sideways route, but the rocks and ledges can make that decision for you. Spinning wheels can turn you, too, and your on-the-spot reaction can be wrong. You should rehearse the situation mentally, then review it in your mind at each hill, so that you can instantly get off the gas and on the brake. There is that terrible temptation to keep going — you are almost there and you think the wheels may catch. I have personally watched four drivers stay on the gas too long, leading to a total of four-and-a-quarter turns for the four.

If you do get into that stopped, sideways condition, there is time to study your next move. The best move is to get a winch or strap from someone above to get the vehicle straight on the hill. Often you can turn the wheels properly and back slowly to the straight condition, but a strap from above is an extra measure of security for this move.

The downhill trip has its own hazards. It is difficult to see the ledge or hole that can shift a tilt gauge from a gentle angle to a tipover condition in a flash. It couldn't hurt to walk ahead and take a little peek; your eyes may roll a little, but it beats rolling the Jeep. Another downhill problem is abrupt braking. A tippy situation is aggravated by vehicle momentum when you slow suddenly. You should be creeping in gear to use engine braking as much as possible. If you don't start super slowly, you may be forced to let it go faster than you would like to avoid braking suddenly.

There are even safer ways to handle these hills. Many of them have easy bypasses. Not everyone has to do every hill every day.

All hills have opportunities to use the security of a strap or winch. It is my notion that anyone who hasn't been willing to take the strap out of a tight situation has his real four wheeling ahead of him.

If you have some four wheeling ahead of you, be sure you have the chance — buckle up!

ONE KEY CONVENIENT SECURITY!

BOLT
BREAKTHROUGH ONE-KEY LOCK TECHNOLOGY

Upgraded Axles that Deliver All the Benefits

When looking for the best option in aftermarket axles to handle extreme off-road conditions, you want increased torque capacity, power density and strength. Yet ideally, you'd like to avoid unnecessary vibration, keep overall weight down and maybe even realize better fuel efficiency. So which side should you lean to?

Today, you can have it all, thanks to advancements in design and new technologies from Dana Incorporated. Now, Dana offers high-performance axles that address not only torque-carrying capacity and power density, but also fuel economy and weight. To achieve all these benefits at once, Dana's axle engineers and designers took each component into consideration and started from the drawing board. They used what's worked in the past, yet pushed every element forward, to create the new line of Dana AdvanTEK® axles. AdvanTEK® axles are rugged yet lightweight and compact, offering best-in-class noise, vibration, and harshness (NVH) performance – all with greater power density.

If you're upgrading to bigger tires on your JL, you'll also need to upgrade your gears. Only Dana offers Spicer® AdvanTEK® performance aftermarket gear ratios that are an OE-quality exact fit for Dana AdvanTEK® axles.

Almost every facet of the Dana AdvanTEK® drive axle represents an advancement, each one working together for enhanced durability, efficiency and refinement. This technology is quickly making AdvanTEK® axles the axles of choice for original equipment manufacturers (OEMs). For example, every new Jeep® Wrangler JL now comes equipped with Dana AdvanTEK® axles, right from the factory. With these new Wrangler axles, increased strength comes from upgraded steel on the tube assembly, increased front axle tube diameter, and thicker suspension mounting brackets. Better ground clearance is delivered by a decreased pinion offset on the electric locking differential. Multiple seal improvements offer maximum muddy water protection. The gear design, improved pinion bearing technology, and axle disconnect system work together to provide increased fuel efficiency. And it's all only from Dana.

Currently offered as the Dana 35™ AdvanTEK® and the Dana 44™ AdvanTEK®, AdvanTEK® aftermarket ring and pinion options from Dana are a perfect fit for the AdvanTEK® system on a Jeep® Wrangler JL. Discover the difference that a genuine Dana axle can deliver, and get the most out of your off-roading experience!

SPICER®

AdvanTEK® 
PERFORMANCE GEARING

Only genuine Spicer® AdvanTEK® ring and pinion gears for Dana AdvanTEK® axles give Jeep enthusiasts the ability to handle the most extreme off-road conditions.

- The Spicer® gearing found in Dana 44™ axles has a 226mm ring gear size.
- The smaller, 220mm Spicer® ring gear in Dana 44™ AdvanTEK® axles pairs with an increase in other gear tooth attributes to supply improved durability, and to increase torque by 8%!

Contact your Spicer Sales Representative today to learn more about AdvanTEK® axles from Dana, or visit SpicerParts.com/AdvanTEK44

The National Park Service likes to keep its trails readily available to the public and not cluttered with large groups. Again this year we plan to use this trail under controlled conditions on weekdays. The trail enters the beautiful small canyons, called “Grabens” in the Needles District of Canyonlands National Park and is renowned for its challenge to stock vehicles. Because of the most recent permit restrictions, the trail is limited in size. The popularity of the trip, combined with this last round of restrictions, has led the Club to offer the trip more times

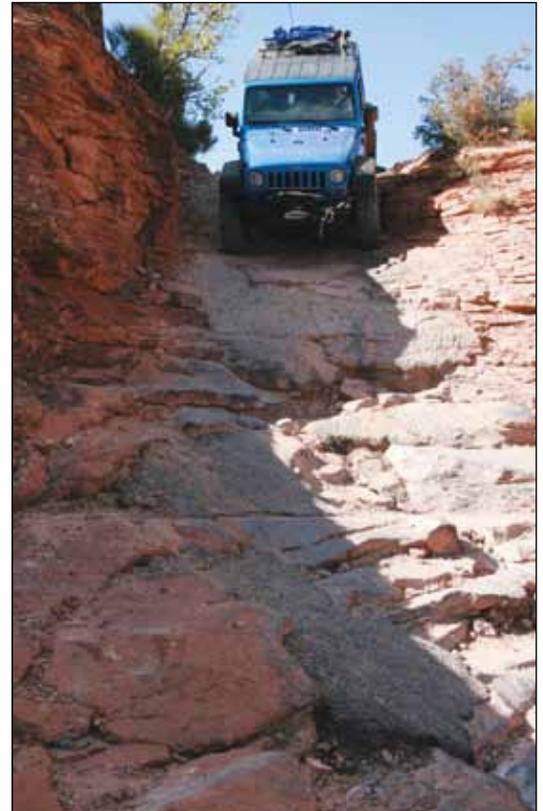

during the week, but with an overall group size of ten. The leader of each trip will pick among the options available. The variables that effect each leader’s choice are: group travel rate, group size, Safari activities in Moab that participants desire to attend, weather, road conditions, etc.

All choices will include the famous Elephant Hill. From there one choice will be to walk the Joint Trail, a fascinating narrow and deep crack in a rock layer. The other option will walk to an overlook of the deeply entrenched confluence of the Colorado and Green rivers. A fast traveling group that has no evening plans in Moab could possibly do both. Participants have to trust our leaders to make the right choice for their group. Approximate mileages: 178 total, 22 off highway.

The restrictions we put on the signups for this trail are really worth noting, so you can avoid throwing away your registration money. First, your vehicle must be capable of sustaining a 55mph speed on the highway since the trip involves about 75 miles of highway driving each way. Next, your vehicle needs to carry enough fuel for 180 miles of travel, because fuel may or may not be available at the Needles Outpost. Third, the National Park Service will require the normal entrance fee be paid and that all NPS rules be followed by participants (visit NPS.gov to determine current fee).

Rules say pets are not allowed on the 4x4 trails even in vehicles, and the NPS inspects for street legality of vehicles and will refuse to allow those blatantly non Utah legal to enter the park. Our leaders

cannot help you if the NPS refuses you entrance, they have to abide by the rules and take the legal group in and leave you behind! Fourth, our final restriction is no long wheelbases (over 116”).

Scenery: The tall cliffs lining the rivers are similar to those seen near Moab. Most of the surface rock formations, however, are of the Cedar Mesa Sandstone Formation, which produces the spectacular colors of the canyons, spires, and balanced rocks that give the Needles District its name.

Road Surface: The ridge crossings are mainly rock ledges while the roads in the bottom of the grabens are mostly fine powder laced with a few rocks.

Highlights: Elephant Hill itself features difficult climbs in both directions- even after cement was added to some ledges to obviate the need for chinking them with loose rocks. There are other ledges between grabens, and a little slickrock over the Silver Stairs.

What You Need On The Trail

Unless your Jeep is a lot bigger than mine, you won't be able to carry everything you might need, but it can't hurt to try. Here are some thoughts on the most important items.

Bring lunch. We suggest that you include a good supply of beverages, and we urge you to make them "soft" drinks. Water is an excellent choice. The dry climate requires that you drink more than you might expect, even on the cooler days.

Bring "spring" clothing for spring weather; the range of temperatures during the day may have you changing outerwear again and again. Past Safaris have experienced days bordering on hot and days with snow and cold wind — not likely, but not unusual in the Spring.

A Citizens Band (CB) radio is not required but is highly desirable for group travel. Communication is important for safety and keeping the group together; you can be warned of road damage and can be aware of stalled vehicles. Furthermore, your trail

leader will be telling those "with ears" what is going on at the front of the line and may share pleasant tidbits of local geology and history.

Bring all the emergency gear you can reasonably carry, including personal items like sun lotion. You know the rest...first aid, tow strap, fire-extinguisher, jack, spare tire, etc. Make that tow strap the kind with loop ends; any hooks should already be secured to the vehicle. And remember, your registration fee doesn't include towing insurance, although we and other buddies often help when we can. The most experienced drivers have learned which parts are likely to fail on their vehicles, and they are often willing to make loans to the less fortunate.

Fill your tank, few trails require extra fuel. The longest trips, the Hole in the Rock and Hotel Rock, may require fuel stops along the way. Elephant Hill is 175 miles total, but only two others (Dome Plateau and Top of the World) come near to being 100 miles.

Do bring a suitable four-wheel-drive

vehicle. The term "jeep" in the event name should imply that we expect high-clearance, off-road vehicles with two-speed transfer cases. Neither motorcycles nor ATV's are suitable because their pace of travel is incompatible with the trucks. It is impractical to include vehicles that are not legal for use on the paved roads.

If your truck is showroom new, study the trail descriptions or talk to our experts. Some trails have many opportunities to scratch the paint and sheet metal, and you should be forewarned. Otherwise, stock vehicles should be capable of most 3 rated trails, but some of the newer, larger SUV's may want to choose a notch easier on the rating scale. Check on the trail specifics if you have long wheelbase, long overhangs, or fancy paint. Be wary if you have installed "rock-magnets" like driving lights or running boards as they might not make it to the end of the trail.

Melissa Fischer, Leader
Tuesday 4/16 9:00 am

Historically the Benefit Run has been a Ladies Only Run but, in the past few years the men have been invited too. You and your honey can take turns driving the family four wheel drive. Men were persecuted in the past by having been made to wear a skirt or dress if they were caught driving; this has made for some really good entertainment on the trail. So, if you feel strongly about it boys, break out those heels, but you are invited to drive now. The Charity ride benefits the Susan G Komen for the Cure Breast Cancer Foundation.

See the regular Fins & Things trail on page 100 for a complete trail description. The extra elements for this unique day are: a voluntary donation of \$10.00 per vehicle and a special BBQ hot dog lunch provided by the club for everyone and served on the rocks. Additional donations would of course be welcome. The Red Rock 4-Wheelers will match every dollar donated 1 for 1.

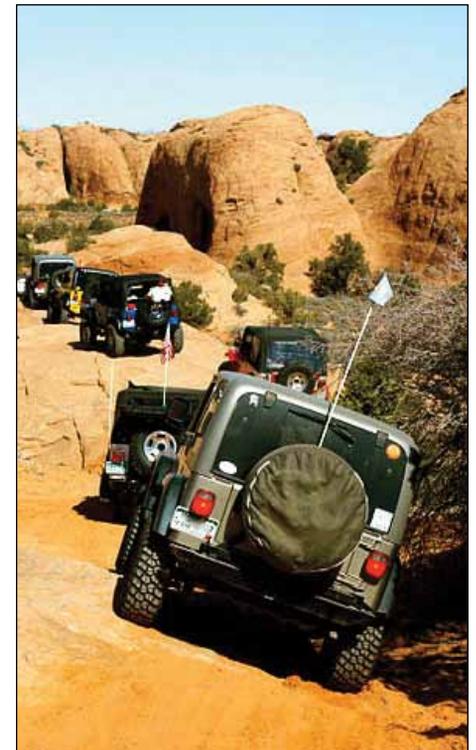

Together with your help we were able to send the Susan G Komen Foundation \$11,976 since we started the Club matching program. Hopefully, we all made a difference!

NOTE: For those who are unaware, the Susan G Komen for the Cure Foundation was formed in 1982 to honor Susan's courageous fight against breast cancer, which currently strikes 1 out of 8 women in their lifetime. It also strikes

men, although a much smaller percentage. This disease affects the whole family. Visit www.komen.org for more information. Make a difference combating this disease and have a good time doing it.

Associate Leaders:

Barb Limone, Liz Fisher, Susan Stevens.

Are You

Being

Followed?

Please Be Sure of It!

Our trail leaders become really weary of hearing on the CB “which way did they go?” Worse is not hearing it when there are big gaps in their string of vehicles — sometimes to the point of vehicles taking the wrong road. The problem is so easy to avoid and so hard to recover from.

The ideal way to avoid that problem is to have each driver keep track of the one behind him, especially at trail junctions. If the driver ahead will do the same, the line stays intact and the leader can be aware of breakdowns or problems soon after they happen — not when he is another mile ahead. (There remains an obligation, of course, for all to keep moving at a reasonable pace.)

When a gap does develop, it is usually possible to see which way a couple dozen vehicles went by looking for fresh tire tracks or watching for dust clouds.

Finally, one of the blessings of having Citizen Band radios is the communication we can have throughout the line.

Please keep the assigned channel free for important — possibly emergency — information to be passed along.

Each trail has its own channel assignment, but channel numbers 37 and higher are free for your personal chatter.

“Fins” are the Navajo Formation slickrock northeast of Moab, and the “Things” are what remains as the fins erode. The fins started as wind blown sand dunes some 200 million years ago. They got cemented into sandstone, and they are now going full circle back to sand blowing in the wind. The trail is reached via Sand Flats Road, and the territory it covers is the rolling country east of the Hell’s Revenge Trail and between Negro Bill Canyon and the North Fork of Mill Canyon. There are a few sudden and steep climbs/descents on and off the slickrock that can be difficult for vehicles with long overhangs. Any tire will do on the slickrock, but the added clearance provided by tall tires is always an advantage, while an aggressive tread helps in the sand. Approximate mileages: 25 total, 13 off highway.

Scenery: The views near and far are exceptionally scenic. The Navajo mounds and fins are themselves interesting, and the deep canyon system of Negro Bill adds a special dimension. Farther to the east are the red mesa rims at the base of the snow covered La Sal Mountains.

Road Surface: Most of the travel is on slickrock or very sandy dirt. Some of the climbs are aggravated by a loose sand approach.

Highlights: The trip is similar to a roller coaster ride that goes on all day. “Frenchie’s Fin” and “Kenny’s Climb” are about as steep as we can do.

INTRODUCING THE ALL-NEW **ENDURO**Sport™ SUSPENSION LIFT

Simply the best way to fit 35-37 inch tires on a 2018-2019 Jeep Wrangler JL.

Dynatrac-engineered spring rates and shock valving provide better ride quality, handling and stability.

Giving you the *Confidence to Explore™*.

THE STRONGEST, MOST DURABLE AND HIGHEST GROUND CLEARANCE AXLE SETS FOR THE JEEP JK AND JL

HARD CORE PLUS Pro**ROCK XD60/XD60** AXLE-SET™

Better than plain old “one tons,” the ProRock XD60® axles provide unmatched strength and ground clearance.

ELITE Pro**ROCK XD60/80** AXLE-SET™

For those who will not settle for anything less than the very best drivetrain durability, quality and extreme performance.

Larry & Linda Olsen, Leaders
Thursday 4/18

Hey Joe Canyon, a site of some mining ruins, is a short tributary of Labyrinth Canyon of the Green River. To get to the canyon, one must travel about 20 miles of pavement and 10 miles of good dirt road to the rim of Spring Canyon. Then the trip starts a spectacular ledge road that winds down a 600 foot cliff to the canyon bottom. The trail then follows the canyon bottom about 2 miles to the Green River. It then turns upstream about 9 miles along the river to reach Hey Joe Canyon. The trail along the river is subject to rock falls from above and collapses from below. This causes the club to expect maintenance trips in the early spring to repair fallen sections and prune Tamarisk growth along the Green. Moderate to heavy brush contact should be expected. Approximate mileages: 85 total, 45 off highway.

Scenery: The access roads include the paved one in Sevenmile Canyon, and good dirt roads in the open plateau country near Spring Canyon. Spring Canyon is a jewel. The trail intersects with the Green River at Bowknot Bend, a large loop of the river where the river doubles back and threatens to short cut the loop in the near future, geologically speaking. There are abandoned mining roads on both sides of the river, and remains of the cable that ferried equipment across the river may be seen.

Road Surface: The road into Spring Canyon once carried ore trucks and heavy equipment but it still remains subject to erosion from storms. Although it is a part of Grand County's maintained road system, recent storms and maintenance priorities usually determine the challenges this trip presents. The trail in Spring Canyon and Labyrinth Canyon are good dirt except where erosion has narrowed them or left rock falls that require hand labor to make them passable.

Highlights: There are no fixed obstacles on this route; the hard places move around as erosion continues. Some of the older rock falls have been crossed so much they are getting easy, but who knows what this year will bring. Wet weather would require substitution of this trip with one of equal rating; the trail is scary when dry and terrifying when wet.

Trail of the Month

The "Trail of the Month" is held each month on the third Saturday of the month. The "Trail of the Month" is open to all those who have a four wheel drive vehicle. Trails run from easy to very difficult. The ratings are shown for each monthly trail. This is a no charge event.

The group meets at City Market on Saturday morning at 9:00 AM. They will meet in the northwest corner of the parking lot usually on the 3rd weekend. On special occasions we will have the "Trail of the Month" run away from Moab locations. In past years we have planned various locations. They were the Rubicon Trail in California, Sand Hollow Trails in Hurricane, Utah, and the Black Bear Pass in Ouray, Colorado. Normal attendance is 15 to 20 jeeps with 30 to 40 participants.

We have had guests from many states including Canada and Mexico. CB Radio's make the trip more interesting as you learn historical facts about the area, as well as, information about the trail. There will always be a trail leader, mid gunner, and trail gunner to help participants along the

trail. Plan on bringing your lunch, as this is a great time to meet the other guests and develop new jeeping friends.

"Trail of the Month" is a great way for newcomers and families to get involved, at no cost, to see how they enjoy the four wheeling experience. Trails will vary in ratings so we offer something for everyone.

The "Trail of the Month" committee develops trails for the next year, with approval of the Executive Committee, then announces in the club newsletter. See the monthly newsletter, Facebook Page, or Club Web Page at rr4w.com for current details of upcoming trails. You may contact John Marsh, "Trail of the Month" Committee Chairman, at (435)259-ROCK for further information.

TRACTION SYSTEMS

GRIP LOK

POWERTRAX GRIP LOK is the ultimate traction solution! Mechanically-actuated traction control gives you the strength of a spool when you need it and smooth operation around turns.

GRIP PRO

POWERTRAX GRIP PRO uses 3x2 spiral gear technology, to deliver progressive traction. Throttle input puts you in control of how much traction is applied.

GRIP LS

POWERTRAX GRIP LS is our clutch-type differential in a forged steel case. Using carbon-fiber and steel friction plate technology, this limited slip is easy to service and rebuild.

NO-SLIP

NO-SLIP's precise synchronization mechanism eliminates ratcheting sounds that can be heard with other lockers. Easy to install without affecting your ring and pinion settings.

LOCK-RIGHT

LOCK-RIGHT is perfect for straight-line performance and heavy off-road use. The original lunch box locker! Easy to install without affecting your ring and pinion settings.

EXTREME TRACTION SYSTEMS!

This Trail is Day 2 of the Sophomore Package

James Broadbent, Leader

The Sevenmile Rim Trail leaves US Highway 191 just north of UT 313 about 11 miles north of town. It passes the old Cotter uranium mine and switches back to reach the cliff rim above the mine and highway 191. The intense mining activity left a maze of core-drilling roads on the mesa top, and the trail seeks the most interesting of these. At the southern end of the rim it turns west to parallel UT 313 as it heads up Sevenmile Canyon. Along the way Uranium Arch is visited. The trail joins other roads in the vicinity of Merrimac Butte and Monitor Butte before tucking up near Big Mesa. It passes near Determination Towers before using Tusher Pass to dip into Tusher Wash and the interesting environs beyond. Approximate mileages: 50 total, 21 off highway.

Scenery: The trail route is near the Moab Fault, a geologic fracture that left the trademark rocks of Canyonlands standing higher than the surrounding colorful Morrison Formation. Entrada Sandstone cliffs are constantly in view. The rim views include Sevenmile Canyon, the Arches National Park area, and the Book Cliffs to the north.

Road Surface: There is considerable two track dirt trail, lots of slickrock, some sandy sections, a sandy wash bottom, and a sandy hill near the end.

Highlights: The cliff rim portions are mainly scenic, Uranium Arch can be walked across. The south side of Merrimac Butte has exciting sidehill slickrock driving and is near Wipe-Out Hill, which can be visited if there is time.

The last part of the trail, if used, runs the reverse direction of the Wipe Out Hill Trail in the Tusher Canyon system, and finds easy hills of that trail to be hard, and vice-versa.

Associate Leaders: Jr Adams, Paul Anderson, Ashley Archibald, Bob Bavin, Joseph Bovaconti, Matt Bray, Jon Campbell, Larry Ellertson, Michael Fisher, Clark Hendrickson, Casey Jensen, Kent Jensen, Inge Lanckman, Doug Lee, Valentin Magdeleyns, Christine Mathe, John Marsh, Warren Neilson, Leon Olson, Carl Richards, Doug Rydalch, John Santi, Jim Sparesus, Dieter Theony, R Lance Wade, Don Williams, Justin Williams, Paul A Williamson, Julianne Wish.

Scenery: The colorful Entrada Sandstone of Big Mesa, atop the white Navajo Sandstone layer provides the initial scenery. Once Wipe-Out Hill is ascended, the Merrimac Butte, and then the Monitor Butte, are each visited. A short sandy section precedes the ascent of Sevenmile Rim. Once up on the rim views down into Sevenmile Canyon, and then views east toward Arches National Park provide the remaining scenery.

Road Surface: The majority of this trail alternates between slickrock surfaces and sandy surfaces.

Highlights: The descent of Rattlesnake Hill and the ascent of Wipe-Out Hill, as well as a sidehill section along Merrimac Butte provide the majority of the four wheeling excitement. Uranium Arch is interesting to visit and the bumpy descent from Sevenmile Rim will keep drivers awake at the end of the trail.

Tip Toe Behind The Rocks Trail

This Trail is Day 2 of the Junior Package

Wednesday 4/17

Jake Jacobson, Leader
Saturday 4/20

This trail tours the “Behind the Rocks” country, just like the regular Behind the Rocks Trail, but only passes near the nasty hills at High Dive Canyon and White Knuckle Hill for the amazement of those who keep their driving to the lower rated trails. The Tip Toe routes intersect the difficult version of Behind the Rocks, and even shares a few miles of easy trail portions, but the portions that are exclusive to this trail are especially scenic. The difficulty rating was bumped a while back due to continued erosion of some rocky descents where we usually have to stack a few rocks every trip. Approximate mileages: 53 total, 33 off highway.

Scenery: The rock layers slope downward behind the cliffs of the Moab Rim, and the virtually impenetrable Navajo Sandstone domes and fins of the Behind the Rocks Wilderness Study Area are in view most of the time. Balcony Arch, Picture Frame Arch, and Pritchett Arch are all seen. There is a spectacular pour off of Hunter Canyon with a small natural bridge above a pool and hanging gardens that are fed by perennial dripping springs.

Road Surface: Most of the trail is sandy dirt with occasional rock outcrops.

Highlights: There are a few minor drainage crossings that have exposed rock ledges requiring a bit of technique to climb with equipment that is close to stock. The downhill route into Hunter Canyon may require some rock repositioning to carry those with less lift and tire diameter. Even so, the sound of metal skid plates on rock will be common.

To be used:

Nena Barlow, Leader

Not your typical trail run! The primary point is NOT to actually run the entire trail, but to use a variety of the different terrain and obstacle types found on portions of the trail for training purposes.

The 4wd Skills Day takes place in the Tip Toe Behind the Rocks area. This trail will allow us to utilize the variety of terrain and obstacle types you encounter on other trails. The Officials hope to help drivers develop their solid 4wd techniques. You will become aware of vehicle dynamics, preparedness, basic recovery and safety.

Drivers will learn how to analyze rocks, hills, ledges, and sand and make effective driving corrections, under the guidance of seasoned 4-wheelers and professional instructors.

4-Drive Skills Day for Winching and Hi-Lift jack techniques and instruction will also take place on this trail.

As we have stated, you will not be traversing the entire trail which tours the "Behind the Rocks" country just like the regular Behind the Rocks Trail. Instead we will be using areas of the trail where you can learn the "how to" of approaching obstacles and different terrain and how to choose your own line of ascent/descent. See Tip Toe Behind the Rocks Trail in the TRAILS tab for a full trail description.

Scenery: The rock layers slope downward behind the cliffs, and the virtually impenetrable Navajo Sandstone domes and fins of the Behind the Rocks Wilderness Study Area are in view most of the time. Balcony Arch, Picture Frame

Arch, and Pritchett Arch may be seen at a distance. There is a spectacular pour-off of Hunters Canyon with a small natural bridge above a pool and hanging gardens that are fed by perennial dripping springs.

Surface: Most of the road is sandy dirt with occasional rock outcrops.

Highlights: There are a few minor drainage crossings that have exposed rock ledges requiring a bit of technique to climb with equipment that is close to stock. The downhill route into Hunters Canyon may require some rock positioning to carry those with less lift and tire diameter. Even so, the sound of metal skid plates on rock will be common.

To be used:

- Monday 4/15
- Wednesday 4/17
- Thursday 4/18

Associate Leaders: Matt Balazs, Gene Day, John Marshall.

Gold Bar Rim Trail

Richard Jenkins,
Leader

Gold Bar Rim is a cliff rim that stands about 1200 feet above US 191 in Moab Canyon. Because the rocks behind the cliff slope downward to the southwest, the rim has a 360 degree vista. Gold Bar Canyon drains away from the rim into the Colorado River. The trail climbs to the rim in stages, first angling up to Little Canyon, then working its way across Gold Bar Canyon to follow the slope of the Wingate Sandstone up to the rim. Approximate mileages: 47 total, 25 off highway.

Scenery: The Gold Bar Rim vistas take in almost all of the local country, including Moab and the Spanish Valley, the La Sal Mountains, the Book Cliffs, and parts of the Colorado River canyon.

Road Surface: Most of the miles are typical of our trails, sandy dirt punctuated by some surface rocks. There is quite a bit of slickrock near the rim, a little bit of blow sand in Bull Canyon and Little Canyon bottom, and some rocky wash bottom in Bull Canyon.

Highlights: The scenic view from the rim has already been mentioned. The most difficult four wheeling is in crossing Gold Bar Canyon and then ascending to the rim. Some prefer to walk the last 100 feet to the rim rather than risk the sheet metal damage that has befallen others on the last rocky step up. The obstacle that drives the trail rating is a big rock ledge on the return across Gold Bar Canyon. Dubbed “The Waterfall”, many vehicles have required assistance to get up it on the way back.

FB.COM/RIMROCKERTRAIL

Maurice Brown, Leader

This trail starts and finishes southwest of Blanding, Utah in the vicinity of Comb Ridge on the southern side of the Abajo Mountains. Hotel Rock is located on Little Baullie Mesa. The trail is about 18 miles round trip that includes steep rock climbs, a narrow rock section with a rock wall on one side and a drop off on the other, dirt and rock trail surfaces, some sandy wash bottom, and a nice overlook of Arch Canyon. Approximate mileages: 200 miles, 18 off highway.

Special considerations: Because the trailhead is about 90 miles south of Moab your vehicle must be capable of maintaining a 55 mph road speed over that distance. A fuel stop will be made just outside Blanding at Shirttail Junction at the intersection of US 191 and UT 95.

118 - 2019 Moab Easter Jeep Safari

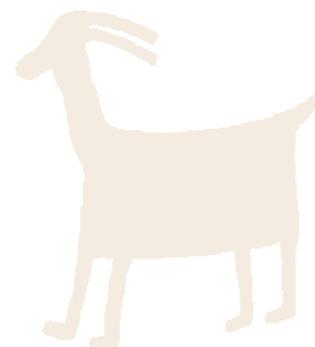

Scenery: Scenery starts immediately upon departing Moab. It varies from desert views to mountain scenery as one approaches Monticello. It gradually returns to desert scenery at Blanding. Comb Ridge is very visible from UT 95 as the trailhead nears. Hotel Rock is a very intact old Anasazi lookout.

Highlights: Hotel Rock is the highlight of the trip, but there are so many other exciting things to the day. The entire road trip is an experience, and the 4 wheeling is guaranteed to keep everyone's interest as well.

Associate Leaders: William Boldt, Ross Engle.

To be used:
Big Saturday 4/20

More Trails

The Easter Jeep Safari trails are hardly more than a sample of the opportunities to explore this fascinating country. As you travel most of the trails, you may see many road junctions along the way. For Red Rock 4-Wheelers events, we have put together sections of roads that make interesting one-day trips and gave them names that either are historic or are intended to be enticing.

Grand County has more than 6,000 miles of roads — that's a little more than half a mile for every man, woman, and child living here. The county routinely maintains about 1,700 miles of those roads to be passable for two-wheel drive (barring bad weather or recent wash-outs). The rest may be occasionally repaired by the county, but in most cases they are maintained by their users barely well enough for their intended use. And that leaves a tremendous variety of roads to wonderful places.

The roads are usually not rough four-wheeling all the way, nor are they all a cruise in the park. Typically, the roads were originally pretty well constructed and remain fairly easy over most of

their length, but a few erosion gullies or rockfalls may leave them close to impassable. There may be some rather dull miles, but there can be delightful surprises in the way of scenery, remains of historic activities, and driving challenges.

The Book Cliffs area, for instance, appears to be stark country from the highway, but is colorful and beautiful in the higher elevations (and muddy...watch the weather!). Safari activity barely touches the Dolores River area. The Dolores Triangle can be reached by river ford in low water times. The west side of the river has many old mining roads. Access has been improved by Red Rock 4-Wheelers repairs on a couple of roads. See a map for Sevenmile Mesa, Blue Chief Mesa, Big Pinto Mesa, and others. Come back after the snow melts for the La Sal Mountains, Adobe Mesa, Fisher Mesa, or Polar Mesa.

Not far from Grand County, and West of the Green River, the San Rafael desert is interesting and the San Rafael Swell is huge and fascinating. To the south, some Safari trails are in San Juan County,

where there are mountains and canyons that deserve more traffic than they get. The well-known Colorado areas around Telluride, Ouray, and Silverton have some of the finest mountain scenery on earth. Closer to Moab, just across the Utah border is more "canyon country" with exceptional beauty, many mine ruins, and fascinating geology. Watch for Sinbad Valley, Paradox Valley and surrounding mesas, Bull Canyon, and other canyons to the south where explorations are inadequate.

Maps?! Carry all you can, because no single map gives all the information, even in a small area. USGS topographical maps, both 1:100,000 metric series and 1:24,000 quadrangles, are almost essential despite being sadly lacking in road information. San Juan County (check with the County Clerk in Monticello) has a book of color maps based on USGS 7½-minute quadrangles reduced to half size but augmented with information on their county roads gleaned from their GPS surveys.

Bill & Christine Dean, Leaders

The Cameo South area is some 25 miles south of Moab in an area that is relatively new to Jeep Safari. One of the early day club members, Jack Bickers, explored the old mineral exploration trails in the area during the 1990s. Jax Trax is a tribute to Jack, created by combining trail segments to provide some four wheeling challenges and provide views of the abundant scenery of the area. Those looking for extreme jeeping will be disappointed, and novices are also advised they may want to choose an easier trip as well. Approximate mileages: 82 overall, 22 off pavement.

Scenery: Bordered on the north by Wilson Arch, the South by Steen Road, on the east by Lisbon Valley and the west by US191, there is abundant scenery on this trip. Cameo Mesa, Agate Point, Mikie's Knob, and Casa Colorado Rock are some notable features, while the LaSal Mountains tower over the area and the Abajo Mountains are very visible in the distance.

Road Surface: There are some sandy wash bottoms, some two track dirt

sections, lots of climbs and descents on slickrock, and a shelfy hill or two.

Highlights: The rating number gives the hint there won't be many obstacles worthy of names, but Jack did leave us with the "Top Notch" and "El Diablo" monikers. The latter, while not technically difficult for most vehicles, can be intimidating to the driver. Don't worry, there is an easier bypass. Many obstacles consist of small ledges that are encountered as different rock layers are crossed, some sandy sections through sagebrush can be soft, and there are a few rubble strewn hills.

SAFETY ON & OFF THE ROAD

As of February 21, 2018 Skyjacker® Suspensions passed the rigorous FMVSS No. 126 testing requirements on all Jeep Wrangler JL lift systems. The National Highway Traffic Safety Administration (NHTSA) established the Federal Motor Vehicle Safety Standard (FMVSS) No. 126 that requires testing of all new passenger vehicles under 10,000 lbs GVWR that includes Electronic Stability Control (ESC) system through a series of evasive lane-change maneuvers at highway speeds to ensure the driver can safely maintain control in critical driving situations. Skyjacker systems are proven to work in harmony with the Electronic Stability Control (ESC) system and has demonstrated compliance with these safety standards utilizing the advanced testing technology by Link Engineering that involves robotic steering & outrigger equipment.

Skyjacker voluntarily has these tests performed to assure our customer's safety.

Debi & Brian Nish, Leaders

The trail begins at the spring fed water tank on the Sand Flats Road about 9 ½ miles from Moab. It quickly drops down to a ledge above Negro Bill Canyon. It follows the narrow terraces above the upper slopes of the canyon. It then drops into a small drainage and begins the rocky ascent to the top of the rim and some of the best scenic vistas we have to offer. Lunch usually is planned for “Picture Rock”, a slab of rock that juts out over Castle Valley. The trip then retraces the route back to Sand Flats Road. Be advised that the majority of this trail is continuously bumpy. Approximate mileages: 32 miles total, 6 miles of 4 wheeling.

Scenery: There are canyon’s edge views into Rill and Negro Bill Canyons. Along Porcupine Rim elevations are as

high as 6800 feet, 1500 feet below is Castle Valley with its prominent buttes: Castle Rock, Priest and Nuns, Parriot Mesa, and Round Mountain. The La Sal Mountains to the southeast make a great backdrop for pictures.

Road Surface: Although there is some slickrock, most encounters are with bedrock poking up in knobs and ledges that may spill your soda pop on the carpet. Because of the elevation the trail may have some snow or residual mud at Easter.

Highlights: There are some off camber ledges near the head of Negro Bill Canyon that can test your vehicle’s articulation. As the rim is approached the rocks protruding from the roadbed get larger and more frequent. Between the first and second overlooks are some large rock ledges that could hold up traffic going each direction, particularly on the return trip. “Picture Rock” can cause the driver some anxious moments getting into position, but the picture can be spectacular.

This trail tours a region south of Canyonlands Airport and west of Highway 191. It uses portions of Bartlett Wash, Tusher Canyon, Courthouse Pasture, and the south cliff base of Big Mesa. Variety is its strong point, with a wide range of scenery and trail surfaces, and a few challenging hills. Approximate mileages: 43 overall, 19 off pavement.

Scenery: The landscape varies from drab hills near the airport to the tall cliffs seen from Moab. In between are colorful canyons having colorfully banded Entrada Sandstone walls. Determination Towers, Monitor and Merrimac Buttes, and Big Mesa are some of the large rock features visited. For those who enjoy geology at least seven major rock formations that were deposited over a period of 100 million years (beginning about 200 million years ago) are traversed.

Road Surface: Early in the trip is a sandy hill that sometimes is a challenge. A little later Tusher Wash is usually wet, and features a narrow, rock filled obstacle

course that will have the wider, longer vehicles struggling to avoid sheet metal damage. There are a couple areas of slickrock, some rock ledges, and a few miles of sandy two track.

Highlights: There is a short hill just before Wipe-Out Hill that is begging for a name these days. Wipe-Out Hill is short but steep. Rattlesnake Hill has its bumps spaced right to give most vehicles a challenge in ascending it. The scenery from most locations along this trail is a highlight as well.

How To Reach Us Quickly

With the rise in electronic communication, we receive e-mails at our website rr4w.com. We may not get to them as quickly as you might expect, especially if you are one of the younger generation.

The Red Rock 4-Wheelers is a busy organization, but not a place of business in the usual sense. We have a post office box to receive our mail. Someone usually picks up the mail every day.

How many clubs do you know of that

have listings in the phone book? We do, but the phone is in someone's home. One of our members has an actual telephone with wires, but the number is often "call forwarded" to another home, chosen because that member is likely to be available with answers to your questions. When you call, that family may be out warming up the trails for you, may be working, may be eating, or may be attending to "personal matters" — just like at your house. Keep trying.

The club phone is likely to be available

to you between the hours of 8:30 a.m. and 10:00 p.m. Mountain Time. When you call, don't be surprised if you just get a "hello." The person answering may not know whether you called his home number or the club number. You won't spend any of your long-distance money talking to an answering machine; machine messages have been unsatisfactory for our purposes.

Our number is (435) 259-ROCK (435)-259-7625 in numbers.

Flat Iron Mesa Trail

SPLIT STARTING TIMES

Don & Karen Cravens, Leaders

Flat Iron Mesa is south of Moab, bound by Kane Springs Canyon on the north, Hatch Wash Canyon on the west, West Coyote Canyon on the south, and US191 on the east. A main road sports a BLM sign, but our trail leaves the highway earlier and it quickly gets 4WD status on numerous old trails that reach fine canyon overlooks and interesting 4 wheeling. There are multiple obstacles that provide the rating number; some have bypasses, some don't. If the Easter Egg Rock section is elected, once the excitement of squeezing past the rock has subsided, there is a harrowingly narrow section on a cliff edge that must be negotiated. Approximate mileages: 55 total, 17 off road.

Photo by Audrey Byrd

Scenery: There are views of the towering La Sal Mountains, local cliffs, and different canyons throughout the trail. The cliffs and canyon walls near Kane Springs and Muleshoe Canyons are especially beautiful. Hatch Canyon is about 700 feet deep at the overlook where West Coyote Creek joins it in a series of cascades.

Road Surface: Much of the trail is sandy dirt two track that is occasionally dusty and is always inlaid with bedrock. There are sections of slickrock, a gravel hill, and numerous rocky ledges.

To be used:
Sunday
4/14 8:00am
4/14 10:00am
Wednesday
4/17 8:00am
4/17 10:00am
and Big Saturday 4/20

Highlights: This trail offers such a wide variety of scenery and four wheeling challenges that is difficult to pinpoint individual spots. Of course the "Tilt A Whirl" and "Easter Egg Rock" obviously earned names for the four wheeling excitement, but there are many more unnamed spots sprinkled all along the trail that always keep it interesting.

Be Careful Out There ?

Smart 4WD occupants are in a pretty safe place on these trails; they are moving slowly and are belted into roll-protected vehicles. Once out of the vehicle, however, they face all sorts of hazards.

During the run of a difficult trail, you will find that the obstacles bring out large cheering sections. Everyone is ready to help, even to the point of pushing or trying to hold the vehicle upright. The driver, however, is concentrating on the rocks. He cannot be thinking about the guy who may lose his footing under the vehicle or anyone out of his sight. The vehicle may lurch forward or backward. It can literally jump sideways when it hits a rock.

Other pedestrian hazards begin when the winch line or tow strap comes out. Most four-wheelers know that wire cables and straps stretch under tension and are anxious to spring back. A cable is a terrible whip, and a hook at the end is

a deadly weapon. (Those ropes with metal hook ends are best used as weights to keep the lunch sack from blowing away; we hope someone will have a strap with loop ends.) Keep in mind that not all of these people are towing experts. Someone may have slipped a cable hook over a bumper. The one being pulled may have eagerly driven forward, putting slack in the line, just when the one in front gives an extra tug. The equipment may not be in top condition. Stand back! We strongly advise that your own vehicle have tow hooks. Failing that, a short piece of chain often facilitates a hookup to a secure frame point.

Pedestrians can be in further danger simply by walking on the rocky terrain.

We have had more than one incident of broken bones from small-scale falls. Worse than that, we have some large-scale cliffs — and you won't see guard rails on these trails. Many cliff edges are deceptively treacherous. Some are sprinkled with loose rock, while others have firm-looking rock that is weak and will break underfoot. Still others have no distinct rim; they just round off in ever-increasing slopes.

A couple of Jeep Safari trails go near abandoned mines. Old mines have risks not only of cave-ins but also of dangerous gasses that have accumulated without ventilation.

We urge you to use good judgment — and to share it with your kids and pets.

Welcome to Moab

“Welcome to Moab” is an immersive 4K theater film that provides an outstanding overview of the public lands and diverse activities possible around Moab. The film combines impressive 4K footage, time lapse photography, and aerial perspectives of the ruggedly spectacular public lands that surround Moab. This 20 minute free film is repeated throughout the day at the Moab Information Center (MIC), located on the corner of Main & Center Streets.

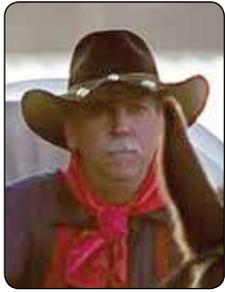

A STUNNING NEW 4K FILM

Now Playing at the Moab Information Center

While you are out enjoying Moab's public lands remember to:

- Take clothing layers for extreme temperature changes
- Take lots of water - at least 1 gallon per person per day
- Take food
- Know your location
- Take a cell phone and dial 911 in an emergency (if cell service is available)
- Carry first aid supplies
- Know the weather
- Keep canyon country clean - pack out your trash
- Leave historic sites, rock art, ruins and artifacts untouched
- Stay on established trails
- Don't bust the crust - protect fragile desert soils
- Observe posted speed limits - prevent excessive noise by driving slowly through residential neighborhoods

Mark Gonske, Leader

Our premier slickrock trail lies northeast of town between Sand Flats Road and the Colorado River. There are long stretches of slickrock where the 4WD trail has been marked. The most difficult obstacles are out of the stock vehicle class, but those can be bypassed. There are steep climbs and descents and some edges that aren't for the faint of heart. The steep slopes are not technically difficult because of the excellent traction on sandstone. In a few places the trail crosses the now famous "Slickrock Bike Trail", a motorcycle and mountain bike trail. Approximate mileages: 16 total, 12 off highway.

Scenery: The large vistas sweep full circle from the La Sal Mountains through Arches National Park to the cliffs that overlook the Moab Valley. The nearby country is an amazing stretch of bare sandstone with clefts and canyons, including the Colorado River Canyon.

TRAIL SPONSOR
TERAFLEX
Monday April 15

Road Surface: In addition to the slickrock, there are rock ledges, broken rock, sandy dirt, and a little blow sand.

Highlights: The first ascent offers an immediate challenge to first, get onto it, and then to overcome nervousness about the drops on both sides. The major slickrock area includes steep climbs, sharp turns, and a hair-raising descent along a steep ridge with little room for error left or right. Names like "Tip-Over Challenge" and "Rubble Trouble" offer an insight into challenges offered in the later portions of the trail.

Jeramey McElhaney, Leader

Poison Spider Mesa forms one of the cliff features that are a part of the Moab landscape northwest of town. The mesa is bordered on the east by the Moab valley and on the south by the Colorado River. Access is by scenic byway UT279. The trail ascends to the rim via the sloping rock layers. The first few miles of trail must be retraced, but a lot of the travel time will be spent on a loop that reaches the rim. It has become one of our most popular trails because it has great scenery and the jeeping is challenging enough to be fun without being a vehicle buster. Incidentally, we love the name, but the population of Black Widows is probably no greater than other local areas. Approximate mileages: 37 total, 16 off highway.

Scenery: The vista across the fins of the Behind the Rocks area toward the La Sal Mountains is as fine as they come. The rim view overlooks Moab 1,000 feet below and includes a 300 degree panorama. The usual lunch stop is a short hike to so called "Little Arch" that has a nice view of the Moab Rim Trail. Jeep Arch is seen clearly from the rim.

Road Surface: Much of the loop portion is on Navajo Sandstone slickrock, with one section of .4 miles of bare rock. There are numerous rock ledges, sandy wash bottom, and two blow-sand hills.

Highlights: After some initial switchbacks that travel is making tougher, and a sandy flat stretch, a sandy canyon leads to the "The Waterfall".

Ascent is over several rock ledges in the next quarter mile that give the trail its rating. There is an optional V notch section that makes for great pictures, either triumphant or tragic. The scenery all day is worth the trip by itself.

Associate Leaders: Robert Butner, Bob Dunsmore, Derek Dunsmore, Art Erwin, Dan Haak, Steve Hitt, Kellie James, Kevin Kimick, David Laws, Victoria Morgan, Mark Nichols, Chris Patrick, John Richards, Mike Tarvin.

Casey Kay, Leader

This trail's difficulty rating keeps moving around as the conflicting forces of trail erosion and trail repair modify the obstacles. The trail lies between Moab and the La Sal Mountains in the vicinity of Mill Creek, a major drainage from the mountains. It crosses the creek a few times and travels a lovely part of Mill Creek Canyon. It overlooks the North Fork of Mill Creek as it climbs the base of South Mesa on the skirts of the La Sals. It is yet another variation of our canyonlands landscape. Approximate mileages: 30 total, 15 off highway.

Scenery: Portions of the trail are in two beautiful, but different looking, parts of Mill Creek Canyon. Other portions ride the higher country toward the mountains and overlook the canyonlands vistas to the west from a 6,000 foot elevation.

Road Surface: Initially the creek bottom trail crosses stream washed rocks and the stream itself in a few places. The higher country has dirt and some sand, generously mixed with rocks and ledges. There is some slickrock on the descent to the southern creek ford.

Highlights: The initial section offers a gentle, sandy trip through creek crossings until encountering an extended hill of shelves with multiple approaches. Beyond this hill lie hills with many shelves. Next up is a loop offering "The Wall" and a fun slickrock fin. After a long bumpy but scenic section, a cattleguard is crossed to approach a rocky descent. Much volunteer labor has been expended to make this section safer to travel, yet it continues to defy those efforts. Extreme caution must be used here for a safe descent. Once past here, more scenic vistas and rocky shelves await, finally descending a slickrock section that ends with a crossing of South Mill Creek. As the sand erodes and the rock shelf protrudes this ascent is becoming more difficult.

tread lightly![®]
THIS PUBLIC SERVICE ANNOUNCEMENT IS POWERED BY

Gene Day, Leader

“Top of the World” is a viewpoint on Waring Mesa. It has a spectacular view of Fisher Valley, Onion Creek, and the La Sal Mountains, but this view is only part of a variety of landscapes seen from this trail. Waring Mesa is east of Moab and south of the Dewey Bridge crossing of the Colorado River. Approximate mileages: 74 miles total, and about 10 miles off-highway.

Pictures of your vehicle on the Top of the World overlook may not be part of your trail during Safari due to well being concerns for children and others on the trail.

Scenery: The Entrada Sandstone is beautiful wherever it is exposed, and we travel the base of a long stretch of its cliffs near the Colorado and Dolores rivers. The Top of the World viewpoint is a cliff edge above Fisher Valley and Onion Creek with the La Sal Mountains in the southern background, and there are vistas of distant plains and the Book Cliffs to the north.

Narrow Onion Creek canyon is different from anything else in the area.

Road Surface: There is some graded road, but most is broken layered rock. Shelves of varying sizes are encountered along the 4X4 section of the trip, both ascending to the overlook and then descending from it.

Highlights: The Top of the World viewpoint is worth the trip even without the other good scenery. The trail turns off Utah 128 at the site of the old Dewey Bridge (unfortunately burned up a few years ago). It uses a graded county road to climb a fair portion of the altitude gain necessary to get to the viewpoint, but when it finally departs from this road, the four wheeling fun begins in earnest. But this is not meant to discount the part

John Hall
Sunday 4/14
8:00am

Curtis Leonard
Thursday 4/18
8:00am

of the trail that is on the county road, as the colors in the sandstone rocks are spectacular. The four wheeling section features many sections of loose rock interspersed with several mean shelf type climbs that will test both vehicles and the driver’s resolve to reach the viewpoint overlooking Onion Creek. Once there the view is 360 degrees. Often times the winds here can be impressive as well with a flood of air rising up from the valley below.

Gate Etiquette Open or Close ?

This photo of a gate with no fence is supposed to be amusing, but gate etiquette is serious business.

Livestock grazing has been our most durable industry since this region was settled. Fences are part of the business, on public as well as private land. Fences keep the cattle in where they belong and out where they don't belong. Most of the fences you see are on public land where they define grazing allotments. Ranchers may obtain permits to graze livestock for a fee, but permits limit the number of stock grazed and specific dates during which grazing is allowed on a particular parcel.

Gates allow other land users to pass through, but we are unlikely to know whether they should be closed or open.

The usual closed condition keeps the cattle within the boundaries of the permits, and gates left open improperly may cause ranchers not only to lose stock but also to be disciplined by the management agencies for trespassing beyond their permits.

Sometimes grazing is allowed on both sides of a fence but water is available on only one side. During these times, leaving gates open can be a life-or-death matter for the livestock.

The rule of leaving gates the way you find them is pretty well known. Your choice may be difficult, however, when it appears that the last "tourist" may not have followed the rule.

A "please close gate" sign is a pretty good clue for appropriate action, as is a carelessly dropped gate. A rancher is not likely to drop a gate in a heap, especially if the posts are in the road where they can be run over and broken. A gate that was pulled wide open and laid along the fence was surely put that way because someone really wanted it open.

Handling gates may not be our favorite pastime, but it is merely a minor annoyance (avoid major annoyances by being careful where you step!). For the rancher, it is his living, and decent folks will not make it hard for him. Not only that, he is our best ally in keeping public lands open for multiple use.

Dave Christensen, Leader

The land named “Behind the Rocks” is an elevated area south of Moab bounded roughly by the Moab Rim cliffs and the rim of Kane Springs Canyon, which is still farther south and west. This trail follows the most difficult routes in this region, though it gets its reputation and rating from “White Knuckle Hill”. Going down the hill is scary enough, but be prepared for a long wait and a good show while some see if they can climb it. It may be the most difficult hill hereabouts that is ascended with any frequency, although the frequency is diminishing as it erodes. Approximate mileages: 55 total, 35 off highway.

Scenery: The rock layers behind the Moab Rim slope downward, and a virtually impenetrable area of Navajo Sandstone domes and fins is in view most of the time. Canyons, including lovely Hunter Canyon, are cut into older layers. Balcony Arch, Picture Frame Arch, and a distant view of Pritchett Arch may be seen.

Road Surface: Most of the road is sandy dirt with occasional rock outcrops. To get in and out of the many small canyons involves taking a bumpy trip over sandstone ledges.

Highlights: There is a warm up hill soon after departing the highway and numerous minor canyon crossings before reaching High-Dive Canyon, so named because it is a short walk to a “high-dive” pour off into a beautiful pool. The climb out is via “Upchuck Hill”. A few miles farther is “White Knuckle Hill”. All along the trail the views of nearby rock formations and the towering La Sal Mountains are exceptional.

What is Cyanobacteria?

Cyanobacteria, previously called blue-green algae, is one of the oldest known life forms. It is thought that these organisms were among the first land colonizers of the earth's early land masses, and played an integral role in the formation and stabilization of the earth's early soils. The earliest cyanobacteria fossils found are called stromatolites, which date back more than 3.5 billion years. Extremely thick mats of these organisms converted the earth's original carbon dioxide-rich atmosphere into one rich in oxygen and capable of sustaining life.

Cyanobacteria occur as single cells or as filaments. The most common form found in Colorado Plateau soils are the filamentous type, which are usually surrounded by sticky mucilaginous sheaths.

When moistened, cyanobacteria become active, moving through the soil and leaving a trail of sticky material behind. The sheath material sticks to surfaces such as rock or soil particles, forming an intricate web of fibers throughout the soil. In this way, loose soil particles are joined together, and an otherwise unstable surface becomes very resistant to both wind and water erosion.

The soil-binding action is not dependent on the presence of living filaments. Layers of abandoned sheaths, built up over long periods of time, can still be found clinging tenaciously to soil particles, providing cohesion and stability in sandy soils at depths up to 10 centimeters.

Nitrogen fixation is another significant capability of cyanobacteria. Vascular plants are unable to utilize nitrogen as it occurs in the atmosphere. Cyanobacteria are able to convert atmospheric nitrogen to a form plants can use. This is especially important in desert ecosystems, where nitrogen levels are low and often limiting to plant productivity.

The sheaths have other functions as

well. When moistened, they swell up to ten times their dry size. This ability to intercept and store water benefits both the crustal organisms as well as vascular plants, especially in arid regions with sporadic rainfall.

Sheaths, and the organisms they surround, also contribute organic matter and help make essential nutrients available to vascular plants. Negatively-charged clay particles, often found clinging to the sheaths, bring positively-charged nutrients, preventing them from being leached out of the upper soil horizons or becoming bound in a form unavailable to plants. Like soil stability, this function is not dependent on the presence of living filaments, but only the presence of sheath material.

ENVIRONMENTAL IMPACTS

Unfortunately, many human activities are incompatible with the presence and well-being of cryptobiotic soils. The fibers that confer such tensile strength to these crusts are no match for the compressional stress placed on them by footprints or machinery, especially when the crusts are dry and brittle.

Air pollutants, both from urban areas and coal-fired power plants, also adversely affect the physiology of these crusts.

Tracks in continuous strips, such as those produced by vehicles or bicycles, are especially damaging, creating areas that are highly vulnerable to wind and water erosion. Rainfall carries away loose material, often creating channels along these tracks,

especially when they occur on slopes.

Wind not only blows pieces of the pulverized crust away, thereby preventing reattachment to disturbed areas, but also disturbs the underlying loose soil, often covering nearby crusts. Since crustal organisms need light to photosynthesize, burial can mean death. When large sandy

Don't Bust the Crust!

areas are impacted during dry periods, previously stable areas can become a series of shifting sand dunes in just a few years.

Impacted areas may never fully recover.

Under the best circumstances, a thin veneer of cryptobiotic soil may return in five to seven years. Damage done to the sheath material, and the accompanying loss of soil nutrients, is repaired slowly during up to 50 years of cyanobacterial growth. Lichens and mosses may take even longer to recover.

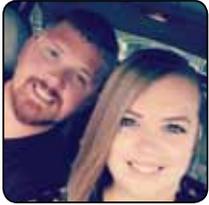

WHAT YOU CAN DO

The desert has been described as rugged, inhospitable, and unforgiving. Yet footprints and tire tracks can last a lifetime, damage cryptobiotic soils, and ruin the pristine environment that many people find so remarkable. Though mature cryptobiotic soil can be easy to recognize, young crusts may appear as a thin soil without unique coloration or features.

It is crucial, for both ecological and aesthetic reasons, that all hikers remain on marked trails or other durable surfaces, and that all vehicles and bikes remain on designated roads. If hiking cross-country, walk on rock or in natural drainages, and avoid using "social" or game trails as shortcuts.

When backpacking, use a designated site or set your tent or sleeping bag on slickrock. When driving or biking on four-wheel-drive roads, always use pull-outs to let other vehicles pass. If you see rocks piled along the roads or campsites, do not move them or drive beyond them: they are placed there by rangers to help stop the spread of impacted areas.

For the sake of the landscape please avoid leaving any trace of your passage. In many national parks, visitors are asked to "Take only pictures, leave only footprints." In southeast Utah, you are asked to be even more careful. Your cooperation will ensure that the country remain healthy, beautiful and wild for generations to come.

KL Young, Leader
Wednesday, April 17

This trail tours the vicinity of colorful Hidden Canyon northwest of Moab before climbing out of it to explore an exposed section of the Entrada Sandstone formation called the Moab Tongue. It then utilizes a section of the 3 D Trail that features the major obstacles of that trail, and ends with a thrilling descent of a rocky hill that features a sharp ledge in the middle that is sure to test a few skidplates. Approximate mileages: 59 total, 26 off highway.

Scenery: Unlike the Moab Valley with its sheer Wingate Sandstone cliffs, this trail visits canyons that are less than a hundred feet deep in the smooth red and white Entrada Sandstone. The slickrock area is made up of the white layer that sometimes tops the Entrada called the Moab Tongue. Vistas are the Book Cliffs to the north, the La Sal Mountains to the southeast and occasional sightings of the Abajo Mountains to the south and the Henry Mountains toward the southwest.

Road Surface: There are some county road sections, some two track dirt sections, some sandy and possibly wet wash bottoms, a really bumpy slickrock section, and a very rocky hill with a tall ledge.

Highlights: The “Dill Pickle” will signal the start of the 4 wheeling, the “Pickle Slicer” may try to inflict body damage, then the “Jalapeno Pickle” will combine a climbing challenge with a sneaky thrust at the right front fender. The seemingly endless little mounds of the “Mashed Potatoes” section offers up the “Gravy Boat” for those who want to play, then “the Wall” and “Mean Hill” on the

3 D Trail are encountered. Finally, “I Drill Hill” will attempt to prove that sometimes you can get stuck going down a steep hill.

Dan & Debe Mick, Leaders

This connection between the Poison Spider Mesa Trail and the Gold Bar Rim Trail was first developed during the 1989 Jeep Safari. Folks seem so fond of damaging their equipment we have made it available most days anymore. Much of the route is near the rim above the Moab Valley and offers gorgeous views in all directions. Its main claim to fame, however, is that some bypasses, where they exist, still rate a 6. Approximate mileage: 7 miles off highway (see Poison Spider Mesa Trail and Gold Bar Rim Trail to figure total mileage).

Scenery: Most of the trail is just atop the sloping layer of Wingate Sandstone and offers vistas to the west and north. Of note are the Colorado River Canyon in the vicinity of Amasa Back, the fin country of the north end of Behind the Rocks, and Jeep Arch. The higher north end of the trail opens vistas in all directions.

Especially rewarding are the breath-taking peeks over the cliff rim toward Arches National Park.

Road Surface: The easy parts are layered broken rock and dirt, while the challenges are solid rock ledges. There is some slickrock, but it is those short, vertical sections that favor tall tires and locking differentials.

Highlights: After passing the obstacles on the Poison Spider Mesa Trail, there is some pretty easy slickrock driving on fins. The first obstacle is the steep uphill of the “Launching Pad”. After this they keep on coming: “Skyline Drive”, “Zuki Hill”, “Golden Crack”, “Golden Steps”, “The Wall”, “Double Whammy” and the “Body Snatcher”. Bring the best of equipment, the tow truck can’t make it.

Kane Creek Canyon Trail

Dave Swafford, Leader

This trail follows Kane Creek along the bottom of its canyon between its mouth at the Colorado River and its crossing of US 191. It runs in and out of the creek- more than 50 crossings-but in one area climbs high on the canyon wall. When the creek is wet, as it is likely to be in springtime, there is mud and quicksand. After a storm the creek crossings may be impassible. Wet or dry, plenty of brush grows in from the sides of the road allowing for potential paint damage. Approximate mileages: total 38, off highway 20.

Scenery: The lower portion of the canyon is narrow, torturous, and one of our most beautiful. Farther upstream, it becomes wider, straighter, and deeper (1000 feet), but it changes in character again above the junction with Hatch Wash. There, the water is clear, the bottom is gravelly rather than sandy, and the canyon is more intimate.

TRAIL SPONSOR
BESTOP
Tuesday April 16

Road Surface: The lower canyon road has a 2WD gravel surface as far as the first creek ford. The next few miles upstream are on a silt bench with many “gotcha” gullies and several narrow spots requiring proper wheel placement. When it reaches the section that crisscrosses the creek, the bottom is sandy (sometimes with quicksand) and brush is thick growing into the trail.

The upper part of the trail has a rocky creek bottom and some rocky steps on the narrow shelf road above the creek.

Highlights: The scenery along the entire trip is spectacular. The major obstacle is the eroded, rocky portion along a narrow shelf section above the

creek. Just past this is a tough rock ledge at Muleshoe Canyon that is a difficult climb on wet tires. Annual erosion has us constantly reevaluating the trail rating prior to each event.

Where Eagles Dare

**Bill & Christine Dean,
Leaders**

We recently added some shorter trail segments to add additional excitement and challenge to some of our existing trails. This addition is offered to the Poison Spider Mesa Trail one day, and the Golden Spike Trail on Big Saturday. This segment combines all the obstacles of the Poison Spider Mesa Trail, then adds about a third of the Golden Spike Trail (on Poison Spider only days), just to access this segment. Where Eagles Dare features extremely steep climbs and descents of slickrock domes (think of Hell's Revenge on steroids). Note the additional rating above the Poison Spider Mesa Trail that reflects the additional equipment required for this trip. Furthermore, due to the steep slopes encountered we

seriously emphasize your vehicle be in top mechanical condition as the climbing ability and brakes will be severely tested.

Scenery: A lot of the scenery is similar to Poison Spider Mesa, but the lunch spot arch and overlook of Moab are not visited. The steep, high sandstone domes provide great distant views of the La Sal Mountains, Amasa Back, Jeep Arch, Corona Arch, and the railroad line that runs to the potash plant just after it emerges from its mile long tunnel.

Road Surface: The Where Eagles Dare segment is the smoothest part of the trip (see Poison Spider/Golden Spike descriptions) as it consists of smooth Navajo Sandstone slickrock, just tackled at extremely steep angles.

Highlights: This trail segment consists of nothing more than an immense slickrock roller coaster ride as the trip wanders up and down the edges of a huge bowl to a viewpoint of the railroad and Corona Arch, and then continues back to the Golden Spike Trail.

Marlene & Devon Parson, Leaders

A major goal of this trip is Arth's Rim, which overlooks US 191 1300 feet below. The route at first angles up the sloping part of the cliff to a gap in the rim rock. It follows Little Canyon partway into the mesa to resume the climb along the gentler slope of the tilting rock strata. Much of the trail is routine 4 wheeling, but the approach to the rim through Mirror Gulch is difficult and threatens sheet metal. Later in the trip, Widowmaker Hill has become so extreme your leader will take a roundabout bypass to the top. Approximate mileages: 66 total, 46 off pavement.

Scenery: The road portion on the slope below Arth's Rim climbs to increasingly fine views of Arches National Park, the Moab Valley, and the La Sal Mountains. That is just a warm up for the view from the perch at the top. Little Canyon has beautiful vertical walls, and a few arches may be spotted by alert riders. The Gooney Bird Rock is interesting to see; the route goes right under it.

Road Surface: The trail varies from easy dirt to some tall sandstone ledges, with some relatively level slickrock and sand mixed in.

Highlights: The slickrock slopes leading the way to Arth's Rim have one step that may warm up some tires. Near the rim the trail passes "Rock Chucker", once the way to go but now used as a playground. "Mirror Gulch" signals the start of the final .3 mile to the rim. There are a series of ledges, shelves, and a switchback in this short distance to challenge both driver and vehicle. The view from the rim is a highlight all by itself.

The Moab Rim is the cliff rim seen just to the southwest of town. Its only 4WD access begins just downriver from town and the first mile has about the highest density of obstacles of any of our trails. Many vehicles have “bit the rocks” on the succession of rock ledges and tight turns that lead to the rim. Once on top the trail is sand and rock. After closing a short loop the trail returns on the same rocky mile it started with. Approximate mileages: 14 total, 9 off highway.

Scenery: The first mile of the trail follows the tilted rock layers and has increasingly higher overlooks of the Colorado River gorge in one of its most beautiful areas. The rim view includes the La Sal Mountains, Moab and Spanish Valleys, some of Arches National Park, and distant features such as the Book Cliffs.

Road Surface: The first part of the trail is mostly on bedrock that nature has broken into ledges and steps. The higher country has slickrock, blow sand, and some sandy dirt with broken rock mixed in.

Highlights: Among the many steps in the first mile are the “Devil’s Crack” and the “Z Turn” The first requires a tricky turn onto a ledge to avoid dropping a wheel into the crack beyond. The latter has two turns over irregular rocks and ledges, many of which are off camber. On top, a slickrock dome has an optional climb with about an 85 percent grade.

Rose Garden Hill Trail

Roy & Laura Davidson, Leaders

This trail evolved from a longer trip that went up Cottonwood Canyon to visit sites on Sevenmile and Waring Mesas. Weather and travel took its toll, so now the trip has become a stand alone full day trip just to reach and conquer the hill itself.

How best to describe the hill to an experienced 4 wheeler? Well, how often do you encounter a hill so mean you can easily get stuck going downhill? If you are familiar with that concept, then focus on the reality of first having to ascend this mean, long hill, and then, after lunch, descend the same hill. Lines change, and it becomes a new ball game going back down. Lots of stuff in the Moab area involves slickrock shelves that have solid bases that let vehicles climb crazy steep angles. Very seldom is an ascent so strewn with very seriously sized rocks on loose soil that dictate the approaches to really tall, exposed shelves. Still fewer trails feature so long an ascent. Lately nature has been adding some serious ruts caused by water drainage from several wet winters and springs.

The driver has to continue to pick a good line up this nearly .3 mile hill. This usually results in a serpentine path as the vehicle ascends the hill, depending upon the vehicle's size, equipment, and capabilities. The choices get narrowed to a very narrow path during the upper third of the hill. The nastiness of the hill severely restrict the ability of a buddy to assist via a tug. It's not uncommon to have 4 vehicles stuck on this hill at the same time. Bring all your toys (high lift jacks, snatch straps, winches, pulley blocks) and a few friends to help use them when you choose to run this trail.

Approximate mileages:

67 total, 26 off highway.

Scenery:

The road up Onion Creek offers scenery that seems straight out of a Disney theme park. The passenger usually is the beneficiary of this however, as the driver is usually busy watching for oncoming traffic on the twisty road. The Top of the World overlook is directly above at one point. Fisher Valley offers a panoramic view of the La Sal Mountains, Fisher Mesa, North and South Beaver Mesas, Polar Mesa, Sevenmile Mesa, and Waring Mesa. The trail itself offers beautiful scenery in Cottonwood Canyon, first as it winds along the bottom, and then from above at the top of Rose Garden Hill.

Road Surface: The Onion Creek county road can be graded smooth dirt or 4WD bumpy depending upon recent storms and flooding. The trail itself offers some dusty dirt sections, then some slickrock with small shelves adding some bumpiness. Drainages off the mesa above add constant changes at their crossings. Rose Garden Hill has already been described.

Highlights: The constant scenery changes make this trip a delight, and then there is the fun at the hill itself.

LOOTING and VANDALISM
REPORT

Peter Fogel, Leader

This trail is the only vehicle route onto the Amasa Back, a high isolated area surrounded by Kane Springs Canyon, Hurrah Pass, and a big loop of the Colorado River. If Kane Creek is full, the crossing can become impassable. The views are spectacular all the way up the side of Kane Springs Canyon. Farther along the trail is high above the canyon of the Colorado River. At various places along the trail there are petroglyphs and other evidence of early visitation. Approximate mileages: 20 total, 12 off pavement.

Scenery: This trail goes to an overlook of the Colorado River that is spectacular. Since it retraces the route on the way back, much of the scenery is on the way back, because the struggle to climb up from Kane Creek demands so much attention early in the day. The cliff edge look into Jackson Hole is inspiring, and the afternoon view of the La Sal Mountains and the Behind the Rocks area is one of our best.

Road Surface: Most of the road surface is rock. It crosses various sandstone layers that create difficult stair step ledges. There is some sand, some dirt amid rock layers, and even some fairly level slickrock.

Highlights:

The trail grabs your attention immediately as it descends a cascade of rock ledges from the Kane Creek Road to the creek bottom. The creek crossing can range from dry sand through quicksand to deep water depending upon recent weather. A difficult ledge waits immediately after the creek crossing. From here on up the trail seems to consist of an endless series of steep, irregular ledges that require good ground clearance and maneuverability. The actual Cliffhanger obstacle is a big ledge on a narrow shelf trail overlooking Jackson Hole. The correct line at this obstacle seems to change constantly, and also varies for different wheelbases.

Product Displays

The Easter Jeep Safari gathering of four-wheelers becomes a magnet for people who would like to sell something. Where the Red Rock 4-Wheelers use a large arena for registration, there is considerable room for displays by manufacturers and sales organizations, both large and small. The demand for this display space has grown to the point that there is a waiting list to get in.

The product displays have been limited to items of interest to "the 4-wheel crowd," but some spaces have been donated to worthy causes that are directly related to Easter Jeep Safari activities.

As in recent years, there will be indoor and outdoor displays of 4-wheel-drive products on **Thursday, April 18, and Friday, April 19**. These vendors have rented their space, and many have contributed products to a giveaway drawing on Friday evening, April 19. Every registered vehicle in the Jeep Safari receives a ticket to this giveaway (Your ticket will be in your registration packet).

In order to make the prize drawing move along quickly, we require that the giveaway prizes be substantial in value,

but the vendors have been so generous that the drawings usually go on well into the evening. The drawing requires the ticket holder to be in attendance and the drawings have been popular enough to create real traffic jams near the Arena, so please be patient with parking and traffic control officials.

If you are interested in being a vendor at this unique show contact Carma at 435-259-1916 or rr4wvending@yahoo.com

Melissa Fischer
Monday, April 15

The Rusty Nail Trail is a short (1 mile) but tough segment that provides a short cut to the Golden Crack area of the Golden Spike Trail. For the all out Yahoo Jeoper the trail is combined with the toughest part of the Golden Spike Trail, and the entire Gold Bar Rim Trail to provide a trip guaranteed to keep the adrenaline pumping and the 4wd equipment thoroughly tested. Approximate mileages: 49 total, 27 off highway.

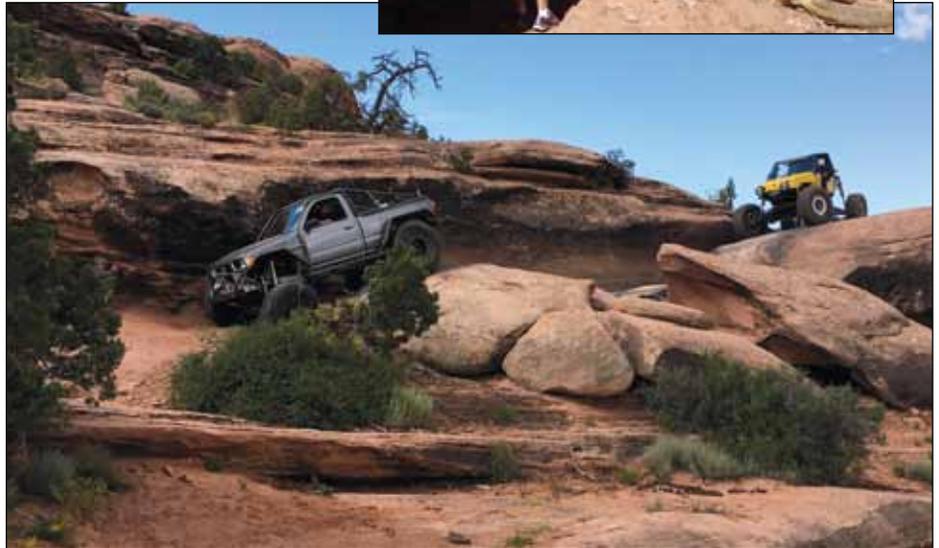

Scenery: There are some vast panoramic views of the Colorado River and the canyons and mesas that surround it. Jeep Arch can be seen, the top of the Gold Bar Rim provides views into Moab valley and Arches National Park. The Gooney Bird rock is passed twice.

Road Surface: There are a lot of ledges and off camber sections, climbs over boulders, and even a couple of smooth slickrock sections.

Highlights: There are numerous ledges and tippy sections, but only two have earned names yet. "Riff Raff" is the first, encountered about halfway into the trail. It is a two section obstacle, the first being a large slab of rock that has an undercut that must be overcome to get up onto the slanty slab. The second part consists of a climb up numerous large rocks, again featuring undercuts, with sizeable holes between them. The second named obstacle is "No Left Turn". Obviously it features a hard right turn around a rock wall. Next it drops steeply down some slickrock to enter a narrow section that features a drop on the left and a wall to the right. A large boulder lies in the path, so the left tires must climb over it, all the while trying to avoid making contact between the vehicle's top and the

Peter Fogel
Thursday, April 18

wall. Once through Rusty Nail, the final Golden Spike obstacles await, as well as "The Waterfall" on the Gold Bar Rim Trail.

Escalator To Hell

David Adams, Leader

Sunday, April 14

This version of Hell's Revenge is offered for the Yahoo Jeeper who has conquered all the regular obstacles of the trail and yearns for more. The higher trail rating for this one reflects the greater challenges offered by "Hell's Gate" and "The Escalator".

Highlights: This trip is designed with the Yahoo Jeeper in mind. To us, that means the difficult side of all the optional climbs will be taken and the Hell's Gate

obstacle will be offered as well as the Escalator obstacle. Hell's Gate consists of a steep climb up a chute that narrows as it nears the top. Reliance on a good spotter is advised on the upper part as a mistake here can mean a series of rolls all the way to the bottom. Just before Tip-Over Challenge the Escalator obstacle is encountered. It involves a series of climbs up a V shaped notch in the slickrock. The correct line wanders back and forth attempting to keep the tires out of the bottom of the notch, at times pressing the sidewalls against the rock sides, at others featuring a front tire pawing at the air. Once up the Escalator, Tip-Over Challenge and Rubble Trouble still await.

Associate Leaders: Johnny Cobia, Jeremy

Free to Roam: Beauty, History and Choosing Your Own Adventure on the Rimrocker Trail

by Jon Waschbusch, Deputy County Manager of Montrose County

Montrose, Colorado and Moab, Utah. Two vibrant western communities surrounded by a limitless world of outdoor recreation. These are places where the tie to public lands is palpable to even the casual visitor. The iconic Canyonlands,

Arches and Black Canyon National Park are prominent forces in both communities. In places with such expansive playgrounds seasons are not referenced by name, but

rather, by activity. Visitors and locals alike build schedules around powder days, elk tags, stonefly hatches and river flows.

Weaving an adventurous connection between these two destination communities is The Rimrocker Trail. A 160-mile route that leads travelers through some of the most diverse and scenic country the west has to offer. As would be expected, the route features the high elevation alpine forests and wildflowers for which Colorado is known. The unexpected is discovered as the route winds through redrock canyons and desert valleys that make this part of Colorado unique. On The Rimrocker, there is no need to choose between sandstone vistas or mountain meadows. It's all included.

Another difficult choice that The Rimrocker spares users is that of how to travel. The route is open to off highway vehicles "OHVs" (including dirt bikes), 4WD, bicycles and horses. Choose your preferred ride and get ready to head out. One indispensable companion for your trip is the official Rimrocker Trail Map. Stop by the Montrose Visitor Center www.r4w.com

located at 107 S Cascade Avenue in historic downtown Montrose. Within walking distance of the Visitors Center, you will find an ample supply of gear stores, bike shops and any other amenity that you need to prepare for your trip. If you've just returned from a long ride, the same area offers amazing options for all the food and drink you'll need to recharge.

Once you do embark on your trip, be prepared to undertake an adventure. Travelers **will** encounter rough roads, ledges, creek crossings, remote areas (blissfully) devoid of cell phone service and an overwhelming sense of "awesomeness". As an added bonus, users **may** experience snow, bears, snakes, cacti and a strong desire to stay an extra week or two. Don't worry, these feelings are normal.

The unique feel of The Rimrocker is not solely attributed to the world class scenery. The history of the Montrose area is on display as you make your way along the route. In fact, the name "Rimrocker" is actually a nod to the quirky history of the area. At the beginning of the 20th century, "Rimrockers" was a term used to describe an eclectic mix of miners, hermits, cowboys and yes, outlaws that frequented and in some instances hid out in the rimrock country of Montrose County. Today's rimrockers share a commonality with their predecessors in that they are still looking to get away albeit not necessarily from a bank heist.

The importance of mining and ranching in the Montrose area is readily apparent to travelers as they encounter grazing cattle and remnants of old mines along the route. These physical reminders make it easy to understand the pioneering spirit of those trying to strike it rich on a mining claim in the old west. Rising dust from mule trains and the steady metallic ring of pick axes was the norm in this area and still seems to linger just around the next bend. The sheer grit of people that worked these remote places is incredible. There is no better way to get a sense of this hardscrabble past than to stand where they stood and observe the imposing natural environment that afforded opportunity and struggle.

The natural environment that once drew those seeking their fortune continues to draw visitors. At the western end of The

Rimrocker, the beauty of the Moab area draws visitors from around the world. This abundance of interest means that enjoying many Moab area activities means doing so as part of a crowd. This is not so on The Rimrocker. The rugged character of the route allows travelers to experience the same spectacular scenery minus the company. The small effort it takes to get off the beaten path rewards those willing to do so with a more personal experience and sense of adventure. Looking down on

a river as it carves through a serpentine sandstone corridor is mesmerizing. The chance to have such a view to yourself or shared with a few close friends is rare. This is exactly the type of memory that The Rimrocker can provide.

Since the establishment of The Rimrocker, one of the more common questions that has been posed is, "How long does it take to complete the route?" The answer is a firm, "It depends." It depends on whether you stop to hike, raft, explore a side trail, camp, take some photos, cast a fly or take a nap. It depends on whether you do part of the route and then head back to Montrose to resupply for an adventure elsewhere. If the journey is the destination, you can travel the route in a day. If you're easily distracted by incredible opportunity to explore everything that the Montrose area has to offer, it may take a lifetime.

"A venturesome minority will always be eager to set off on their own, and no obstacles should be placed in their path; let them take risks, for godsake, let them get lost, sunburnt, stranded, drowned, eaten by bears, buried alive under avalanches - that is the right and privilege of any free American."

Ed Abbey - *Desert Solitaire*

Pritchett Canyon Trail

Kevin Hawkins, Leader

Pritchett Canyon is becoming more difficult every year, and is now to the point where the average well equipped rig may have great difficulty in completing the trail. Vehicles with large amounts of lift will find the trail especially harrowing, as the many off camber spots will induce body roll and severely test a driver's nerve. Rollovers and broken parts are very common, and there are no easy bypasses. We have found the majority of rigs will require a winch or strap on at least a couple of obstacles.

If you can take your eyes off the obstacles long enough, you'll find a splendidly beautiful, narrow canyon. The trail climbs the lower part of the canyon and exits via a side canyon over a divide into the Hunter Canyon system. Depending upon how long it has taken to get to this point, your leader will then choose among several routes to head back to the highway.

Approximate mileage: 37 total, 21 off highway.

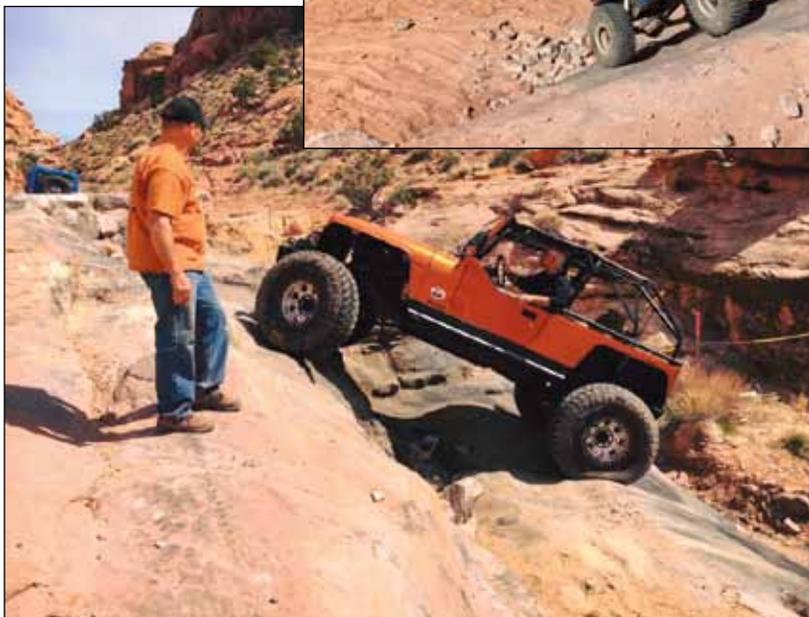

Scenery: While in the canyon the views are of steep canyon walls, large side canyon pour offs, and a pool speckled creek bottom. Pritchett Arch, Window Arch, and some smaller spans are visible from the trail.

Road Surface: The trail follows the bouldery creek bottom at first but then climbs onto ledge routes on a mixture of rock layers and dirt. The major obstacles are several forms of bedrock now exposed after erosion of the early roadway.

Highlights: Obstacle 1) Just a few hundred yards into the trail there is a ledgy downhill that got so bad Grand County graded it with heavy equipment a few years ago. It is starting to deteriorate again, so care should be taken on the descent. Obstacle 2) After passing a small mud hole caused by a seasonal spring, the trail drops into the canyon

bottom. "The Brickyard" is the name of the climb back out. Several options are available, none are easy. Obstacle 3) "Chewy Hill" is the next challenge. Once a graded dugway, it has eroded to become a major obstacle. It is slippery and very off camber, with numerous medium to large ledges that must be driven up. Obstacle 4) Approaching Rocker Knocker is a sizeable slickrock area. There is an optional obstacle to the right called "The Waterfall" that can be tricky if it is wet. Obstacle 5) This is "Rocker Knocker". This double ledge requires the perfect line, and a successful climb will usually push a rig to the brink of rolling over. It is next to impossible if wet. Broken parts and tipovers are common here. Obstacle 6) Next up is an unnamed hill that resembles a 30 foot wide staircase. This series of large ledges claims numerous axle shafts and drivelines, and tipovers are possible.

A bypass to the left can be easier, but a large rock that must be driven over can easily create some body damage. Obstacle 7) "Axle Hill" waits just a few yards up the trail. This hill starts in the wash bottom and climbs out in two stages. The first part is very steep and slippery, and is the site of many rollovers. The second part is steep, as well as ledgy and off camber. Obstacle 8) The famous "Rock Pile" is next. It is an 8 foot ledge that once had rocks stacked 2/3 of the way up. The rocks are all gone now, and the ledge regularly triumphs over some of

the best rigs. A bypass we began calling “Son of Rock Pile” requires constant rock stacking, and even then may require a winch line. Obstacle 9) The last obstacle is “Yellow Hill” where the road reaches for the top on a very uneven and slippery ledge of multicolored rock. Caution must be exercised here, as a simple flop could easily turn into a multiple roll. Once the top is reached, the leader has a few choices. The easiest is a moderate to easy, but very long, road back to US 191.

Additional Notes: Pritchett Canyon was named a B.F. Goodrich Outstanding Trail in 2008, and is noted for its spectacular scenery as well as the hard core challenges. Due to its popularity and difficulty, the trail has seen more than its fair share of damage over the years. Many hours are spent performing maintenance every year, but the thoughtless actions of some users that create significant abuse adds to this maintenance burden. Help us keep this trail open by staying on the trail, and never create new bypasses or obstacles.

In Memoriam

David Soukup

David Andrew Soukup, 49, of Indiana, passed away Saturday, July 28, 2018, at his home.

A son of James and Barbara (Taraba) Soukup, he was born July 15, 1969, in Cleveland, Ohio.

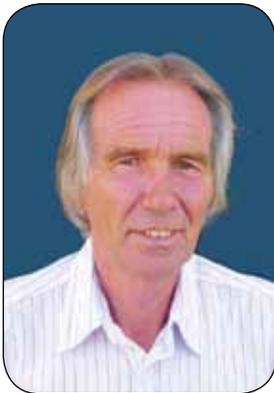

Dave was a 1987 graduate of Greensburg Central Catholic High School. He furthered his education at the Electronics Institute and the International Brotherhood of Electrical Workers Local 5 Apprenticeship Training Program. Dave was employed by Sargent Electric Company as a project manager, following his 28 years as an electrician, foreman and superintendent with Lighthouse Electric Company Inc. He was a member of IBEW Local 5 and the Red Rock 4-Wheelers Inc. Dave looked forward to his semi-annual trips to Moab, Utah, where he navigated the off-road trails, occasionally leading other Jeep enthusiasts over the rocky terrain. In his spare time, Dave enjoyed riding his mountain bike, dirt bike, and going to camp, in addition to almost any outdoor activity.

He is survived by his mother, Barbara Soukup, of Derry; his best friend and wife of 16 years, Margaret "Peg" (Riddle) Soukup,

of Indiana; two stepchildren: Luke Good and wife Nicole, of Seattle, Wash.; and Joshua Good and fiancée Natasha Fabian, of Pittsburgh; a brother, Gerald Soukup and wife Lynn, of Uxbridge, Mass.; a sister, Susan Probst and husband Henry, of Latrobe; extended family members: James and Ellen Riddle, Larry and Patty Riddle, Gary and Debbie Lichtenfels, David and Joyce Anderson, Linda Riddle and numerous nieces and nephews. He will also be sadly missed by his best canine friend, Stormy.

He was preceded in death by his father, James Soukup.

In lieu of flowers, the family kindly suggests memorial contributions be made to the Indiana County Humane Society, 191 Airport Road, Indiana, PA 15701 or to the Red Rock 4-Wheelers M.U.D. Fund, PO Box 1471, Moab, UT 84532.

**Larell "Chip" Brox
1948-2018**

The passing of an era took place as our good friend Chip left us just after his 70th birthday. Every one who has come to Jeep Safari will remember something about Chip.

Chip was a charter member of the Red Rock 4 Wheelers having been arm twisted to join after the Moab Chamber of Commerce turned the Safari over to this newly formed club. From the beginning Chip was a force to be reckoned with in the club. He led trails from the beginning in 1984 and was still active up until his passing. We are naming the Hellroaring Trail in his honor for 2019, one of the many trails that he led over the years.

His job at the helm of the Grand Tire Company put him in touch with hundreds of 4 wheelers over the years. Many of these loyal customers would not buy their tires from anyone else.

His contacts in the tire industry led him to provide the first set of tires to be given away at the fledgling Safari events early BBQ. This activity was the beginning of the now Friday night super give-a-way. Everyone should remember him as the MC of this event with the final prize of the evening each year was the presentation of the BF Goodrich tires.

In a modest memorial service, dozens of locals and family members gave stirring comments on how Chip had affected their lives in some way or another. This service included BF Goodrich executives who came from South Carolina to pay their respects.

Chip was also active in the Elks and served a term as the Grand Poobah of the local lodge. He also supported many various outdoor recreation organizations, such as Rocky Mountain Elk Foundation, Ducks Unlimited and Moab Sportsmans Club.

He loved anything that had a motor. Every weekend he would either be out in the country in his Jeep, watching Nascar on TV or being at Nascar in person. Camping, dove hunting, crawdad fishing in Colorado were all on his personal schedule. He also loved dutch oven cooking over a campfire (or giant bonfire which he would sit by until the wee small hours of the morning).

Chip was the unofficial chairman of a small group of local businessmen who met every weeknight at 6:00 pm for beverages. This group ebbed and flowed over time as people came and went. Some evenings it

would be only 3 and some times it would be a dozen. The only rule which was strictly enforced: if anybody talked business they had to pay the tab.

Chip is survived his wife Maria, Son Dusty (Brooke), daughter Melissa (Jeromy Hyatt) and many loving grandchildren. Chip's annual Christmas rite of passage was to take all of the grandchildren to a mall, turn them loose and tell them what their budget was, then go to the food court and wait for the results.

He will be missed by many.
